Arch-303 Reliable Exam Simulations | Valid Arch-303 Test Answers

Going through our Salesforce Arch-303 certification exam prep material there remains no chance of failure in the Salesforce exam.

So do not waste your time anymore, avail the best Salesforce Arch-303 Exam Practice material and start your journey towards a bright career.

Salesforce Certified B2C Commerce Architect Sample Questions (Q58-Q63):

NEW QUESTION # 58

An existing B2C Commerce site has the following aliases configuration:

```

"www.example.com": [
  {
    "locale": "en_US"
  },
  {
    "locale": "de_DE",
    "if-site-path": "de"
  },
  {
    "locale": "en_US",
    "if-site-path": "us"
  },
  {
    "locale": "en_GB",
    "if-site-path": "uk"
  }
],
"www.example.de": [
  {
    "host": "www.example.com",
    "path": "de"
  }
],
"www.example.co.uk": [
  {
    "host": "www.example.com",
    "path": "uk"
  }
]

```

Which statement related to this configuration is incorrect?

- A. Hostname `www.example.de` will redirect to `www.example.com/de`.
- **B. Hostname `www.example.com` will redirect to `www.example.com/us`**
- C. Site supports multiple hostnames and locales.
- D. Hostname `www.example.co.uk` will redirect to `www.example.com/uk`.

Answer: B

Explanation:

In the provided configuration, the incorrect statement is B. While it appears that the hostname `www.example.com` should redirect to `www.example.com/us` based on the `"if-site-path": "us"` entry, this assumes that the default path or redirect isn't overridden by other configurations within the hostname alias file not visible in the snapshot provided. Typically, in Salesforce B2C Commerce, such a direct statement about redirection should align with explicit mapping rules that include hostname and path directives, which are not detailed for `www.example.com` to `www.example.com/us` in the snippet provided. This absence suggests that the statement may be incorrect unless corroborated by additional detailed mappings in the full configuration file.

NEW QUESTION # 59

An Architect to notify by the Business that order conversion dramatically dropped a few hours after go live.

Further investigation points out that customers cannot proceed to checkout anymore. The Architect is aware that a custom inventory checks with a third-party API is enforced at the beginning of checkout, and that customers are redirected to the basket page when items are no longer in stock. Which tool can clearly confirm that the problem is indeed caused by the inventory check?

- A. Service Status from Business Manager
- B. Sales Dashboard from Reports and Dashboards
- **C. Pipeline Profiler from Business Manager**
- D. Realtime Report from Reports and Dashboards

Answer: C

Explanation:

The appropriate tool to verify that the problem is indeed caused by the inventory check at the beginning of checkout is the Pipeline Profiler in Business Manager. This tool allows an architect to analyze the performance of specific code execution paths, including those involving third-party API calls. It helps identify bottlenecks and inefficiencies in the pipeline execution, particularly useful in

situations where custom code like inventory checks may impact site functionality. The use of the Pipeline Profiler would enable the architect to pinpoint if the custom inventory check is causing the checkout process to fail or redirect users inappropriately.

NEW QUESTION # 60

Given a website launched to production, the Architect can rely on several SFCC Business Manager tools that provide an automatic notification feature.

Which three tools have such a feature and do not require to be monitored manually?

Choose 3 answers

- **A. Pipeline Profiler**
- B. Analytics Conversion Reports
- **C. Job Schedules**
- D. Custom Log Settings
- **E. Quota Status**

Answer: A,C,E

Explanation:

The Salesforce B2C Commerce Business Manager tools that feature automatic notifications are:

* Option A (Job Schedules): Business Manager can send notifications based on job schedules, alerting users when a scheduled job has completed, failed, or met specific conditions. This feature helps in monitoring automated processes without manual oversight.

* Option D (Pipeline Profiler): This tool provides automatic notifications regarding the performance of different pipelines, allowing architects and developers to monitor site performance and troubleshoot issues proactively.

* Option E (Quota Status): Automatically notifies administrators when certain quotas are reached or exceeded, such as API call limits or data storage limits, which is crucial for maintaining site stability and performance.

These tools are essential for proactive site management, ensuring that administrators can address potential issues before they affect the site's operation.

NEW QUESTION # 61

The Client wants to have a flash sale on a few products every day. These products are sold through B2C Commerce as well as an in-store Point of Sale system that is tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed will continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product's inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers

- A. If the product inventory threshold that triggers the web service calls is reached too often. It will have a negative impact on site performance.
- **B. The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.**
- **C. If the external hosted web-service is unreliable. It could be a point of failure in the site's order placement flow.**
- D. Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods

Answer: B,C

Explanation:

The risks associated with the proposed real-time inventory update solution during flash sales are:

* Option A (The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic): This is a critical risk because high traffic during flash sales could exceed the rate limits set for the web-service, leading to exceptions and potentially failing to update inventory in real-time.

* Option B (If the external hosted web-service is unreliable, it could be a point of failure in the site's order placement flow): Reliance on an external web-service for crucial operations like inventory updates introduces a risk of downtime or performance issues if the service is unreliable, directly impacting the ability to complete orders during peak sales periods.

Both risks could severely disrupt operations during critical sales events, suggesting a need for robust contingency plans and potentially reevaluating the solution architecture to ensure reliability.

NEW QUESTION # 62

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases,Json file below will accomplish this task?

- A. 
- B. 
- C. 
- D. 

Answer: C

Explanation:

Option C correctly addresses the requirement for showing the same maintenance page across multiple locales by having each different domain alias ("nto.eu", "nto.at", "nto.de") mapped to the same www domain ("www.nto.eu"). This setup allows all traffic, regardless of the original locale-specific domain, to be directed to a single, unified maintenance page hosted under the "www.nto.eu" domain. This ensures consistency in the maintenance message presented to all users, irrespective of their regional domain.

NEW QUESTION # 63

.....

Once you have any questions about our Arch-303 actual exam, you can contact our staff online or send us an email. We have a dedicated all-day online service to help you solve problems. Before purchasing, you may be confused about what kind of Arch-303 guide questions you need. You can consult our staff online. After the consultation, your doubts will be solved and you will choose the Arch-303 Learning Materials that suit you. Our online staff is professionally trained and they have great knowledge on the Arch-303 exam questions to help you pass the Arch-303 exam.
