## Offering GICSP Latest Exam Pdf

Are you aiming to ace the GIAC GICSP exam on your first attempt? Look no further! Pass4Success provides updated Global Industrial Cyber Security Professional (GICSP) (GICSP) exam questions that will help you succeed. In today's competitive job market, obtaining the GIAC GICSP Certification is essential for securing high-paying jobs and promotions. Don't waste your time and money studying outdated GICSP practice test material. Prepare with actual GICSP questions to save time and achieve success.

### GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q28-Q33):

#### NEW QUESTION # 28

Which type of server would be deployed to provide stratum level 2 clock synchronization for ICS systems?

- A. ARP
- B. TFTP
- **C. PTP**
- D. RADIUS

**Answer: C**

Explanation:

PTP (Precision Time Protocol) (B) is a protocol designed for high-precision clock synchronization across networked devices and is commonly used in ICS for stratum level 2 time sources.

RADIUS (A) is an authentication protocol.

TFTP (C) is a trivial file transfer protocol.

ARP (D) resolves network addresses and is unrelated to time synchronization.

Accurate time synchronization is critical for ICS operations, event correlation, and forensic analysis, and PTP is the preferred method.

#### NEW QUESTION # 29

What is the main function of level 0 in the Purdue Reference Architecture for ICS?

Response:

- A. Data storage and backup
- B. Human-Machine Interfaces (HMIs)
- **C. Control and sensing of physical processes**
- D. Business planning and logistics

**Answer: C**

#### NEW QUESTION # 30

What is a best practice for securing Windows endpoints in an ICS environment?

Response:

- A. Enabling automatic login for users
- B. Disabling all security features to increase speed
- **C. Using Group Policies to enforce security settings**
- D. Running applications with full administrative privileges

**Answer: C**

#### NEW QUESTION # 31

Which of the following is a best practice when creating enforceable ICS security policies?

Response:

- **A. Implementing clear guidelines for patch management and software updates**
- B. Granting network access without restrictions
- C. Disabling firewalls to improve data flow
- D. Allowing all users to modify security settings

**Answer: A**

### NEW QUESTION # 32

Implementation of LDAP to manage and control access to your systems is an outcome of which NIST CSF core function?

- **A. Protect**
- B. Respond
- C. Detect
- D. Identify

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

LDAP (Lightweight Directory Access Protocol) is used to manage authentication and authorization services, controlling user access to systems and resources.

This function aligns with the Protect function (A) of the NIST Cybersecurity Framework (CSF), which focuses on access control, identity management, and protective technology to safeguard systems.

Identify (B) relates to asset management and risk assessment.

Respond (C) deals with incident response.

Detect (D) relates to discovering cybersecurity events.

GICSP maps LDAP implementation as a key protective control to ensure authorized access in ICS environments.
