ISACA COBIT 2019 Foundation Sample Questions (Q116-Q121):

NEW QUESTION # 116

Which of the following is a KEY principle associated with the Accountable (A) role of an organizational structure?

- A. Accountability must be approved by the board.
- **B. Accountability cannot be shared.**
- C. Accountability can be delegated.

Answer: B

Explanation:

A key principle associated with the Accountable (A) role of an organizational structure is that accountability cannot be shared. This means that only one person can be accountable for each activity or decision, and that person is ultimately liable for the success and achievement of the assigned tasks, p. 34. References: 2:

COBIT 2019 Framework: Introduction and Methodology

NEW QUESTION # 117

Innovation and differentiation are examples of:

- A. enterprise strategy design factors.
- **B. enterprise objectives design factors.**
- C. enterprise goal risk factors.

Answer: B

NEW QUESTION # 118

An enterprise's business line managers have voiced concerns because the cost of governance-required improvements is perceived as too expensive. How can the IT governance team BEST address this concern?

- A. Involve business line managers in the improvement planning process.
- B. Improve the communication of business benefits.
- **C. Share the return on investment (ROI) analysis.**

Answer: C

NEW QUESTION # 119

Which of the following is the FINAL action before completing the design of an IT governance system?

- **A. Selecting an implementation method**
- B. Determining a sourcing model
- C. Resolving inherent priority conflicts

Answer: A

Explanation:

Explanation

Selecting an implementation method is the final action before completing the design of an IT governance system. An IT governance system is a set of components that provide direction, oversight, evaluation, monitoring, assurance, etc., for an enterprise's information and technology. The design of an IT governance system involves several steps or actions that help to customize and tailor the system to the specific needs and context of the enterprise. These steps or actions include defining design factors, defining focus areas, defining current state, defining target state, identifying gaps and improvement opportunities, defining roadmap and priorities, etc. Selecting an implementation method is the final action before completing the design of an IT governance system because it helps to determine how the system will be put into practice, what resources and activities are needed, what challenges and risks are expected, etc.12 References: COBIT 2019 Framework:

Introduction and Methodology, COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution

NEW QUESTION # 120

Which of the following MUST be defined before determining alignment goals?

- A. External laws and regulations
- B. Governance and management objectives
- **C. Stakeholder drivers and needs**

Answer: C

Explanation:

Explanation

Stakeholder drivers and needs must be defined before determining alignment goals. Stakeholder drivers and needs are the requirements or expectations of the internal or external stakeholders of the enterprise, such as customers, employees, shareholders, regulators, etc. Alignment goals are the intermediate goals that link the enterprise goals with the governance and management objectives. Alignment goals are derived from the stakeholder drivers and needs, and they reflect how information and technology can support the enterprise strategy and objectives. Therefore, stakeholder drivers and needs must be defined before alignment goals can be determined.12 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Governance System

NEW QUESTION # 121

.....
