I dare to make a bet that you will not be exceptional. Your test pass rate is going to reach more than 99% if you are willing to use our C-S4CPB-2508 Study Materials with a high quality. So it is necessary for you to know well about our C-S4CPB-2508 test prep.

### SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q12-Q17):

#### NEW QUESTION # 12

Where are the manual test cases created for customer User Acceptance Testing?

- A. Test Automation Tool
- B. SAP Solution Manager
- C. SAP Signavio Process Navigator
- **D. SAP Cloud ALM**

**Answer: D**

Explanation:

Manual test cases for customer User Acceptance Testing are created in SAP Cloud ALM, a cloud-based application lifecycle management solution that supports SAP S/4HANA Cloud Public Edition implementations. SAP Cloud ALM provides test management apps that allow consultants to document and track all testing activities for both manual and automated test cases in one location. Manual test cases are created in the Test Preparation app based on the finalized solution scope (business processes) and assigned to test plans in the Test Plans app. SAP Cloud ALM also integrates with the SAP S/4HANA Cloud test system and third-party test providers to execute and monitor automated test cases. #### NEW QUESTION # 13

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Target customer go-live date
- **B. Known integration requirements**
- C. SAP Fiori application extensions
- **D. Business role requirements**

**Answer: B,D**

Explanation:

A completed Digital Discovery Assessment is a comprehensive evaluation conducted during the planning stages of an SAP S/4HANA Cloud Public Edition implementation. This assessment captures various critical aspects of the project to ensure a tailored and efficient approach. Two key elements captured in this assessment are 'Known integration requirements' and 'Business role requirements'. Understanding the integration requirements is essential for ensuring seamless connectivity and data flow between SAP S

/4HANA Cloud and other systems. Identifying business role requirements is crucial for aligning the system's capabilities with the specific needs and responsibilities of different user groups within the organization. Both elements are pivotal for designing a solution that is both integrated and user-centric.

#### NEW QUESTION # 14

In the Organizational Structure app in SAP Central Business Configuration, which of the following entities can be added under the Company root node? Note: There are 2 correct answers to this question.

- A. Purchasing Organization
- B. Division
- C. Sales Organization
- D. Plant

**Answer: A,C**

Explanation:

In the Organizational Structure app within SAP Central Business Configuration, the structure of an organization is defined by specifying various entities that reflect the business's operational and functional areas. Under the Company root node, entities such as Sales Organization and Purchasing Organization can be added:

\* Sales Organization: This entity is responsible for the distribution and sale of goods and services. It defines the scope of sales activities, including customer negotiations, sales orders, and distribution.

Adding a Sales Organization under the Company root node allows for the management and configuration of sales-related processes within SAP S/4HANA Cloud Public Edition.

\* Purchasing Organization: This entity manages procurement activities, including the negotiation of purchasing conditions, ordering, and the receipt of goods. By adding a Purchasing Organization under the Company root node, the system can handle procurement processes, vendor relationships, and purchasing analytics.

These entities are crucial for defining how the organization operates within the SAP S/4HANA Cloud Public Edition environment, facilitating the alignment of the software's functionality with the company's business processes.

#### NEW QUESTION # 15

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Communication arrangement
- B. Communication system
- C. Communication API
- D. Communication interface

**Answer: A,B**

#### NEW QUESTION # 16

What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?

Note: There are 2 correct answers to this question

- A. Configuration activities
- B. Scoping
- C. Group currency
- D. Fiscal year variant

**Answer: C,D**

Explanation:

Fiscal year variant and group currency are activities that are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration. These activities are part of the system provisioning step, which is the first step in the implementation process. Once the system provisioning is completed and confirmed, the system is locked for these activities and any changes would require a new system provisioning. Scoping and configuration activities, on the other hand, are not applied to the entire system and can be changed later on in the project experience step, which is the second step in the implementation process. Scoping and configuration activities allow the user to adapt the preconfiguration content to their company's needs and extend the
