Helping our candidates to pass the SAFe-Practitioner exam and achieve their dream has always been our common ideal. We believe that your satisfactory is the drive force for our company.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q65-Q70):

NEW QUESTION # 65

The whole team needs to be involved in co-creation of the Definition of Done.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 66

How long is typically PI Planning?

- A. 2 days
- B. 10 hours
- C. 4 hours
- D. 1 day

Answer: A

NEW QUESTION # 67

An Agile Team has which two characteristics? (Choose two.)

- A. A group of dedicated individuals that work in phase-gate steps to complete their PI Objectives
- B. A stand-alone unit of individuals who do not require input from other teams to complete their tasks
- C. A group of dedicated individuals who are empowered, self-organizing, self-managing, and deliver value
- D. A large group of individuals who all work together to create value for the client
- E. A small group of typically 5 - 11 dedicated individuals who have the skills necessary to define, build, test, and deploy increments of value

Answer: C,E

Explanation:

According to the SAFe framework, an Agile Team is a cross-functional group of typically ten or fewer individuals with all the skills necessary to define, build, test, and deliver value to their customer. Agile Teams are self-organizing and self-managing and are accountable for delivering results that meet the needs and expectations of their customers and stakeholders. Agile Teams collaborate with other teams to deliver ART solutions. They contribute to the Vision and Roadmap, and participate in ART events. Agile Teams are not stand-alone units, nor are they large or phase-gated. They are agile, lean, and customer-centric. References: Agile Teams - Scaled Agile Framework

NEW QUESTION # 68

Why is it important to decouple deployment from release?

- A. To remove the need to respond quickly to production issues
- B. To make deploying of assets a business decision
- C. To enable releasing functionality on demand to meet business needs
- D. To allow early access to specific groups of customers

Answer: C

Explanation:

= Decoupling deployment from release means having the ability to deploy changes to a system without having to make a new release of the system. This can be a valuable capability when making changes to a system that is in production and needs to be rolled back quickly if there are problems. It also allows releasing functionality on demand to meet business needs, which is one of the aspects of the Continuous Delivery Pipeline in SAFe. By decoupling deployment from release, enterprises can achieve faster feedback, higher frequency, and greater safety in delivering value to customers. References: = Release on Demand, DevOps:

Why Is It Important to Decouple Deployment From Release?, Why Is It Important to Decouple Deployment from Release?, What a Lovely Decouple: Why Decoupling Deploy from Release Is a Game Changer

NEW QUESTION # 69

Which statement describes a cadence-based PI Planning event?

- A. It is very important and should be postponed until all participants can attend
- B. It is an all-hands, two-day event with the goal to create alignment
- C. It is not a required event but tasks move forward at higher velocity when the meeting occurs
- D. As many team members as possible should attend remotely to reduce travel costs

Answer: B

Explanation:

A cadence-based PI Planning event is a face-to-face event that serves as the heartbeat of the Agile Release Train (ART), aligning all the teams on the ART to a shared mission and vision. It is essential to SAFe and should not be skipped or delayed. It is an opportunity for all team members and stakeholders to communicate, collaborate, and coordinate their work for the next Program Increment (PI), which is typically 8-12 weeks long. The PI Planning event has a standard agenda that includes a presentation of business context and vision, followed by team planning breakouts, where the teams create their Iteration plans and objectives for the upcoming PI. The event also includes a management review and problem-solving session, where the teams identify and resolve dependencies, risks, and impediments. The event concludes with a confidence vote and a final plan review, where the teams present their PI objectives and receive feedback from the business owners.

The PI Planning event is a key enabler of alignment, transparency, and collaboration across the ART. References: PI Planning, Planning Interval, PI Planning vs Sprint Planning: What Is the Ultimate Goal of the PI Planning Event?

NEW QUESTION # 70

.....
