## **APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q44-Q49):**

### **NEW QUESTION # 44**

To whom does the scope of the Terms and conditions of employment control apply?

- A. Contractors only
- B. All employees, contractors and third-party users
- C. Employees only
- D. Personnel and the organization

### **Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

### **NEW QUESTION # 45**

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- A. ISO 9001
- B. None of the above
- C. ISO/IEC 27003
- D. ISO/IEC 27013

### **Answer: D**

Explanation:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach.

While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

### **NEW QUESTION # 46**

What activity is done first when preparing for an initial certification audit?

- A. Provide documents to the Certification Body auditor for the Stage 1 audit
- B. Provide evidence that nonconformities from an internal audit have been actioned
- C. Provide records to the Certification Body auditor for the Stage 2 audit
- D. Agree the scope of the ISMS with the Certification Body auditor

### **Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:

Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body. ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage

2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.

Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

#### NEW QUESTION # 47

Which trend in information security performance is required to be considered during a management review of the ISMS?

- A. Validity of information continuity controls
- B. Achievement of information security objectives
- C. Decisions related to continual improvement opportunities
- D. Relevant external and internal requirements changes

#### Answer: B

Explanation:

Clause 9.3.2 (Management Review Inputs) states that management reviews shall include:

"c) information on the information security performance, including trends in: (1) nonconformities and corrective actions; (2) monitoring and measurement results; (3) audit results; and (4) fulfilment of information security objectives." This makes achievement of information security objectives (option A) a required trend to be considered.

While external/internal requirements (C) and continual improvement opportunities (D) are also part of management review inputs, they are not specifically listed under "trends in performance." Option B is outside the direct requirement.

Thus, the verified answer is A.

#### NEW QUESTION # 48

Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Producing a risk assessment report
- B. Ensuring information security objectives are established
- C. Implementing the actions from internal audits
- D. Communicating feedback from interested parties to the organization

#### Answer: B

Explanation:

Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:

\* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"

\* "ensuring the integration of the ISMS requirements into the organization's processes;"

\* "ensuring that the resources needed for the ISMS are available;"

Among the options, the one explicitly mandated is ensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required in Clause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer is B.

#### NEW QUESTION # 49

.....

Research indicates that the success of our highly-praised ISO-IEC-27001-Foundation test questions owes to our endless efforts for the easily operated practice system. With the latest ISO-IEC-27001-Foundation test questions, you can have a good experience in practicing the test.
