So clients can use our AZ-800 Test Torrent immediately is the great merit of our AZ-800 exam questions. When you begin to use, you can enjoy the various functions and benefits of our AZ-800 practice guide such as it can simulate the exam and boosts the timing function.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q96-Q101):

NEW QUESTION # 96

Your network contains two Active Directory Domain Services (AD DS) forests as shown in the following exhibit.

The forests contain the domain controllers shown in the following table.

You perform the following actions on DO:

- * Create a user named User1.

- * Extend the schema with a new attribute named Attribute1

To which domain controllers are User1 and Attribute1 replicated? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation

NEW QUESTION # 97

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com.

You need to identify which server is the PDC emulator for the domain.

Solution: From Active Directory Sites and Services, you right-click Default-First-Site-Name in the console tree, and then select Properties.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

1. Open AD Users & Computers
2. Right-click the domain
3. Click Operations Masters
4. Choose PDC tab to view the server holding the PDC role

NEW QUESTION # 98

While creating a new container image on Windows Admin Center, which of the following options would you use to create a new container image using the IIS base image?

- A. IIS web application/Web Deploy (exported Zip file)
- B. Use an existing Dockerfile
- C. IIS web application/static web application folder
- D. IIS web application/Visual Studio solution (ASP.NET)

Answer: C

Explanation:

IIS web application/static web application folder option is used for creating a new container image utilizing the IIS base image. The content of the folder is copied to the container image to include it as a website. It adds no framework.

<https://docs.microsoft.com/en-us/virtualization/windowscontainers/wac-tooling/wac-images>

NEW QUESTION # 99

Your network contains an Active Directory Domain Services (AD DS) forest named contoso.com. The forest contains a child domain named east.contoso.com and the servers shown in the following table.

□ You need to create a folder for the Central Store to manage Group Policy template files for the entire forest.

What should you name the folder, and on which server should you create the folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 100

Your network contains an Active Directory Domain Services (AD DS) domain named adatum.com.

The domain contains a file server named Server1 and three users named User1, User2 and User3. Server1 contains a shared folder named Share1 that has the following configurations:

The share permissions for Share1 are configured as shown in the Share Permissions exhibit. (Click the Share Permissions tab.)

Share! contains a file named File.txt. The advanced security settings for File.txt are configured as shown in the File Permissions

exhibit. (Click the File Permissions tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 101
