UNIVERSITY EXAMINATION CENTRE, UAS, GKVK, BENGALURU-65  
No.UAS/UEC/2025-26/ Date:20.01.2026

## NOTE

Sub: Queries on answer keys of written examinations for selection of Service Personnel and Assistant Professor in different discipline & Technical Assistant (Assistant Professor) Posts for UAS, Raichur at UASB...reg.

Ref: Approval of the Registrar & Nodal Officer (Written Examinations), dt.20.01.2026.

Queries, if any, on the answer key's of written examinations for selection of Service Personnel and Assistant Professor in different discipline & Technical Assistant (Assistant Professor) Posts for UAS, Raichur at UASB conducted from 17.01.2026 to 20.01.2026 may be mailed only to [uasbexams@gmail.com](mailto:uasbexams@gmail.com) on or before 5.00 PM by 24.01.2026. The queries should be supported by valid justification and proof / source as per the following format:

Particulars	Details
Name of the candidate	
Roll No. of the candidate	
Subject and Post Code	
Version No.	
Question No. and Question	
Actual option in question paper	
Option claim	
Justification and proof/ source for option claim	

The queries received after the last date and time will not be considered. Queries received through any other means are invalid.

Do you often feel that the product you have brought is not suitable for you? I would like to tell you that you will never meet the problem when you decide to use our DS0-001 learning guide. Our DS0-001 study materials have a high quality that you can't expect. If you do experience by the guidance of our DS0-001 Study Materials, you will spend less time than you did before, you will obviously feel your progress, and you will find our DS0-001 test quiz are so useful to help you make progress.

If you want to check the quality and validity of our DS0-001 exam questions, then you can click on the free demos on the website. The free demo has three versions. We only send you the PDF version of the DS0-001 study questions. We have shown the rest two versions on our website. All in all, you will have a comprehensive understanding of various DS0-001 practice materials. Then after deliberate considerations, you can directly purchase the most suitable one for yourself.

## 100% Pass DS0-001 - Accurate Valid CompTIA DataSys+ Certification Exam Test Preparation

With the best quality and high accuracy, our DS0-001 vce braindumps are the best study materials for the certification exam among

the dumps vendors. Our experts constantly keep the pace of the current exam requirement for DS0-001 Actual Test to ensure the accuracy of our questions. The pass rate of our DS0-001 exam dumps almost reach to 98% because our questions and answers always updated according to the latest exam information.

## CompTIA DataSys+ Certification Exam Sample Questions (Q88-Q93):

### NEW QUESTION # 88

Which of the following sets the age requirement for data that should be recovered after a major disaster?

- A. RPO
- B. MTTF
- C. RTO
- D. MTBF

**Answer: A**

Explanation:

The option that sets the age requirement for data that should be recovered after a major disaster is RPO. RPO, or Recovery Point Objective, is a metric that defines the maximum amount of data that can be lost or acceptable data loss in the event of a disaster or disruption. RPO indicates how frequently the data should be backed up or replicated to minimize the risk of data loss. RPO also sets the age requirement for data that should be recovered after a major disaster, as it determines how far back in time the recovery process should go. For example, if the RPO is one hour, then the data should be backed up or replicated every hour, and the recovery process should restore the data to the state it was in one hour before the disaster. The other options are either different metrics or not related to data recovery at all. For example, MTBF, or Mean Time Between Failures, is a metric that measures the average time that a system or component operates without failure; RTO, or Recovery Time Objective, is a metric that defines the maximum amount of time that can be taken to restore a system or service after a disaster or disruption; MTTF, or Mean Time To Failure, is a metric that measures the average time that a system or component operates until it fails.

### NEW QUESTION # 89

A business analyst is using a client table and an invoice table to create a database view that shows clients who have not made purchases yet. Which of the following joins is most appropriate for the analyst to use to create this database view?

- A. RIGHT JOIN ON Client.Key = Invoice.Key WHERE BY Client.Key IS NOLL
- B. LEFT JOIN ON Client.Key = Invoice.Key
- C. INNER JOIN ON Client.Key = Invoice.Key
- D. LEFT JOIN ON Client.Key = Invoice.Key WHERE BY Invoice.Key IS NOLL

**Answer: D**

Explanation:

The join that is most appropriate for the analyst to use to create this database view is option D. This join uses the LEFT JOIN clause to combine the client table and the invoice table based on the matching values in the Key column. The WHERE clause filters out the rows where the Invoice.Key column is not null, meaning that the client has made a purchase. The result is a view that shows only the clients who have not made any purchases yet. The other options either do not produce the desired result or have syntax errors. For example, option A would show only the clients who have made purchases, option B would show only the invoices that do not have a matching client, and option C would show all the clients regardless of their purchase status. Reference: CompTIA DataSys+ Course Outline, Domain 1.0 Database Fundamentals, Objective 1.2 Given a scenario, execute database tasks using scripting and programming languages.

### NEW QUESTION # 90

Which of the following constraints is used to enforce referential integrity?

- A. Foreign key
- B. Surrogate key
- C. Unique key
- D. Primary key

**Answer: A**

Explanation:

The constraint that is used to enforce referential integrity is foreign key. A foreign key is a column or a set of columns in a table that references the primary key of another table. A primary key is a column or a set of columns in a table that uniquely identifies each row in the table. Referential integrity is a rule that ensures that the values in the foreign key column match the values in the primary key column of the reference table. Referential integrity helps maintain the consistency and accuracy of the data across related tables. The other options are either different types of constraints or not related to referential integrity at all. For example, a surrogate key is a column that is artificially generated to serve as a primary key, such as an auto-increment number or a GUID (Globally Unique Identifier); a unique key is a column or a set of columns in a table that uniquely identifies each row in the table, but it can have null values unlike a primary key; there is no such constraint as TID.

#### NEW QUESTION # 91

Which of the following should a company develop to ensure preparedness for a fire in a data center?

- A. Backup plan
- **B. Disaster recovery plan**
- C. Deployment plan
- D. Data retention policy

**Answer: B**

Explanation:

The document that a company should develop to ensure preparedness for a fire in a data center is a disaster recovery plan. A disaster recovery plan is a document that outlines how an organization will continue its operations in the event of a disaster or disruption, such as fire, flood, earthquake, cyberattack, etc. A disaster recovery plan typically includes the following elements: - The objectives and scope of the plan - The roles and responsibilities of the staff involved - The identification and assessment of the risks and impacts - The strategies and procedures for restoring the critical functions and data - The resources and tools required for the recovery process - The testing and maintenance schedule for the plan A disaster recovery plan helps an organization to minimize the damage and downtime caused by a disaster, as well as to resume normal operations as soon as possible. The other options are either different types of documents or not specific to fire preparedness. For example, a deployment plan is a document that describes how a system or software will be installed or launched; a backup plan is a document that specifies how data will be copied and stored for backup purposes; a data retention policy is a document that defines how long data should be kept and when it should be deleted or archived. Reference: CompTIA DataSys+ Course Outline, Domain 5.0 Business Continuity, Objective 5.4 Given a scenario, implement disaster recovery methods.

#### NEW QUESTION # 92

Over the weekend, a company's transaction database was moved to an upgraded server. All validations performed after the migration indicated that the database was functioning as expected. However, on Monday morning, multiple users reported that the corporate reporting application was not working.

Which of the following are the most likely causes? (Choose two.)

- A. The new database server has its own reporting system, so the old one is not needed.
- B. The reporting application cannot keep up with the new, faster response from the database.
- C. The reporting jobs that could not process during the database migration have locked the application.
- **D. The access permissions for the service account used by the reporting application were not changed.**
- **E. The reporting application's mapping to the database location was not updated.**
- F. The database server is not permitted to fulfill requests from a reporting application.

**Answer: D,E**

Explanation:

The most likely causes of the reporting application not working are that the access permissions for the service account used by the reporting application were not changed, and that the reporting application's mapping to the database location was not updated. These two factors could prevent the reporting application from accessing the new database server. The other options are either irrelevant or unlikely to cause the problem.

#### NEW QUESTION # 93

.....

At this moment, our company has been regarded as the best retailer of the DS0-001 study materials. We are responsible for every customer. Your satisfactions on our DS0-001 exam braindumps are our great motivation. In addition, all people have the right to enjoy our good pre-sale and after sale service on our DS0-001 training guide. We warmly welcome every customer to select our DS0-001 learning questions.
