To which object do you assign the replenishment method?

- A. Storage type
- B. Document category
- C. Warehouse process type
- D. Document type

Answer: A

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Replenishment in SAP EWM moves stock from reserve to picking areas. Option A ("Storage type") is correct because the replenishment method (e.g., automatic, planned) is assigned to a storage type in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Replenishment > Define Replenishment Control per Storage Type. This determines how replenishment is triggered for that area. Options B, C, and D (document-related or process type) are not directly linked to replenishment method assignment.
