We don't just want to make profitable deals, but also to help our users pass the NCP-CI-Azure exams with the least amount of time to get a certificate. Choosing our NCP-CI-Azure exam practice, you only need to spend 20-30 hours to prepare for the exam. Maybe you will ask whether such a short time can finish all the content, we want to tell you that you can rest assured, because our NCP-CI-Azure Learning Materials are closely related to the exam outline.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.
Topic 2	<ul style="list-style-type: none">Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.

Topic 3	<ul style="list-style-type: none"> • Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 4	<ul style="list-style-type: none"> • Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.

Latest Nutanix NCP-CI-Azure Exam Camp, NCP-CI-Azure Valid Exam Registration

Our company, with a history of ten years, has been committed to making efforts on developing NCP-CI-Azure exam guides in this field. Since the establishment, we have won wonderful feedback from customers and ceaseless business and continuously worked on developing our NCP-CI-Azure exam prepare to make it more received by the public. Moreover, our understanding of the importance of information technology has reached a new level. Efforts have been made in our experts to help our candidates successfully Pass NCP-CI-Azure Exam. Seldom dose the e-market have an authorized study materials for reference.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q78-Q83):

NEW QUESTION # 78

Which console must be used to deploy a Nutanix cluster on Azure?

- A. Azure Console
- B. Prism Central Console
- C. Prism Element Console
- **D. NC2 Console**

Answer: D

NEW QUESTION # 79

An administrator has noticed the company's NC2 free trial expired 60 days ago.

What should the administrator do to continue using all of the NC2 features on existing clusters?

- A. Contact Nutanix support to redeploy the cluster.
- B. Nothing. The clusters will have full feature support.
- **C. Switch to a paid subscription plan.**
- D. Contact the cloud vendor.

Answer: C

Explanation:

* Free Trial Expiration: Once the NC2 free trial period expires, the administrator needs to switch to a paid subscription plan to continue using all the features and functionalities provided by Nutanix NC2.

* Paid Subscription Benefits: Transitioning to a paid subscription ensures uninterrupted access to NC2 features, support, and updates, maintaining the operational capabilities of the existing clusters.

References:

* Nutanix Subscription and Billing Documentation

* Nutanix NC2 Support and Subscription Guide

NEW QUESTION # 80

Which two options are prerequisites for deploying an NC2 cloud cluster in Azure? (Choose two.)

- A. An on Premises Prism Central environment
- B. A valid CIDR range
- C. A my.nutanix.com account
- D. An Azure Express Route circuit

Answer: B,C

Explanation:

* Valid CIDR Range: When deploying an NC2 cloud cluster in Azure, a valid CIDR range is necessary to define the IP address space for the cluster and its associated networks. This range ensures that there are no conflicts with existing network configurations and provides sufficient addresses for the cluster resources.

* My Nutanix Account: A my.nutanix.com account is required to access Nutanix services and manage NC2 deployments. This account allows administrators to log in, configure settings, and manage their Nutanix environment on Azure.

References:

* Nutanix NC2 on Azure Deployment Guide

* Azure Virtual Network Documentation

NEW QUESTION # 81

An administrator has been asked to create a cluster to support new workloads.

What are the maximum number of nodes supported in an NC2 on Azure environment?

- A. 28 nodes
- B. 18 nodes
- C. 14 nodes
- D. 24 nodes

Answer: B

NEW QUESTION # 82

After creating a new Nutanix User VPC, what is needed to allow traffic to flow out of the Flow gateway VM when using the NATed Path?

- A. Add a default route on the Transit VPC of 0.0.0.0/0 to the Flow Gateway.
- B. Edit the Internal Flow Gateway Security Group on the internal NIC to allow outbound traffic
- C. Add a default route on the Transit VPC of 0.0.0.0/0 to the Flow Gateway.
- D. Add a default route on the Nutanix User VPC of 0.0.0.0/0 to the External Overlay network.
- E. Edit the External Flow Gateway Security Group on the External NIC to allow outbound traffic.

Answer: D

Explanation:

* NATed Path Configuration: When using the NATed Path, it is essential to ensure that traffic can flow out of the Flow gateway VM to external networks.

* Default Route: Adding a default route on the Nutanix User VPC ensures that all outbound traffic is directed to the appropriate network gateway.

* Configuration Steps:

* Navigate to the routing settings of the Nutanix User VPC.

* Add a default route with the destination of 0.0.0.0/0, pointing to the External Overlay network.

* Security Group Settings:

* Ensure that the External Flow Gateway Security Group on the External NIC allows outbound traffic.

* Ensure that the Internal Flow Gateway Security Group on the internal NIC allows outbound traffic (if needed for internal network flows).

* Conclusion: Properly configuring the default route on the Nutanix User VPC enables outbound traffic flow via the NATed Path through the External Overlay network.
