

# The latest UiPath certification UiPath-TAEPv1 exam practice questions and answers

---

## UiPath Certification Exam Questions and Correct

### Answers (2024 / 2025) (Verified Answers)

1. In UiPath Robotic Enterprise Framework, the value of MaxRetryNumber in the Cofig.xlsx file should be set to a number greater than 0 to enable the retry mechanism in the following cases:: Get Data from UiPath Orchestrator with Auto Retry disabled
2. When should an Attended Robot be used?: When the processing of some input data relies on human decision
3. You need to collect employee data and send it by email as an Excel file. What type of workflow is the most suitable for the final part, which adds the file attachment, formats the email and sends it?: Sequence
4. Which statement about the UiPath Robotic Enterprise Framework template is false?: The framework can be used only if you get the input data from the UiPath server queues

There are UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) exam questions provided in UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) PDF questions format which can be viewed on smartphones, laptops, and tablets. So, you can easily study and prepare for your UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) exam anywhere and anytime. You can also take a printout of these UiPath PDF Questions for off-screen study. To improve the UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) exam questions, DumpsFree always upgrades and updates its UiPath-TAEPv1 dumps PDF format and it also makes changes according to the syllabus of the UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) exam.

Our DumpsFree devote themselves for years to develop the UiPath-TAEPv1 exam software to help more people who want to have a better development in IT field to pass UiPath-TAEPv1 exam. Although there are so many exam materials about UiPath-TAEPv1 exam, the UiPath-TAEPv1 exam software developed by our DumpsFree professionals is the most reliable software. Practice has proved that almost all those who have used the software we provide have successfully passed the UiPath-TAEPv1 Exam. Many of them just use spare time preparing for UiPath-TAEPv1 UiPath exam, and they are surprised to pass the certificated exam.

# Latest Updated UiPath-TAEPv1 Latest Learning Material & Leader in Qualification Exams & Free PDF UiPath UiPath Test Automation Engineer Professional v1.0

DumpsFree is a legal authorized company offering the best UiPath UiPath-TAEPv1 test preparation materials. So for some candidates who are not confident for real tests or who have no enough to time to prepare I advise you that purchasing valid and Latest UiPath-TAEPv1 Test Preparation materials will make you half the efforts double the results. Our products help thousands of people pass exams and can help you half the work with double the results.

## UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Environments, Applications, and</li> <li>• or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing</li> <li>• exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• UiPath Robot: This section of the exam measures the skills of RPA Developers and explains the role of testing robots and their connectivity with UiPath Orchestrator. It discusses the execution of test cases using both on-premises and cloud-based robots and highlights how different robot types support automation testing in a scalable environment.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Testing Process: This section of the exam measures the skills of Test Automation Engineers and focuses on applying best practices in test case design and execution. It outlines the importance of structured application testing in UiPath and emphasizes quality assurance through automation.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.</li> </ul>

Topic 9	<ul style="list-style-type: none"><li>• UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.</li></ul>

## UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q82-Q87):

### NEW QUESTION # 82

Given a Verify activity that has the ContinueOnFailure property set to False, what will the outcome be if the verification performed fails?

- A. Test case execution is stopped and the applications used are closed gracefully.
- B. Test case execution is stopped and any subsequent verification is failed.
- C. Test case execution is stopped and an exception is thrown.
- D. Test case execution continues and any subsequent verification is skipped.

**Answer: C**

Explanation:

If a Verify activity has ContinueOnFailure set to False and the verification fails, the test case execution stops immediately and an exception is thrown. This ensures that failures are treated as critical and halt further execution.

### NEW QUESTION # 83

What color code in the status tab represents a test without a definitive results or that have not been executed yet but is a part of a test set that is currently being executed?

- A. Green
- B. Red
- C. Grey
- D. Black

**Answer: C**

Explanation:

In UiPath Test Manager, the Grey color code in the status tab represents a test case that has not yet been executed or does not have a definitive result, but is part of a test set that is currently being executed.

### NEW QUESTION # 84

What is Descriptor Coverage panel used for in UiPath Studio?

- A. The Descriptor Coverage panel is only used when there are failed selectors, it has no use during successful test case runs.
- B. The Descriptor Coverage panel is used for inputting UI elements for object recognition, that are required to be covered during the execution process.
- C. The Descriptor Coverage panel is used to store the selectors and Object Repository UI elements that will be needed for different test cases.
- D. The Descriptor Coverage panel is used to view UI elements that have been covered during execution and to analyze selector coverage or debug workflows with failed coverage.

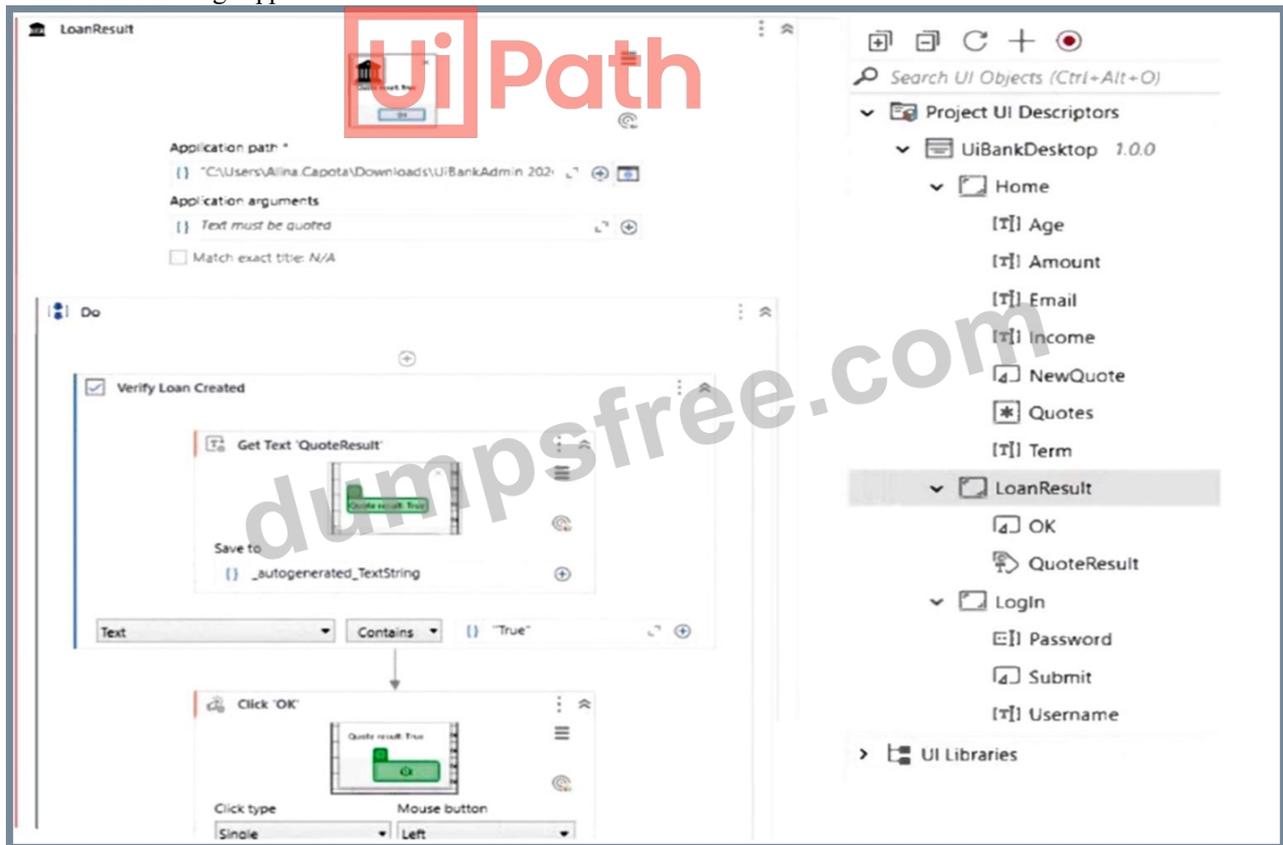

**Answer: D**

Explanation:

The Descriptor Coverage panel in UiPath Studio is used to view UI elements covered during test execution and to analyze selector coverage, helping identify elements that were or were not interacted with. It's also useful for debugging workflows where coverage may be incomplete or missing.

### NEW QUESTION # 85

Consider the following snippet:

What should be improved to ensure the Test Case will not fail with exception?

- A. Click 'OK' should be removed.
- B. The ObjectRepository should be changed so all the elements fall into Home screen.
- C. The ApplicationPath should be provided dynamically.
- D. In the Verification point ' \_autogenerated\_ TextString' should be removed.

**Answer: C**

Explanation:

The ApplicationPath in the "Launch Application" activity is hardcoded, which can lead to failures if the file path changes or differs across environments. To avoid exceptions and improve flexibility, the ApplicationPath should be provided dynamically (e.g., through a project argument or configuration file).

### NEW QUESTION # 86

How can activity coverage scenarios for different automation needs be created in UiPath?

- A. Create separate test cases to cover each scenario during the execution.
- B. Alter the workflow to ensure a single test case covers all scenarios.
- C. Create one comprehensive test case that covers all scenarios in one execution.
- D. Use the same test case, but execute it in different workflows.

**Answer: A**

Explanation:

To ensure thorough activity coverage in UiPath, it's best to create separate test cases for each automation scenario. This allows targeted validation, improves clarity in test results, and ensures that all logic branches are adequately tested.
