### ASIS Physical Security Professional Exam Sample Questions (Q146-Q151):

#### NEW QUESTION # 146

Successful implementation of any physical security construction project hinges largely on a well-defined and executed:

- **A. Procurement contract**
- B. Business impact analysis
- C. Cost analysis
- D. Request for quotation

**Answer: A**

Explanation:

A clearly defined and executed procurement contract is critical to successful implementation of a physical security construction project. It outlines scope, deliverables, timelines, cost structures, and responsibilities, ensuring all parties operate with aligned expectations and accountability.

A (RFQ) is a pricing request, not a contract.

B (BIA) informs continuity planning, not project execution.

D (Cost analysis) is useful but not foundational for execution.

#### NEW QUESTION # 147

Insurance carriers provide coverage on the basis that the estimated value of loss is always greater than the total of the premiums paid.

- **A. False**
- B. True

**Answer: A**

Explanation:

Insurance companies provide coverage based on actuarial calculations that allow them to remain profitable.

The total amount of premiums collected across all policyholders must exceed the total claims paid. Therefore, the estimated value of all losses across a pool of insured clients is generally less than or balanced with the total premiums collected, ensuring profitability and sustainability for the insurer.

#### NEW QUESTION # 148

What is defines as using the identity information of another person to commit fraud or engage in other unlawful activities?

- **A. Identity theft**
- B. Identity fraud
- C. Identity Distortion
- D. Identity dissemination

**Answer: A**

#### NEW QUESTION # 149

A controlled area where an even greater degree of security is required is called:

- A. Pass system area
- B. External area
- C. Multiple areas
- **D. Limited area**

**Answer: D**

Explanation:

A limited area is a controlled zone within a facility where a higher level of security is required than in general access areas. These are typically used to protect sensitive operations or assets. Access is restricted to authorized individuals who require entry for specific operational duties.

Pass system area (B) refers to the access control method, not the area classification.

Multiple areas (C) and External area (D) are not specific security designations.

### NEW QUESTION # 150

JPEG, MPEG, Wavelet, and H-263 are all forms of video

- **A. compression.**
- B. transmission.
- C. signals.
- D. storage.

**Answer: A**

Explanation:

JPEG, MPEG, Wavelet, and H-263 are all video compression standards or techniques used to reduce the size of digital video files while maintaining acceptable quality. Compression is essential in organizational environments because it allows efficient storage, faster transmission, and easier management of video data, especially in security systems such as surveillance and monitoring. From a Human Resource and operational management perspective, efficient video compression supports better use of technological resources, reduces storage costs, and ensures that security personnel can quickly access and review footage when needed. These formats do not represent storage devices, transmission methods alone, or signal types; instead, they define how video data is encoded and compressed. Therefore, option B is correct because all listed technologies are forms of video compression.
