What is the likely outcome at the end of a five-year term of a rate-reset preferred share if the issuer does not redeem the shares?

- A. The shareholder exchanges the rate-reset preferred share for a floating-rate preferred share
- B. The shareholder exchanges the rate-reset preferred share for an unsecured bond
- C. The shareholder exchanges the rate-reset preferred share for a specified number of common shares.

- * B. Exchange for a fixed-rate preferred share: The fixed-rate component is reset, not exchanged.
