GARP Sustainability and Climate Risk Sample Questions (Q95-Q100):

NEW QUESTION # 95

The risk team for a multinational company, that operates and franchises hotel and timeshare properties, prepares talking points for an upcoming business continuity plan meeting. A key area for discussion are the risks that can impact the company's financial and reputational stability. The team recommends the company conduct climate-related scenario analysis and provides examples of scenarios and their use.

Which of the following is correct for the team to include as part of the talking points?

- **A. A company can internally develop its models and scenarios or make use of existing publicly available scenarios.**
- B. Scenario analysis should use a limited set of assumptions and constraints to reduce the risk of generalized scenario results.
- C. Scenario analysis allows a company to better understand its past performance by conducting a lookback analysis.
- D. A company conducting scenario analysis should focus on either physical or transition risks to avoid inconsistent outcomes.

Answer: A

NEW QUESTION # 96

A Central American country signs the Paris Agreement to align actions and policies to keep global temperature rise below 1.5°C. The country's environmental agency develops a nationally determined contribution plan that includes domestic, economy-wide, and sector-specific policies. The power generation sector is most comprehensively covered by the plan.

Which policy included in the plan targets the power generation sector?

- **A. Renewable portfolio standard**
- B. Carbon tax
- C. Emission trading scheme
- D. Green/low carbon public procurement

Answer: A

NEW QUESTION # 97

A multi-industry consortium convenes risk managers from across the globe to discuss climate impacts on global trade and economic growth. A climate modeler leads a discussion on macro-level physical changes in the Earth's atmosphere and highlights two climatic trends that demonstrate an inverse relationship in recent decades.

What two trends does the modeler highlight?

- A. Norther and Southern hemisphere temperatures
- **B. Radiative forcing and Arctic sea ice extent**
- C. Atmospheric aerosol levels and forced variability events
- D. Atmospheric water vapor and global temperature

Answer: B

NEW QUESTION # 98

A telecommunications corporation issues a green bond to finance energy efficiency improvements for the company's office space worldwide. The company's risk management department commissions an independent advisory assessment of the bond to check bond alignment with components of the Green Bond Principles.

What action does the corporation take to align the bond with the "process for project evaluation and selection" component of the Green Bond Principles?

- **A. Create an identification process for environmental and social risks related to energy efficiency improvements.**
- B. Submit legal documentation providing clear quantifiable environmental benefits of the project.
- C. Make available an annual summary on the use of proceeds, stating the project's progress.
- D. Establish an internal process for tracking and allocating funds from the proceeds of the bond.

Answer: A

NEW QUESTION # 99

A sustainability analyst for a global food and beverage company tracks ESG metrics to report to investors. The analyst meets with company leaders of different business units to explain criteria and indicator types for each ESG component. To address each component, which metrics will the analyst socialize with company leaders?

- A. Environmental health and safety record; adherence to code of ethics; risk management protocols
- B. Water use efficiency; employee retention and satisfaction; community engagement
- C. Energy use; GHG intensity reduction; executive leadership compensation
- **D. Carbon dioxide emissions; labor conditions of agricultural workers; board diversity**

Answer: D

NEW QUESTION # 100

.....
