- B. SAP Fiori application extensions
- C. Business role requirements
- D. Known integration requirements

Answer: A,D

### NEW QUESTION # 17

Which of the following does the guided enablement include that is provided to customers through the RISE with SAP Methodology? Note: There are 3 correct answers to this question.

- A. Additional SAP product expertise throughout the entire RISE with SAP journey to the cloud.
- B. Call center support for the entire SAP partner ecosystem after the run phase.
- C. Guidance on what to consider when selecting SAP Partners for the implementation project.
- D. 1:1 meetings between an SAP expert and the Project Manager to discuss reports generated from Clean Core Quality Gates.
- E. 1:1 sessions that cover how to set up project management tools and the project roadmap.

Answer: A,C,E

### NEW QUESTION # 18

In the SAP Activate prepare phase, the cloud project is set up and officially launched. Which change management activities are usually started in this phase? Note: There are 3 correct answers to this question.

- A. Facilitate the role mapping process
- B. Develop and align the change network strategy
- C. Develop an initial change plan for the cloud project
- D. Conduct a detailed change impact analysis
- E. Identify the key stakeholders and conduct a stakeholder analysis

**Answer: B,C,E**

Explanation:

Step 1 - Understanding the Question

In the SAP Activate methodology, the Prepare phase is where the project is officially launched, governance is established, and foundational change management (OCM) activities begin.

Change management in this phase focuses on building awareness, defining structure, and planning- not yet detailed change execution.

Step 2 - Evaluate Each Option

A). Develop and align the change network strategy

\* During the Prepare phase, one of the first organizational change activities is to design the change network- a group of change agents and champions who support adoption across business areas.

\* The strategy defines roles, responsibilities, and communication lines for this network.

\* This early setup enables effective stakeholder engagement during later phases.

Result: Correct - The change network strategy is initiated and aligned in the Prepare phase.

B). Identify the key stakeholders and conduct a stakeholder analysis

\* Early stakeholder identification is a core task in the Prepare phase.

\* The project team identifies business and IT stakeholders who influence or are impacted by the project.

\* A stakeholder analysis is then performed to understand their interests, influence, and readiness levels.

\* This ensures targeted communication and support planning for each group.

Result: Correct - Stakeholder analysis is a standard activity of the Prepare phase.

C). Facilitate the role mapping process

\* Role mapping links system roles to business users and is typically performed later - in the Explore or Realize phase, once business process requirements and system access needs are clearly defined.

\* It is not a primary OCM activity in the Prepare phase.

Result: Incorrect - Conducted later in the project.

D). Conduct a detailed change impact analysis

\* Detailed change impact analysis requires finalized process design, which occurs after Fit-to-Standard workshops in the Explore phase.

\* In the Prepare phase, teams may perform only initial impact identification, not a detailed analysis.

Result: Incorrect - Performed during Explore.

E). Develop an initial change plan for the cloud project

\* A high-level change plan is developed in the Prepare phase to outline change management goals, key activities, milestones, and success criteria.

\* This plan serves as the foundation for detailed OCM execution plans in subsequent phases.

Result: Correct - Initial change plan development is a key Prepare phase deliverable.

Step 3 - Final Answer

The correct answers are:

A). Develop and align the change network strategy

B). Identify the key stakeholders and conduct a stakeholder analysis

E). Develop an initial change plan for the cloud project

## NEW QUESTION # 19

In a new implementation of SAP S/4HANA Cloud Private Edition, what tool is used for the initial one-time deployment of SAP Best Practices content?

- A. SAP Cloud ALM
- B. SAP Solution Builder
- C. SAP Signavio Process Navigator
- D. SAP Central Business Configuration

**Answer: B**

## NEW QUESTION # 20

Which of the following is used to perform configuration in SAP S/4HANA Cloud, private edition?

- A. Self Service Configuration UIs (SSCUIs)
- B. SAP Solution Manager
- C. IMG (Implementation Guide)
- D. SAP Central Business Configuration

**Answer: C**

Explanation:

Step 1 - Understanding the question

The question asks which tool is used to perform configuration in SAP S/4HANA Cloud, Private Edition.

SAP S/4HANA Cloud comes in two main editions:

\* Public Edition: Configuration is performed using Self-Service Configuration UIs (SSCUIs) or SAP Central Business Configuration (CBC).

\* Private Edition: Configuration is performed using traditional SAP GUI tools, just like in on-premise systems.

Step 2 - Evaluate each option

Option A: SAP Solution Manager

Incorrect.

Solution Manager is used for application lifecycle management, documentation, and testing, not for configuration.

Option B: IMG (Implementation Guide)

Correct.

In SAP S/4HANA Cloud, Private Edition, configuration is performed using the Implementation Guide (IMG)- accessible via the transaction code SPRO.

Consultants navigate through the IMG structure to configure parameters for modules like Finance, Sales, or Procurement.

Option C: Self Service Configuration UIs (SSCUIs)

Incorrect.

SSCUIs are used only in SAP S/4HANA Cloud, Public Edition, where users cannot access SPRO.

Option D: SAP Central Business Configuration

Incorrect.

CBC is used to configure systems in the Public Edition, not in Private Edition.

## NEW QUESTION # 21

.....

Our product boasts three versions which include PDF version, PC version and APP online version. The SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects test guide is highly efficient and the forms of the answers and questions are the same.
