Newest JN0-105 Learning Materials: Junos, Associate (JNCIA-Junos) Deliver Splendid Exam Braindumps

Itcerttest also offers a demo version of the Juniper JN0-105 exam dumps for free. This way you can easily evaluate the validity of the JN0-105 prep material before buying it. Downloading a free demo will remove your doubts about purchasing the Juniper JN0-105 Questions.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which prompt indicates that you are using configuration mode?

- A. %
- B. #
- C. \$
- D. >

Answer: B

Explanation:

In Junos OS, the # prompt indicates that you are in configuration mode. This mode is used for making changes to the configuration of the device.

Reference: Juniper Networks CLI Modes

"The # prompt indicates that you are in configuration mode."

NEW QUESTION # 44

When considering routing policies, which two statements are correct? (Choose two.)

- A. An import routing policy for BGP determines which received prefix advertisements are placed in the routing information base.
- B. Policy terms are evaluated from top to bottom with the most restrictive action taken of all the matching terms.
- C. Policy terms are evaluated from top to bottom with action taken on the first match found.
- D. Routing policies are applied to interfaces as input or export filters.

Answer: A,C

Explanation:

Routing policies in Junos OS are crucial for controlling route advertisements and path selection. The correct answers are B and C. An import routing policy for BGP determines which received prefix advertisements are placed in the routing information base (RIB), and policy terms are evaluated from top to bottom, with action taken on the first match found. This sequential evaluation allows for precise control over routing decisions.

NEW QUESTION # 45

Click the Exhibit button.

Referring to the exhibit, what should be configured on R1 to advertise a default static route into OSPF?

- A. a management interface
- B. a loopback interface
- C. a routing policy
- D. a firewall filter

Answer: C

Explanation:

To advertise a default static route into OSPF on router R1, a routing policy should be configured. This policy would typically include a statement to match the default route (0.0.0.0/0) and then apply an action to set the route as an OSPF external type, which would then be redistributed into the OSPF domain. The routing policy is a set of conditions and actions that determine how routes are imported into or exported from the routing table and how routes are shared between routing instances or routing protocols. After defining the policy, it must be applied to OSPF under the export section of the OSPF configuration on R1. This process will allow R1 to announce the default route to other OSPF routers in the network, which then can use it as a gateway of last resort to reach the Internet or other networks not explicitly known to the OSPF domain.

NEW QUESTION # 46

Which type of device uses the destination IP address to forward packets?

- A. hub
- B. repeater
- C. Layer 3 router
- D. Layer 2 switch

Answer: C

Explanation:

A Layer 3 router uses the destination IP address to forward packets. The correct answer is A. Routers operate at Layer 3 of the OSI model and make forwarding decisions based on IP addresses. They are responsible for routing packets across different networks by examining the destination IP address contained in the packet's header.

NEW QUESTION # 47

What are two methods for navigating to configuration mode from an operational mode prompt? (Choose two.)

- A. Use the quit command.
- B. Use the exit command.
- C. Use the configure command.
- D. Use the edit command.

Answer: C,D

Explanation:

In Junos OS, to navigate from operational mode to configuration mode, you can use either the `editorconfigure` command. Both commands move the CLI from operational mode, where you can view the state of the device, to configuration mode, where you can make changes to the device's configuration.

NEW QUESTION # 48

.....

You can use this Juniper simulation software without an internet connection after installation. Tracking and reporting features of our Junos, Associate (JNCIA-Junos) JN0-105 Practice Exam software makes it easier for you to identify and overcome mistakes. Customization feature of this format allows you to change time limits and questions numbers of mock exams.
