Free PDF 2026 Fortinet FCP_FGT_AD-7.6: Unparalleled FCP - FortiGate 7.6 Administrator Reliable Study Plan

Generally speaking, Fortinet certification has become one of the most authoritative voices speaking to us today. Let us make our life easier by learning to choose the proper FCP_FGT_AD-7.6 test answers, pass the FCP_FGT_AD-7.6 exam, obtain the certification, and be the master of your own life, not its slave. Our FCP_FGT_AD-7.6 Exam Questions are exactly what you are looking for. With three different versions of FCP_FGT_AD-7.6 exam study materials are shown on our website, so you will be glad to know you have so many different ways to study.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.

Topic 2	<ul style="list-style-type: none"> Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 3	<ul style="list-style-type: none"> Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.
Topic 4	<ul style="list-style-type: none"> Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Topic 5	<ul style="list-style-type: none"> VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

Refer to the exhibit. As an administrator you have created an IPS profile, but it is not performing as expected. While testing you got the output as shown in the exhibit.

What could be the possible reason of the diagnose output shown in the exhibit?

```
HQ-NGFW-1 # diagnose test application ipsmonitor 1
pid = 2044, engine count = 0 (+1)
0 - pid:2074:2074 cfg:1 master:0 run:1
```

- A. Administrator entered the command diagnose test application ipsmonitor 99.
- B. There is a no firewall policy configured with an IPS security profile.**
- C. Administrator entered the command diagnose test application ipsmonitor 5.
- D. FortiGate entered into IPS fail open state.

Answer: B

Explanation:

The output shows the IPS engine count as 0, indicating no active IPS engines are running. This typically means no firewall policy is referencing the IPS security profile, so the IPS profile is not being applied or triggered.

NEW QUESTION # 13

When FortiGate performs SSL/SSH full inspection, you can decide how it should react when it detects an invalid certificate.

Which three actions are valid actions that FortiGate can perform when it detects an invalid certificate?

(Choose three.)

- A. Block**
- B. Block & Warning
- C. Allow & Warning

- D. Trust & Allow
- E. Allow

Answer: A,D,E

NEW QUESTION # 14
Refer to the exhibit.

FortiGate web filter profile configuration

The screenshot shows the 'Edit Web Filter Profile' configuration page for a profile named 'Corporate'. The 'Feature set' is 'Flow-based'. The 'FortiGuard Category Based Filter' section is active, showing a table of categories and their actions. The categories are grouped into 'Bandwidth Consuming' and 'Security Risk'. The 'Action' column shows 'Allow' for most categories and 'Block' for 'Malicious Websites'. A '35%' progress indicator is visible at the bottom right.

Name	Action
Bandwidth Consuming (6)	
Freeware and Software Downloads	Allow
File Sharing and Storage	Allow
Streaming Media and Download	Allow
Peer-to-peer File Sharing	Allow
Internet Radio and TV	Allow
Internet Telephony	Allow
Security Risk (6)	
Malicious Websites	Block

The exhibit shows the FortiGuard Category Based Filter section of a corporate web filter profile. An administrator must block access to download.com, which belongs to the Freeware and Software Downloads category. The administrator must also allow other websites in the same category. What are two solutions for satisfying the requirement? (Choose two.)

- A. Configure a separate firewall policy with action Deny and an FQDN address object for *.download.com as destination address.
- B. Set the Freeware and Software Downloads category Action to Warning.
- C. Configure a static URL filter entry for download.com with Type and Action set to Wildcard and Block, respectively.
- D. Configure a web override rating for download.com and select Malicious Websites as the subcategory.

Answer: A,C

Explanation:

Creating a static URL filter to block download.com specifically allows blocking that site without affecting the entire category. Using a separate firewall policy with a Deny action for an FQDN address object matching download.com can also block the site while allowing others in the same category.

NEW QUESTION # 15

Refer to the exhibit. An administrator has configured an Application Overrides for the ABC.Com application signature and set the Action to Allow. This application control profile is then applied to a firewall policy that is scanning all outbound traffic. Logging is enabled in the firewall policy. To test the configuration, the administrator accessed the ABC.Com web site several times.

Application and Filter Overrides

Priority	Details	Type	Action
1	ABC.Com	Application	Allow
2	Excessive-Bandwidth	Filter	Block

Why are there no logs generated under security logs for ABC.Com?

- A. The ABC.Com is hitting the category Excessive-Bandwidth.
- B. The ABC.Com Type is set as Application instead of Filter.
- C. The ABC.Com Action is set to Allow.
- D. The ABC.Com is configured under application profile, which must be configured as a web filter profile.

Answer: C

Explanation:

When the action is set to Allow in an application override, traffic matching this override is allowed without generating security logs because it bypasses deeper inspection and blocking.

NEW QUESTION # 16

What are two features of FortiGate FSSO agentless polling mode? (Choose two.)

- A. FortiGate uses the SMB protocol to read the event viewer logs from the DCs.
- B. FortiGate does not support workstation check.
- C. FortiGate uses the AD server as the collector agent.
- D. FortiGate directs the collector agent to use a remote LDAP server.

Answer: A,C

Explanation:

FortiGate uses the SMB protocol to read the event viewer logs from the DCs → In agentless polling mode, FortiGate connects directly to the AD domain controllers using SMB to collect logon events.

FortiGate uses the AD server as the collector agent → There is no external FSSO collector; instead, the FortiGate itself polls the AD servers, effectively treating them as the source of logon information.

NEW QUESTION # 17

.....

When preparing to take the FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) exam dumps, knowing where to start can be a little frustrating, but with Fortinet FCP_FGT_AD-7.6 practice questions, you will feel fully prepared. Using our Fortinet FCP_FGT_AD-7.6 practice test Real4dumps, you can prepare for the increased difficulty on FCP_FGT_AD-7.6 Exam day. Plus, we have various question types and difficulty levels so that you can tailor your Fortinet FCP_FGT_AD-7.6 exam dumps preparation to your requirements.
