

# Reliable Nutanix Vce NCP-CN Download With Interarctive Test Engine & Trustable NCP-CN Latest Real Exam

BONUS!!! Download part of PassLeaderVCE NCP-CN dumps for free: [https://drive.google.com/open?id=19VK7SNNOpriX5gCU\\_SvkmXd4EX0Gv437](https://drive.google.com/open?id=19VK7SNNOpriX5gCU_SvkmXd4EX0Gv437)

A good learning platform should not only have abundant learning resources, but the most intrinsic things are very important, and the most intuitive things to users are also indispensable. Imagine, if you're using a NCP-CN practice materials, always appear this or that grammar, spelling errors, such as this will not only greatly affect your mood, but also restricted your learning efficiency. Therefore, good typesetting is essential for a product, especially education products, and the NCP-CN test material can avoid these risks very well.

## Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Manage Building an NKP Cluster:</b> This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Perform Day 2 Operations:</b> This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Prepare the Environment for an NKP Deployment:</b> This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Conduct NKP Fleet Management:</b> This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.</li> </ul>

## NCP-CN Latest Real Exam & New NCP-CN Test Cost

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good opportunities for development because they didn't obtain the NCP-CN certification. The prerequisite for obtaining the NCP-CN Certification is to pass the exam, but not everyone has the ability to pass it at one time. But our NCP-CN exam questions will help you pass the exam by just one go for we have the pass rate high as 98% to 100%.

## Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q44-Q49):

### NEW QUESTION # 44

A company was using a test application called temp-shop developed in the temp-ecommerce NKP Starter cluster. Now, the cluster has just been taking up valuable resources that could be used for other projects, so the development team has decided to remove it. Before proceeding, they verified that they had the cluster configuration file temp-ecommerce.conf.

What command should the development team execute to delete the cluster with its nodes and application?

- A. `nkp delete cluster --application-name=temp-shop --self-managed --kubeconfig=temp-ecommerce.conf`
- **B. `nkp delete cluster --cluster-name=temp-ecommerce --self-managed --kubeconfig=temp-ecommerce.conf`**
- C. `nkp delete cluster --all`
- D. `nkp delete cluster --cluster-name=temp-shop --self-managed --kubeconfig=temp-shop.conf`

**Answer: B**

Explanation:

As per the NKPA 6.10 documentation, the correct approach for deleting an entire NKP-managed cluster (including nodes and deployed applications) is to use the `nkp delete cluster` command with the cluster name and `--kubeconfig` parameter. The `--self-managed` flag ensures the deletion of resources provisioned by the cluster.

Exact extract:

"Use `nkp delete cluster --cluster-name=<name> --self-managed --kubeconfig=<config>` to delete a cluster and its associated resources." Reference:

Nutanix Kubernetes Platform Administration (NKPA) 6.10 - "Cluster Deletion Workflow" NCP-CN 6.10 Study Guide - "Deleting a Managed Cluster"

### NEW QUESTION # 45

```
[nutanix@nkp-boot ~]$ nkp get nodepools -c demo -n kommander-default-workspace
NODEPOOL DESIRED READY KUBERNETES VERSION
md-0      10      10      v1.29.9
md-1      1        1        v1.29.9

[nutanix@nkp-boot ~]$ kubectl get nodes --kubeconfig=demo.conf
NAME                                STATUS ROLES             AGE      VERSION
demo-md-0-gs6c5-n2kp5-24rgz        Ready <none>           127m    v1.29.9
demo-md-0-gs6c5-n2kp5-6cmwz        Ready <none>           22h     v1.29.9
demo-md-0-gs6c5-n2kp5-9hkgd        Ready <none>           127m    v1.29.9
demo-md-0-gs6c5-n2kp5-dgzlx        Ready <none>           127m    v1.29.9
demo-md-0-gs6c5-n2kp5-f45lw        Ready <none>           127m    v1.29.9
demo-md-0-gs6c5-n2kp5-nbbjj        Ready <none>           127m    v1.29.9
demo-md-0-gs6c5-n2kp5-r5sdb        Ready <none>           127m    v1.29.9
demo-md-0-gs6c5-n2kp5-rgczs        Ready <none>           22h     v1.29.9
demo-md-0-gs6c5-n2kp5-swtfd        Ready <none>           127m    v1.29.9
demo-md-0-gs6c5-n2kp5-znb72        Ready <none>           127m    v1.29.9
demo-md-1-hq2sz-mw4p6-fptcc        Ready <none>           6h15m   v1.29.9
demo-prt8d-qf5d4                    Ready control-plane    22h     v1.29.9
```

Looking at the nodepools for the Kubernetes cluster named demo, there is a node pool named md-1 with only one worker. This worker should be deleted along with the node pool md-1. How should this task be accomplished?

- A. Run `ncli vm.delete demo-md-1-hQ2sz-mw4p6-fptc`
- B. Run `acli vm.delete demo-md-1-hQ2sz-mw4p6-fptc`
- C. Run `nkp node scale nodepool md-1 --replicas=0 --cluster-name=demo`
- **D. Run `nkp delete nodepool md-1 --cluster-name=demo`**

**Answer: D**

#### NEW QUESTION # 46

A technology company has decided to migrate its infrastructure to NKP to improve the scalability and management of its applications. After a successful initial implementation, the operations team faces a new challenge of validating the HelmReleases to ensure that all applications are running correctly and avoid problems in production. Which command should the company execute to know the right status of their HelmReleases?

- A. `kubectl edit helmreleases -n ${PROJECT_NAMESPACE}`
- B. `kubectl get namespaces`
- C. `kubectl apply -f fluent-bit-overrides.yaml`
- **D. `kubectl get helmreleases -n ${PROJECT_NAMESPACE}`**

**Answer: D**

Explanation:

NKP uses Helm and Flux for application deployment, where applications are managed as HelmReleases, a custom resource that defines Helm chart deployments. The NKPA course explains that to validate the status of HelmReleases, administrators can use the `kubectl` command to query these resources. The correct command is `kubectl get helmreleases -n ${PROJECT_NAMESPACE}`, which lists all HelmReleases in the specified project namespace, showing their status (e.g., Ready, Failed) and other details like chart version and reconciliation status.

The Nutanix Cloud Native (NCP-CN) 6.10 Study Guide states: "To check the status of HelmReleases in NKP, use `kubectl get helmreleases -n <namespace>` to view the current state of application deployments managed by Flux." This command helps the operations team verify that applications are running correctly and identify any issues in production.

Incorrect Options:

- \* A. `kubectl get namespaces`: This lists namespaces, not HelmReleases or their status.
- \* C. `kubectl edit helmreleases -n ${PROJECT_NAMESPACE}`: This edits HelmRelease resources, not displays their status.
- \* D. `kubectl apply -f fluent-bit-overrides.yaml`: This applies a configuration for Fluent Bit, unrelated to HelmRelease status.

Nutanix Kubernetes Platform Administration (NKPA) Course, Section on Application Management.

### NEW QUESTION # 47

A development team decided to employ an efficient monitoring system with Grafana-logging, which was successfully implemented as can be seen in the following output:

AppDeployment "kommander-default-workspace/grafana-logging" created in namespace "kommander-default-workspace".  
Which command did the team execute to complete this task?

- A. `kubectl get helmreleases grafana-logging -n kommander-default-workspace -w`
- B. `export WORKSPACE_NAMESPACE=kommander-default-workspace; nkp create package-bundle grafana-logging`
- C. `kubectl get appdeployment -n kommander-default-workspace`
- D. `nkp create appdeployment grafana-logging --app grafana-logging-6.57.4 --workspace default-workspace`

**Answer: D**

### NEW QUESTION # 48

After loading the NKP bundles to a private registry in an air-gapped environment, a Platform Engineer now needs the Konvoy bootstrap image to create the bootstrap cluster. The Konvoy image has not been loaded into the registry. Which is the most viable command to load the Konvoy bootstrap image on the bastion host?

- A. `docker load -i konvoy-bootstrap-image-<version>.tar`
- B. `docker image tag konvoy-bootstrap-image-<version>.tar version docker.io/konvoy-bootstrap version`
- C. `nkp load image -f konvoy-bootstrap-image-<version>.tar --to-registry=<REGISTRY_URL>`
- D. `nkp push bundle --bundle konvoy-bootstrap-image-<version>.tar --to-registry=<REGISTRY_URL>`

**Answer: A**

### NEW QUESTION # 49

.....

When choosing a product, you will be entangled. After you have made a variety of comparisons, I believe you will choose our NCP-CN learning quiz. We are so confident in our NCP-CN study materials because they have their own uniqueness. If you want to have a deeper understanding of our products before making a choice, you can download a trial version of NCP-CN Preparation materials which is a small part of the real questions and answers.
