Scrum PSM-I (Professional Scrum Master I) Exam is a globally recognized certification that validates the knowledge and skills of professionals in the field of Scrum methodology. PSM-I exam is designed to test the understanding of the Scrum framework, roles, events, artifacts, and the principles behind them. It is a challenging and rigorous exam that requires a deep understanding of the Scrum framework and its application in real-world scenarios.

Scrum Professional Scrum Master I Sample Questions (Q33-Q38):

NEW QUESTION # 33

A new developer is having continuing conflicts with existing Development Team members and creating the hostile environment. If necessary, who is responsible for removing the team member?

- A. The Development Team is responsible, and may need help from the Scrum Master.
- B. The Scrum Manager is responsible, because he/she removes Impediments.
- C. The hiring manager is responsible, because he/she hired the developer.

- D. The Product Owner is responsible, because he/she controls the return on investment (ROI).

Answer: A

Explanation:

The correct answer is C, because if necessary, the Development Team is responsible for removing a team member who is creating a hostile environment. The Scrum Guide states that "development Teams are self-organizing. No one (not even the Scrum Master) tells the Development Team how to turn Product Backlog into Increments of potentially releasable functionality." Therefore, the Development Team should manage its own composition and dynamics, and may need help from the Scrum Master to facilitate this process.

NEW QUESTION # 34

Every Development Team should have:

- A. At least one representative from each major software engineering discipline (like QA, Dev, UX).
- B. One Lead Developer and no more than 8 other members.
- C. **The competencies and skills needed to deliver a Done Increment in a Sprint.**

Answer: C

NEW QUESTION # 35

Which two ways of creating Development Teams are consistent with Scrum's values? (Choose two.)

- A. **Bring all the developers together and let them self-organize into Development Teams.**
- B. **Existing teams propose how they would like to go about organizing into the new structure.**
- C. Managers personally re-assign current subordinates to new teams.
- D. Managers collaborate to assign individuals to specific teams.
- E. The Chief Product Owner determines the new team structures and assignments.

Answer: A,B

Explanation:

The correct answers are A and D, because these ways of creating Development Teams are consistent with Scrum's values. Allowing existing teams to propose how they would like to organize into the new structure respects their self-organization and empowerment. Bringing all the developers together and letting them self-organize into Development Teams also respects their autonomy and collaboration.

NEW QUESTION # 36

How do you know that a Development Team is cross-functional?

- A. **Development Team has all the skills to create a potentially releasable increment by the end of every Sprint.**
- B. Every member of the Development Team is able to perform every task.
- C. There are no conflicts within the Development Team.
- D. A few of the Development Team members pair program and do Test Driven Development.

Answer: A

NEW QUESTION # 37

Which statement best describes the Sprint Backlog as outcome of the Sprint Planning?

- A. Each task is estimated in hours.
- B. It is the Development Team's plan for the Sprint.
- C. Every item has a designated owner.
- D. It is ordered by the Product Owner.
- E. **It is a complete list of all work to be done in a Sprint.**

Answer: E
