

Get Trustable Mule-Con-201 Exam Preview and Best Accurate Mule-Con-201 Download Pdf

Mule-Dev-201

The image displays the MuleSoft Studio interface for a Mule-Dev-201 exam. It features a flow diagram at the top and an XML code editor below it. The flow diagram shows a 'Scheduler' component connected to a 'Batch:Step:With Filter' component, which is then connected to a 'Batch:Aggregate:2' component. The XML code defines the flow with a scheduler, a batch step with a filter, and a batch aggregator. The filter criteria is 'payload mod 2 == 0', and the aggregator has a size of 2. The output is a JSON object with the payload.

```
<flow name="test" >
  <scheduler doc:name="Scheduler" > <scheduling-strategy>
    <fixed-frequency frequency="1000"/> </scheduling-strategy> </scheduler>
  <set-payload value="#{[1,2,3,4,5,6]}" doc:name="1,2,3,4,5,6" />
  <batch:job jobName="processRecordsBatchJob" >
    <batch:process-records >
      <batch:step name="Batch_Step_With_Filter" acceptExpressions="#{payload mod 2 == 0}" >
        <set-transform doc:name="Multiply by 20" > <var:message>
          <set-payload value="#{[DATA]New 2,0" />
          <output application/json>
            <payload * 10 /> </set-payload>
          </set-transform>
        </batch:step>
      </batch:process-records>
    </batch:job>
  </flow>
```

Option A : [10, 20, 30, 40, 50, 60]
Option B : [10, 20] [30, 40] [50, 60]
Option C : [20, 40, 60]
Option D : [20, 40] [60]

Correct Answer: D

Explanation/Reference:

- * Batch scope has filter criteria which says payload mod 2 == 0 which means only 2, 4 and 6 will be in batch scope.
- * So payload for each of these will be incremented by 10.
- * Aggregator has batch size defined as 2. So it will process in batch of two records.
- * Hence option D is correct answer.

[20,40]
[60]
