

Appian - ACD201 - Marvelous Appian Senior Developer Certification Book Torrent

BONUS!!! Download part of GuideTorrent ACD201 dumps for free: https://drive.google.com/open?id=1R_YKgnd7vU75U2FO-w3QrkQTO8AuKjl

ACD201 study materials can expedite your review process, inculcate your knowledge of the exam and last but not the least, speed up your pace of review dramatically. The finicky points can be solved effectively by using our ACD201 exam questions. With a high pass rate as 98% to 100% in this career, we have been the leader in this market and helped tens of thousands of our loyal customers pass the exams successfully. Just come to buy our ACD201 learning guide and you will love it.

Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.
Topic 2	<ul style="list-style-type: none">• Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.
Topic 3	<ul style="list-style-type: none">• Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.
Topic 4	<ul style="list-style-type: none">• Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.

Interactive ACD201 Testing Engine & ACD201 Latest Study Guide

In the era of information explosion, people are more longing for knowledge, which bring up people with ability by changing their thirst for knowledge into initiative and "want me to learn" into "I want to learn". As a result thousands of people put a premium on obtaining ACD201 certifications to prove their ability. With the difficulties and inconveniences existing for many groups of people like white-collar worker, getting a ACD201 Certification may be draining. Therefore, choosing a proper ACD201 exam guide can pave the path for you which is also conducive to gain the certification efficiently. So why should people choose us? There are several advantages about our ACD201 latest practice dumps for your reference.

Appian Senior Developer Sample Questions (Q48-Q53):

NEW QUESTION # 48

You're in the process of deploying a package to the client's TEST environment at the end of a sprint. This package is only relating to changes to a single application.

Which two statements best describes the practices you should follow for automated testing for expression rules either before or after deploying the package? (Choose two.)

- A. After deploying the package, you should perform regression testing by running the Start Rule Tests (Applications) smart service to automatically run the test cases. This indicates whether there are any impacts caused by changes to the application.
- B. After deploying the package, you should perform regression testing by running the Start Rule Tests (All) smart service to automatically run the test cases. This indicates whether there are any impacts caused by the changes across multiple applications.
- C. Before using Compare and Deploy, individually evaluate the test cases in the expression rules you intend to deploy. For any failed test case, adjust the expression rule so that it passes.
- D. During Compare and Deploy, the Inspect Deployment tab automatically runs the test cases in each of the expression rules. Review these findings, and either adjust the expression rule or delete outdated test cases.

Answer: A,C

Explanation:

Individually evaluating and fixing expression rule test cases before deployment ensures the new package does not introduce errors. Running regression tests after deployment using the Start Rule Tests (Applications) smart service validates that the deployed changes did not negatively impact the application.

NEW QUESTION # 49

You're conducting a design review.

You identify slow-performing expression rules querying a specific data store, and need to understand the "number of operations against data stores." Which metric from the data_store_details.csv file is helpful to you?

- A. TCCCotal Count
- B. Execute Count
- C. Query Count

Answer: C

Explanation:

The "Query Count" metric in the data_store_details.csv file indicates the number of operations (queries) performed against data stores, helping you analyze data store usage.

NEW QUESTION # 50

What are three ways to optimize the memory usage of a process model? (Choose three.)

- A. Divide large nodes into multiple smaller nodes.
- B. Avoid storing large blocks of text in process variables.
- C. Minimize the use of subprocesses in the model.

- D. Decrease the number of process variables.
- E. Configure process variables as parameters.
- F. Pass data directly to activity nodes and smart services.

Answer: B,E,F

Explanation:

Passing data directly to activity nodes and smart services reduces unnecessary use of process variables, optimizing memory.

Configuring process variables as parameters limits their lifespan and persistence, saving memory.

Avoiding large blocks of text in process variables minimizes memory consumption within the process model.

NEW QUESTION # 51

An application consists of a record type with sync enabled. This record type is used as a source to create a read-only grid.

A field "Number of days since created" is configured in the interface and a logic is implemented to calculate the number of days since a record is created in the application.

You need to implement sorting on this field.

What should you do?

- A. Create a custom record type field and use it in the sorting configuration.
- B. Sorting is not possible on custom record type fields. Instead, create a view with a custom field and use the field from the view for sorting.
- C. Add sortField: "Number of days since created" configuration for the gridColumn that needs to be sorted.

Answer: A

Explanation:

Creating a custom record type field to calculate "Number of days since created" allows you to use this field in the sorting configuration of your read-only grid.

NEW QUESTION # 52

You're creating an application which has integrations with multiple systems using different protocols.

Match each process model component or node to the appropriate protocol.

Note: Each protocol will be used once. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

Call Web Service smart service
Select a match:

REST	<input type="checkbox"/>
SOAP	<input type="checkbox"/>
SMTP	<input type="checkbox"/>

Start event and a receive message trigger
Select a match:

REST	<input type="checkbox"/>
SOAP	<input type="checkbox"/>
SMTP	<input type="checkbox"/>

Call Integration smart service
Select a match:

REST	<input type="checkbox"/>
SOAP	<input type="checkbox"/>
SMTP	<input type="checkbox"/>

Answer:

Explanation:

Call Web Service smart service Select a match:						
<table border="1"><tr><td>REST</td><td><input checked="" type="checkbox"/></td></tr><tr><td>SOAP</td><td><input checked="" type="checkbox"/></td></tr><tr><td>SMTP</td><td><input type="checkbox"/></td></tr></table>	REST	<input checked="" type="checkbox"/>	SOAP	<input checked="" type="checkbox"/>	SMTP	<input type="checkbox"/>
REST	<input checked="" type="checkbox"/>					
SOAP	<input checked="" type="checkbox"/>					
SMTP	<input type="checkbox"/>					
Start event and a receive message trigger Select a match:						
<table border="1"><tr><td>REST</td><td><input type="checkbox"/></td></tr><tr><td>SOAP</td><td><input checked="" type="checkbox"/></td></tr><tr><td>SMTP</td><td><input type="checkbox"/></td></tr></table>	REST	<input type="checkbox"/>	SOAP	<input checked="" type="checkbox"/>	SMTP	<input type="checkbox"/>
REST	<input type="checkbox"/>					
SOAP	<input checked="" type="checkbox"/>					
SMTP	<input type="checkbox"/>					
Call Integration smart service Select a match:						
<table border="1"><tr><td>REST</td><td><input type="checkbox"/></td></tr><tr><td>SOAP</td><td><input checked="" type="checkbox"/></td></tr><tr><td>SMTP</td><td><input type="checkbox"/></td></tr></table>	REST	<input type="checkbox"/>	SOAP	<input checked="" type="checkbox"/>	SMTP	<input type="checkbox"/>
REST	<input type="checkbox"/>					
SOAP	<input checked="" type="checkbox"/>					
SMTP	<input type="checkbox"/>
