

2V0-16.25 Fragen Beantworten - 2V0-16.25 Zertifizierungsantworten

Wenn Sie die VMware 2V0-16.25 Zertifizierungsprüfung bestehen, können Sie bestimmt größere Errungenschaften im Berufsleben erzielen. Wenn Sie ZertPruefung wählen, können wir Ihnen sicherlich Freude wegen des Bestehens der VMware 2V0-16.25 Zertifizierungsprüfung mitbringen. Kaufen Sie Prüfungsfragen und Antworten von ZertPruefung, können wir Ihnen garantieren, dass Sie die VMware 2V0-16.25 Zertifizierungsprüfung 100% bestehen können. Zugleich werden Sie auch einjährige Aktualisierung kostenlos genießen.

VMware 2V0-16.25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Thema 2	VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.
Thema 3	Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Thema 4	IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.

Thema 5	• Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

2V0-16.25 Zertifizierungsantworten, 2V0-16.25 Fragenkatalog

Wenn Sie die Schulungsunterlagen zur VMware 2V0-16.25 Zertifizierungsprüfung von ZertPruefung haben, geben wir Ihnen einen einjährigen kostenlosen Update-Service. Das heißt, Sie können immer neue Zertifizierungsmaterialien bekommen. Sobald das Prüfungsziel und unsere Lernmaterialien geändert werden, benachrichtigen wir Ihnen in der ersten Zeit. Wir kennen Ihre Bedürfnisse. Wir haben das Selbstbewusstsein, Ihnen zu helfen, die VMware 2V0-16.25 Zertifizierungsprüfung zu bestehen. Sie können sich unbesorgt auf die VMware 2V0-16.25 Prüfung vorbereiten und das Zertifikat erfolgreich bekommen.

VMware vSphere Foundation 9.0 Administrator 2V0-16.25 Prüfungsfragen mit Lösungen (Q53-Q58):

53. Frage

An administrator is following the concept of least privilege and must configure permissions in a vSphere environment granting members of the group corp\VM-Managers the following abilities:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

Which out-of-the-box role satisfies these access control requirements?

- A. Virtual Machine User
- **B. Virtual Machine Power User**
- C. Virtual Machine Console User
- D. Administrator

Antwort: B

Begründung:

The requirement is to follow least privilege while granting specific VM operations:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

The Virtual Machine Power User role is the correct out-of-the-box role, as it includes all these privileges without granting unnecessary administrative access.

Other roles:

- * Administrator (A): Grants full environment control # too broad.
- * Virtual Machine Console User (B): Limited to console access, cannot power on/off or snapshot.
- * Virtual Machine User (C): Can interact with VMs but lacks snapshot privileges.

VMware vSphere 9.0 Documentation - Default Roles and Permissions

VMware KB 1033138 - Privileges for VM Roles

54. Frage

An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.

After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Operations
- B. VCF Fleet Management
- C. VCF Automation
- **D. vSphere Client**

Antwort: D

Begründung:

To deploy the VCF Operations for Logs OVA appliance:

- * The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.
- * After deployment, the appliance can be configured and integrated with VCF.

Other options:

- * A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.
- * C. VCF Automation# Provides automation workflows, not appliance deployment.
- * D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.

References:

VMware Cloud Foundation 9.0 -Deploying VCF Operations for Logs Appliance VMware Docs: Deploy OVF/OVA Templates Using vSphere Client

55. Frage

What are the two methods to add a widget to a VMware Cloud Foundation (VCF) Operations for Logs dashboard? (Choose two.)

- **A. Create the widget in Explore Logs and click Add to Dashboard.**
- B. Clone the widget from an existing dashboard.
- C. Import the widget in the dashboard design pane.
- D. Open Management Pack Builder and clone the widget.
- **E. Drag and drop the widget in the dashboard design pane.**

Antwort: A,E

Begründung:

Two supported methods exist for adding widgets to VCF Operations for Logs dashboards:

- * From Explore Logs- Create a widget (e.g., query result) and select Add to Dashboard. (B)
- * Dashboard Design Pane- Use the design interface to drag and drop widgets. (C)
- Other options:
 - * A. Clone widget from existing dashboard# Not a supported method.
 - * D. Import widget in design pane# Import is for dashboards, not individual widgets.
 - * E. Management Pack Builder# Not related to Logs dashboard widgets.

56. Frage

An administrator is tasked to implement a new iSCSI storage for a new cluster.

The following information was provided to the administrator:

- * iSCSI storage controller IPs are all in the same subnet.
- * Multipathing should be used.
- * Storage supports Asymmetric Logical Unit Access (ALUA).
- * Should be configured for high performance.

Which are the four required steps to configure this on an ESX host? (Choose four.)

- **A. Set Path Selection Policy (PSP) to Round Robin (RR).**
- **B. Configure 1 vSwitch with 2 Uplinks.**
- C. Configure 2 vSwitch with 1 Uplink.
- D. Set Path Selection Policy (PSP) to Most Recently Used (MRU).
- **E. Add iSCSI software adapter.**

- F. Add NVMe over TCP software adapter.
- **G. Configure two bound VMkernel ports.**
- H. Configure two unbound VMkernel ports.

Antwort: A,B,E,G

Begründung:

For iSCSI multipathing with ALUA and high performance in ESXi:

- * 1 vSwitch with 2 Uplinks# Standard design for redundancy and multipathing. (B)
- * Add iSCSI software adapter# Required to connect to storage. (E)
- * Configure two bound VMkernel ports# Ensures multipathing (one per uplink). (G)
- * Set PSP to Round Robin (RR)# Optimizes I/O balancing across multiple paths. (F) Other options:
- * A. 2 vSwitches with 1 Uplink each# Not recommended, complicates multipathing.
- * C. NVMe over TCP# Not relevant, storage is iSCSI.
- * D. MRU policy# Legacy, not high performance.
- * H. Unbound VMkernel ports# Used for software iSCSI port binding, but "bound" VMkernel ports are required for multipathing.

57. Frage

Which VMware Cloud Foundation (VCF) Operations capability enables monitoring and optimization of a VMware vSphere Foundation (VVF) environment?

- A. Infrastructure Visibility
- B. Log Insight Integration
- C. Intelligent Alerts
- **D. Capacity Analytics**

Antwort: D

Begründung:

The capability in VMware Cloud Foundation (VCF) Operations that directly enables monitoring and optimization of a VMware vSphere Foundation (VVF) environment is Capacity Analytics.

- * Capacity Analytics provides real-time and predictive insights into resource utilization, capacity forecasting, and optimization.
- * It analyzes historical and real-time utilization data to predict future workload demands, enabling administrators to proactively plan expansions or right-size workloads.
- * This includes what-if scenario modeling, workload optimization, and resource reclamation to ensure workloads are efficiently placed, avoiding bottlenecks and waste.

Why not the other options?

- * A. Intelligent Alerts# Provides proactive alerts and recommendations but is more focused on issue detection and notification, not optimization.
- * C. Log Insight Integration# Enables log analysis and troubleshooting, not capacity optimization.
- * D. Infrastructure Visibility# Provides monitoring and observability but does not perform predictive optimization.
