

1z0-1093-25 Reliable Practice Materials | New 1z0-1093-25 Exam Questions

Hazards & Defects Rectification

BONUS!!! Download part of TorrentValid 1z0-1093-25 dumps for free: <https://drive.google.com/open?id=1Kbo2Jmgh5BKlhahZm3BOxdP0CcGScqnv>

As far as the price of Oracle 1z0-1093-25 exam practice test questions is concerned, these exam practice test questions are being offered at a discounted price. Get benefits from 1z0-1093-25 Exam Questions at discounted prices and download them quickly. Best of luck in 1z0-1093-25 exam and career!!!

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle’s high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 2	<ul style="list-style-type: none"> Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle’s Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

Topic 3	<ul style="list-style-type: none"> Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Topic 4	<ul style="list-style-type: none"> NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 5	<ul style="list-style-type: none"> Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.

2026 1z0-1093-25 Reliable Practice Materials Free PDF | Professional New 1z0-1093-25 Exam Questions: Oracle Cloud Database Services 2025 Professional

We provide free update to the client and the discounts to the old client. We provide free update of our 1z0-1093-25 exam materials within one year and after one year the client can enjoy the 50% discounts. The old clients enjoy some certain discounts when they buy our 1z0-1093-25 exam torrent. Our experts check whether there is the update of the test bank every day and if there is the system will send to the client automatically. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important 1z0-1093-25 Exam Torrent in the shortest time and finally pass the exam successfully.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q42-Q47):

NEW QUESTION # 42

When migrating to MySQL HeatWave on Oracle Cloud Infrastructure (OCI), what is the recommended method for securely transferring large database backups?

- A. Use of Data Pump with a database link.
- B. Creating a secure VPN connection and transferring the backup files using scp.
- C. Transferring the backup files directly over the public internet using FTP.
- D. Using the Oracle Cloud Infrastructure Data Transfer Service with physical storage appliances.
- E. Shipping physical hard drives containing the backup files to the OCI data center.

Answer: D

Explanation:

Secure Transfer with OCI Data Transfer Service:

The OCI Data Transfer Service is designed to securely transfer large datasets, including database backups, to the cloud. It involves:

- * Using physical storage appliances to copy data locally and then shipping these devices to OCI data centers.
- * Data is encrypted and securely transported, minimizing the risks associated with online transfers.
- * This method is cost-effective and practical for terabytes or petabytes of data, avoiding bandwidth limitations and reducing transfer time.

Why the other options are incorrect:

- * A: FTP over the public internet is insecure and slow.
- * B: Physical hard drives without encryption and secure handling increase data breach risks.
- * D: SCP over VPN is secure but impractical for extremely large datasets.

* E:Data Pump is useful for database-to-database transfers, not large file migrations.

NEW QUESTION # 43

When deploying Exadata Database Service, what is the PRIMARY benefit of using the "Cloud Tooling" deployment option versus manually configuring an on-premises Exadata system?

- A. "Cloud Tooling" offers significantly more granular control over the underlying hardware configuration.
- B. "Cloud Tooling" completely eliminates the need for any database administrator intervention.
- C. "Cloud Tooling" allows using older versions of Oracle Database that are no longer supported on- premises.
- **D. "Cloud Tooling" automates the provisioning, patching, and lifecycle management of the Exadata infrastructure.**

Answer: D

Explanation:

B: Automation of provisioning and management:

* Cloud Tooling automates key tasks such as provisioning, patching, scaling, and maintenance.

* Reduces manual configuration errors and saves time.

* Ensures consistency in setup and updates, minimizing downtime.

* Greatly simplifies lifecycle management, making cloud deployments more efficient than on-premises.

Why the other options are incorrect:

* A. More granular hardware control:Cloud tooling abstracts low-level hardware management.

* C. No DBA intervention:While reduced, DBAs still handle application-specific configurations and performance tuning.

* D. Using older database versions:Exadata Cloud Service supports only supported versions, not deprecated ones.

NEW QUESTION # 44

What is the primary purpose of the AutoML feature within MySQL HeatWave?

- A. To automatically generate data visualization to present database insights.
- B. To automatically tune the MySQL server parameters for optimal transactional performance.
- C. To automatically generate SQL queries based on natural language input.
- **D. To automate the process of building, training, and deploying machine learning models directly within the database.**
- E. To automatically back up and restore the MySQL database to Oracle Cloud Infrastructure Object Storage.

Answer: D

Explanation:

AutoML in MySQL HeatWave:

The AutoML feature in MySQL HeatWave integrates machine learning capabilities directly within the database, allowing users to:

* Build, train, and deploy models without moving data to external systems.

* Automate the entire ML pipeline, including data preprocessing, model selection, and hyperparameter tuning.

* This makes it easier for data engineers and analysts to perform predictive analytics without requiring data science expertise.

Why the other options are incorrect:

* A:AutoML does not focus on server tuning; it focuses on machine learning.

* C:Generating SQL queries from natural language is not within AutoML's scope.

* D:AutoML is unrelated to database backup.

* E:Visualization is not the primary function; it focuses on model building.

NEW QUESTION # 45

Which two are valid storage options you must select when provisioning Exadata Database Service using the Oracle Cloud Infrastructure (OCI) Console?

- A. The number of CPUs required for the Exadata Database Service Instance.
- B. The database name and version.
- **C. Data disk group encryption using Oracle Cloud Infrastructure Vault.**
- D. Data disk group compression and deduplication algorithm.
- **E. The size of the DATA disk group and RECO disk group.**

Answer: C,E

Explanation:

A: Data disk group encryption using OCI Vault provides enhanced security for sensitive data by encrypting data stored within the Exadata storage cells.

B: During provisioning, the size of the DATA and RECO disk groups must be specified. The DATA disk group is used for primary database files, while the RECO disk group is used for recovery-related files.

Why the other options are incorrect:

* C: CPU count is part of the compute configuration, not storage.

* D: Compression and deduplication settings are managed at the database level, not during storage configuration.

* E: Database name and version are part of the database configuration, not storage settings.

NEW QUESTION # 46

What is the MOST appropriate method for patching an Exadata Database Service infrastructure, including both database and storage servers, to maintain the latest security updates and bug fixes?

- A. Relying on the default OS auto-update features to handle all necessary patching.
- B. Only patching the database nodes and ignoring the storage servers unless a specific issue arises.
- C. Manually downloading and applying patches to each individual component.
- **D. Utilizing the automated patching capabilities provided by the Oracle Cloud Infrastructure (OCI) console or API.**

Answer: D

Explanation:

B: Automated Patching via OCI Console/API:

* Oracle Cloud Infrastructure offers automated patching tools specifically designed for Exadata Database Service.

* These tools coordinate patching across database and storage servers, ensuring consistency.

* Features include rolling patching to minimize downtime.

* Automation significantly reduces human error and ensures that both database and storage servers are patched efficiently.

Why the other options are incorrect:

* A. Manual patching: Prone to errors and time-consuming, especially for complex Exadata environments.

* C. Default OS auto-update: Insufficient for comprehensive patching of Exadata components.

* D. Ignoring storage servers: Unsafe and could lead to security vulnerabilities.

NEW QUESTION # 47

.....

For candidates who are going to attend the exam, the pass rate may be an important consideration while choose the 1z0-1093-25 exam materials. With pass rate more than 98.75%, we can ensure you pass the exam successfully if you choose us. 1z0-1093-25 exam torrent will make your efforts pay off. We also pass guarantee and money back guarantee if you fail to pass the exam, and your money will be returned to your payment count. In addition, 1z0-1093-25 Study Materials provide you with free update for 365 days, and the update version will be sent to your email automatically.
