CompTIA CLO-002 Exam consists of 75 multiple-choice questions that must be completed within 60 minutes. CLO-002 exam is available in English and Japanese, and candidates must score at least 720 out of 900 to pass. CLO-002 exam is vendor-neutral, which means that it covers cloud computing concepts that are applicable to any cloud service provider. CompTIA Cloud Essentials+ Certification Exam certification is an excellent way for professionals to demonstrate their understanding of cloud computing and differentiate themselves from their peers in the job market.

How to Prepare for CompTIA Cloud Essentials+ (CLO-002)

Preparation Guide for CompTIA Cloud Essentials+ (CLO-002)

Introduction for CompTIA Cloud Essentials+ (CLO-002)

CompTIA Cloud Essentials+ is for both IT and non-technical professionals who require the essential business acumen needed to make informed cloud service decisions. CompTIA Cloud Essentials+ is the only internationally recognized, vendor-neutral certification utilizing key business principles and fundamental cloud concepts that validate data-driven cloud recommendations. It stands alone in this field by demonstrating that all necessary staff members - not just the IT specialists - understand how to increase efficiency, manage costs, and reduce security risks for organizations whenever tasked with making current cloud technology decisions.

CompTIA Cloud Essentials+ validates the candidate has the knowledge and skills required to make clear and conscious decisions about cloud technologies and their business impact by evaluating business use cases, financial impacts, cloud technologies and deployment models with knowledge of cloud computing.

Business analysts and IT pros alike are consistently called upon to assist their organization in determining which cloud service

provider(s) to use, what to migrate to the cloud, and when to implement. Collecting and analyzing cloud products and services information is essential when making operational cloud business decisions.

Cloud Essentials+ is an entry-level, cloud certification offered by CompTIA. As with all CompTIA certifications, Cloud Essentials+ is a vendor-neutral credential that's relevant independent of which vendor or private cloud service is used. It's an excellent stepping-stone to vendor-specific cloud certs offered by AWS, Microsoft Azure, and GCP.

Unlike CompTIA's Cloud+ certification, which is designed for IT technical professionals, Cloud Essentials+ is targeted primarily toward non-technical personnel. The cert aims to validate individuals' understanding of cloud design principles, how to assess the applicability of cloud services, the implications of operating cloud services, and the related risk and compliance issues.

The financial and operational impacts covered by Cloud Essentials+ ensure an ability to develop and implement solid cloud strategies. CompTIA Cloud Essentials+ will show that successful candidates:

- Comprehend new technology concepts, solutions, and benefits to an organization
- Have the knowledge and understanding of the foundational business and technical components included in a cloud assessment
- Understand specific security concerns and measures

CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q60-Q65):

NEW QUESTION # 60

Which of the following are the appropriate responses to risks?

- A. Migrate, accept, avoid, validate
- B. Migrate, accept, avoid, transfer
- C. Mitigate, accept, avoid, transfer
- D. Mitigate, accept, avoid, validate

Answer: C

Explanation:

There are four common risk response types: avoid, share or transfer, mitigate, and accept. These are the appropriate responses to risks, depending on the risk type, assessment, and attitude. The other options are incorrect because they include terms that are not valid risk responses. For example, migrate is not a risk response, but a cloud deployment strategy. Validate is not a risk response, but a quality assurance technique.

NEW QUESTION # 61

A company's finance team is reporting increased cloud costs against the allocated cloud budget.

Which of the following is the BEST approach to match some of the cloud operating costs with the appropriate departments?

- A. Chargeback
- B. Showback
- C. Scaling
- D. Right-sizing

Answer: A

NEW QUESTION # 62

A cloud computing vendor is focusing on delivering applications to customers. The goal is to simplify the deployment of database functionality while removing the need for customers to manage the operating system and application patching. Which of the following types of solution is the vendor offering?

- A. Infrastructure as a Service
- B. Platform as a Service
- C. Anything as a Service
- **D. Software as a Service**
- E. IT as a Service

Answer: D

NEW QUESTION # 63

Which of the following is the risk when an IT department restricts itself to solely being an infrastructure provider?

- A. Service providers will bypass the IT department
- B. All of the above are correct
- **C. Business users will bypass the IT department**
- D. Cloud providers will take over the role of the IT department

Answer: C

NEW QUESTION # 64

A network administrator needs to manage a virtual switch remotely in a secure manner. Which of the following tools would MOST likely be used?

- A. Telnet
- B. RDP
- **C. SSH**
- D. SNMP

Answer: C

NEW QUESTION # 65

.....
