We believe that business can last only if we fully consider it for our customers, so we will never do anything that will damage our reputation. Hope you can give our PL-900 exam questions full trust, we will not disappoint you.

Microsoft Power Platform Fundamentals Sample Questions (Q255-Q260):

NEW QUESTION # 255
A company is using Microsoft Power Platform services to enhance business productivity.
You need to identify the business productivity scenarios that Copilot can solve.
Which three benefits can Copilot provide? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Read an image of a business card and extract text values.
- B. Allow model-driven app users to ask questions about their data.
- C. Create canvas apps by describing what makers want to build.
- D. Trigger an automated Power Automate flow.
- E. Explain the functionality of an existing Power Automate flow.

Answer: A,B,C

Explanation:
A: Enhancing Chat Experiences with Power Virtual Agents and AI
The integration of Power Virtual Agents and Copilot empowers websites with intelligent chatbot capabilities. Power Virtual Agents can address user inquiries and provide generative answers powered by OpenAI's GPT. The bot is automatically configured to search across the website and summarize relevant knowledge-based articles. Additionally, the chatbot supports multi-turn conversations and context-based responses. Future enhancements will include document uploads, tone selection for responses, and content moderation controls.
B: Accelerating App Development with Copilot
Copilot's integration with Power Apps expedites app development processes. Users can import Excel files directly into Power Apps Studio, where Copilot processes the data and transfers it to a Dataverse environment. This enables scalable and centralized management of invoice data.
Copilot automatically determines column headings and data types, simplifying the app creation process. The resulting app is fully functional, allowing users to browse, search, create new records, and customize the app effortlessly.
E: Harnessing AI Builder for Document Analysis
AI Builder, a powerful tool within the Power Platform, offers forms processing capabilities for extracting data from documents like invoices. By integrating AI Builder with Copilot, users can extract approval justifications and automatically generate comprehensive emails. The extracted invoice details can be presented within the email, enabling seamless approval within Outlook.
Additionally, the AI-generated flow can enter the approved invoice data into Excel, further streamlining the process.

NEW QUESTION # 256
You are creating a model-driven Power Apps app. You want to ensure that the app can be used by individuals who have vision impairments.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
□

Answer:

Explanation:
Explanation:
Box 1: Yes

You can use keyboard shortcuts in PowerApps. Keyboard shortcuts give you an alternate way to do common tasks instead of using your mouse or tapping with your finger. They help in seamless navigation of the interface.
Box 2: No
The following software combinations are the supported recommendations for consuming PowerApps with a screen reader:
Windows: Microsoft Edge / Narrator
macOS: Safari / VoiceOver
Android: PowerApps app / Talkback
iOS: PowerApps app / VoiceOver
Box 3: Yes
Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the Accessibility checker in PowerApps Studio. This tool not only finds potential accessibility issues but also explains why each might be a potential problem for users who have a specific disability and offers suggestions on how to resolve each issue. The Accessibility checker detects screen-reader and keyboard issues for you, and you can find information about how to fix color-contrast issues by using accessible colors.

NEW QUESTION # 257
A company is evaluating the use of Microsoft Power Automate to eliminate manual, repetitive tasks.
You need to recommend the appropriate type of Power Automate flow for each scenario.
Which type of Power Automate flow should you recommend? To answer, move the appropriate Power Automate flow types to the correct scenarios. You may use each scenario once, more than once, or not at all.
You may need to move the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 258
An environmental agency creates tables named Specimen and Species in Microsoft Dataverse to record specimens that are collected on nature walks as well as their species. Some of the columns of the Specimen table are shown in the following image:
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 259
You create a canvas app by using the option labeled Start from data. You connect a spreadsheet that contains customer records.
The customer records are displayed in a list on a screen labeled Browse.
You need to modify a property of the control on the screen.
Which control should you modify?

- A. Display form
- B. Search
- C. Icon
- D. Gallery

Answer: D

Explanation:
A Gallery control allows you to show multiple records from a data source (in this case, customer records from the connected spreadsheet).

NEW QUESTION # 260
