### EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q606-Q611):

#### NEW QUESTION # 606

Frank is a network technician working for a medium-sized law firm in Memphis. Frank and two other IT employees take care of all the technical needs for the firm. The firm's partners have asked that a secure wireless network be implemented in the office so employees can move about freely without being tied to a network cable. While Frank and his colleagues are familiar with wired Ethernet technologies, 802.3, they are not familiar with how to setup wireless in a business environment. What IEEE standard should Frank and the other IT employees follow to become familiar with wireless?

- A. The IEEE standard covering wireless is 802.9 and they should follow this.
- B. Frank and the other IT employees should follow the 802.1 standard.
- **C. They should follow the 802.11 standard**
- D. 802.7 covers wireless standards and should be followed

**Answer: C**

#### NEW QUESTION # 607

Physical access controls help organizations monitor, record, and control access to the information assets and facility. Identify the category of physical security controls which includes security labels and warning signs.

- A. Technical control
- **B. Physical control**
- C. Administrative control
- D. Environmental control

**Answer: B**

Explanation:

Physical controls are security measures that are designed to deny unauthorized access to facilities, equipment, and resources, and to protect personnel and property from damage or harm.

Security labels and warning signs fall under this category as they are part of the physical measures taken to alert individuals about security protocols and to deter unauthorized access.

These controls are a critical aspect of an organization's overall security strategy, ensuring that sensitive information and assets are physically secured against unauthorized access or alterations.

#### NEW QUESTION # 608

-----is a group of broadband wireless communications standards for Metropolitan Area Networks (MANs)

- A. 802.15.4
- B. 802.15
- **C. 802.16**
- D. 802.12

**Answer: C**

Explanation:

The IEEE 802.16 is a series of wireless broadband standards, also known as WirelessMAN, that are designed for Metropolitan Area Networks (MANs). It specifies the air interface, including the medium access control layer (MAC) and physical layer (PHY),

of combined fixed and mobile point-to-multipoint broadband wireless access systems. This standard supports rapid deployment of broadband wireless access systems and encourages competition by providing alternatives to wireline broadband access.

#### NEW QUESTION # 609

Which of the following things need to be identified during attack surface visualization?

- A. Assets, topologies, and policies of the organization
- B. Authentication, authorization, and auditing in networks
- C. Attacker's tools, techniques, and procedures
- D. Regulatory frameworks, standards and, procedures for organizations

Answer: C

#### NEW QUESTION # 610

Which of the following steps will NOT make a server fault tolerant? Each correct answer represents a complete solution. Choose two.

- A. Implementing cluster servers facility
- B. Adding one more same sized disk as mirror on the server
- C. Encrypting confidential data stored on the server
- D. Adding a second power supply unit
- E. Performing regular backup of the server

Answer: C,E

#### NEW QUESTION # 611
