AP-219受験資格: Salesforce Order Management Administrator Accredited Professional試験に合格するのを助けるAP-219最新知識

Salesforce AP-219試験のAPPテストエンジンは、ほとんどの認定候補者がファッションであり、この新しい学習方法に簡単に適応できるため、少なくとも60%の受験者に人気があります。AP-219試験のAPPテストエンジンは、いつでもどこでも使用できると考える人がいます。また、候補者の一部は、このバージョンでは実際のテストで実際のシーンをシミュレートできると考えています。ブラウザを開くことができれば、学ぶことができます。また、オフラインで学習したい場合は、AP-219試験のAPPテストエンジンをダウンロードしてインストールした後、キャッシュをクリアしないでください。

Salesforce AP-219 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Advanced Topics: Troubleshooting configuration issues, diagnosing system integration problems, and resolving deployment obstacles.

トピック 2	<ul style="list-style-type: none"> • Deployment and Debugging: Deployment options, lifecycle management, building processes with pre-configured data, and understanding supporting objects and system runtime.
トピック 3	<ul style="list-style-type: none"> • Process Automation and Integrations: Configuring end-to-end Order Management processes and external system integrations using declarative tools and clicks-based configuration.
トピック 4	<ul style="list-style-type: none"> • Order Management Basics: Foundation of Order Management within Salesforce ecosystem, platform architecture, integration capabilities with third-party systems, and native Salesforce functionality.
トピック 5	<ul style="list-style-type: none"> • Data Model: Core objects (Order, Order Summary, Fulfillment Orders, Return Orders), B2C Commerce integrations, and tracing data flow including custom attributes.

Salesforce Order Management Administrator Accredited Professional 認定 AP-219 試験問題 (Q32-Q37):

質問 # 32

What type of relationship exists between FulfillmentOrder and Order Delivery Method?

- A. Junction (Many to Many)
- B. Master-Detail (Order Delivery Method)
- **C. Lookup (Order Delivery Method)**
- D. One-to-One Lookup (Location) FulfillmentFrom LocationId

正解: C

解説:

The type of relationship that exists between FulfillmentOrder and Order Delivery Method is Lookup (OrderDelivery Method). A Lookup field is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. In this case, a FulfillmentOrder has a Lookup field named Order Delivery Method that references an Order Delivery Method record. An Order Delivery Method is a record that represents a delivery option for fulfilling orders, such as standard shipping, express shipping, in-store pickup, etc. An Order Delivery Method can have many FulfillmentOrders associated with it, but a FulfillmentOrder can only have one Order Delivery Method. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.custom_field_types.htm&type=5https://help.salesforce.com/s/articleView?id=sf.order_management_order_delivery_method.htm&type=5

質問 # 33

A company's service team should not see Process Exceptions on any Order Summaries. How can an administrator meet these requirements?

- A. Add a filter to the Process Exception component on the Order Summary lightning record page to hide the component for the service team's Profile
- **B. Create a copy of the Order Summary lightning record page for the service team and remove the Process Exceptions component. Activate the lightning record page by profile for all Service team profiles.**
- C. Modify the service team profiles to remove access to the lightning component and all associated Apex classes
- D. Modify the Order Summary page layout to remove visibility to the Process Exception component for Service team profiles

正解: B

質問 # 34

An admin is analyzing project requirements and notes that there are requirements to support both high volume and multiple locations. What is the recommended approach for this scenario?

- **A. Download the Single Location High Volume sample flow and the Multiple Locations sample flow from the Partner Community and make a blend between the two considering trade-offs**
- B. Download the Single Location High Volume sample flow from the Partner Community and have the developers add Apex code to enhance performance

- C. Download the Single Location High Volume sample flow from the Partner Community and modify all the flows to loop through locations
- D. Download the Multiple Locations sample flow from the Partner Community and have developers add Apex code to enhance performance

正解: A

解説:

The Single Location High Volume sample flow and the Multiple Locations sample flow are two examples of how to implement order fulfillment with Order Management. The Single Location High Volume sample flow is optimized for performance and scalability, but it only supports one fulfillment location per order. The Multiple Locations sample flow supports multiple fulfillment locations per order, but it has lower performance and scalability. To support both high volume and multiple locations, an admin can download both sample flows from the Partner Community and make a blend between them, considering trade-offs such as complexity, maintainability, and customizability. Reference: Order Fulfillment Flows, Partner Community

質問 # 35

Universal Containers (UC) has a flow which performs some custom logic in order to determine a least-cost shipping location. Some of the variables should be reset at the beginning of each loop iteration. Which design element in Flow allows the Admin to do this?

- A. Preset
- B. Assignment
- C. Reassignment
- D. Reset

正解: B

解説:

The design element in Flow that allows the admin to reset some variables at the beginning of each loop iteration is Assignment. An Assignment element lets the admin assign new values to one or more variables or sObject fields in a flow. The admin can use an Assignment element before a Loop element to initialize the variables that are used in the loop, and then use another Assignment element inside the loop to reset the variables for each iteration. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_assignment.htm&type=5

質問 # 36

An administrator is tasked to utilize a Product Price Book which is managed on an external platform. How can the administrator meet this requirement?

- A. This is not possible, all Products require a Pricebook Entry
- B. Go to Setup, Order settings, and select Enable Optional Price Books for Orders
- C. Create an External Data Source in Setup which references the external platform where the Pricebook is held
- D. Edit the Product page layout to make the Pricebook field not require

正解: B
