

# MB-820 높은 통과율 인기 덤프 문제 - MB-820 퍼펙트 공부 자료

## MB-230 시험용시 & MB-230 시험대비 덤프 최신문제

Itcertkr는 다른 회사들이 이루지 못한 Itcertkr만의 매우 특별한 이점을 가지고 있습니다. Itcertkr의 Microsoft MB-230 덤프는 전문적인 엔지니어들의 Microsoft MB-230 시험을 분석 이후에 선택이 된 문제들이고 적지않게 매우 가치 있는 질문과 답변들로 되어있는 학습 가이드입니다. 고객들은 단지 Itcertkr에서 제공해드리는 Microsoft MB-230 덤프의 질문과 답변들을 이해하고 마스터하면 첫 시험에서 고득점으로 합격할 것입니다.

### 최신 Microsoft Dynamics 365 MB-230 무료 샘플문제 (Q205-Q210):

#### 질문 # 205

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company provides clients with Dynamics 365 for Customer Service Voice of the Customer employee satisfaction surveys. The company has a standardized set of survey questions named Satisfaction Survey.

You need to customize the survey for each client.

Solution: Create custom question types. Add the custom question types to a new survey. Customize the questions.

Does the solution meet the goal?

- A. No
- B. Yes

정답: A

#### 질문 # 206

You are using Dynamics 365 for Customer Service.

You need to create the entitlements for your customers.

What should you do?

- A. Create an entity for each channel and configure the relationship with the entitlement.
- B. Configure entitlement channels.
- C. Configure routing rules.
- D. Create queues for each channel.

정답: B

#### 질문 # 207

You make a phone call regarding an existing case record.

You need to create a phone call activity that appears on the case record timeline.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

2026 Itexamdump 최신 MB-820 PDF 버전 시험 문제집과 MB-820 시험 문제 및 답변 무료 공유:  
<https://drive.google.com/open?id=1-IXnBIRF7jUzDYE6GYYQkc6KKpbDoNI7>

Itexamdump을 선택함으로 100%인증시험을 패스하실 수 있습니다. 우리는 Microsoft MB-820 시험의 갱신에 따라 최신의 덤프를 제공할 것입니다. Itexamdump에서는 무료로 24시간 온라인상답이 있으며, Itexamdump의 덤프로 Microsoft MB-820 시험을 패스하지 못한다면 우리는 덤프 전액 환불을 약속 드립니다.

## Microsoft MB-820 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>• Describe Business Central: Describing the components and capabilities of Business Central, and describing the core solution and extensions approach for Business Central are focal points of this topic. It also explains the difference between Business Central Online and Business Central on-premises features.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>• Work with development tools: Implementing semi-automated test processes and managing and assessing telemetry are its sub-topics.</li> </ul>

- Integrate Business Central with other applications: Accessing Representational State Transfer (REST) services is discussed in this topic. It also explains implementation of APIs.

## Microsoft MB-820 퍼펙트 공부자료 - MB-820 퍼펙트 덤프데모

거침없이 발전해나가는 IT업계에서 자신만의 자리를 중요하지 않고 단단히 지킬려면 Microsoft 인증 MB-820 시험은 무조건 패스해야 합니다. 하지만 Microsoft 인증 MB-820 시험 패스는 하늘에 별따기 만큼 어렵습니다. 시험이 영어로 출제되어 공부자료 마련도 좀 힘든 편입니다. 여러분들의 고민을 덜어드리기 위해 Itexamdump에서는 Microsoft 인증 MB-820 시험의 영어버전 실제문제를 연구하여 실제 시험에 대비한 영어버전 Microsoft 인증 MB-820 덤프를 출시하였습니다. 전문적인 시험대비자료 이기에 다른 공부자료는 필요없이 Itexamdump에서 제공해드리는 Microsoft 인증 MB-820 영어버전 덤프만 공부하시면 자격증을 딸 수 있습니다.

### 최신 Microsoft Dynamics 365 MB-820 무료 샘플문제 (Q49-Q54):

#### 질문 # 49

A developer creates a profile for part-time shop supervisors and adds customizations.

You plan to add new requirements to the profile.

You need to analyze the code to understand the profile and make sure there are no errors.

```

01 profile "Part Time Shop Supervisors"
02 {
03     Description = 'This profile is for Part time Shop Supervisors';
04     Caption = 'Part Time Shop Supervisor';
05     RoleCenter = "Shop Supervisor Role Center";
06     Enabled = true;
07     Promoted = true;
08     Customizations = Customization1;
09 }
10 pagecustomization Customization1 customizes "Item List"
11 {
12     layout
13     {
14         modify("Profit %")
15         {
16             visible = false;
17         }
18         moveafter("Unit Cost"; "Costing Method")
19     }
20 }

```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = "No" User Setup.	<input type="radio"/>	<input type="radio"/>
Variables, procedures, and triggers cannot be added on page customization objects.	<input type="radio"/>	<input type="radio"/>
Line 10 should use <code>extends</code> instead of <code>customizes</code> .	<input type="radio"/>	<input type="radio"/>
In line 18, "Unit Cost" will be moved after "Costing Method".	<input type="radio"/>	<input type="radio"/>

정답:

설명:

Explanation:

The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup: No Variables, procedures, and triggers cannot be added on page customization objects: Yes Line 10 should use extends instead of customizes: No In line 18, "Unit Cost" will be moved after "Costing Method": Yes The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup.

\* No

\* The code doesn't contain any reference to the User Setup table or the Register Time field, so this is not correct. Profiles are not applied conditionally based on fields like this.

Variables, procedures, and triggers cannot be added on page customization objects.

\* Yes

\* Page customization objects are meant for UI modifications, such as moving or hiding fields. You cannot add variables, procedures, or triggers in a page customization object.

Line 10 should use extends instead of customizes.

\* No

\* In AL, when customizing a page within a profile, you use customizes rather than extends. Extends is used when modifying base application objects, but customizes is used to customize pages within a profile.

In line 18, "Unit Cost" will be moved after "Costing Method".

\* Yes

\* The code in line 18 is correct. The moveafter directive will move the "Unit Cost" field after the "Costing Method" field on the page layout.

#### 질문 # 50

You create a 'Contoso Post' procedure to send an http POST request in JSON format. You publish the procedure to your environment.

You write the following procedure code:

```

01 procedure ContosoPost(RequestText: Text; var ResponseText : Text; Token: Text)
02 var
03     Content: HttpContent;
04     Headers: HttpHeaders;
05     Client: HttpClient;
06     ResponseMessage: HttpResponseMessage;
07 begin
08     Client.Clear();
09     Content.Clear();
10     Content.WriteFrom(RequestText);
11     Content.Headers(Headers);
12     Headers.Clear();
13     Headers.Add('Content-Type', 'text/plain');
14     Headers.Add('Authorization', 'Bearer ' + Token);
15     if Client.Post('https://contoso.com/api', Content, ResponseMessage) then
16         Content.ReadAs(ResponseText);
17 end;

```

The procedure does not work as expected.

You need to find and fix all errors in HTTP class usage.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Locate code errors

Statement	Yes	No
Replace line 16 with ResponseText := ResponseMessage	<input type="radio"/>	<input type="radio"/>
In line 13, change the 'text/plain' value to 'application/json'	<input type="radio"/>	<input type="radio"/>
Replace line 14 with Client.DefaultRequestHeaders.Add('Authorization', 'Bearer ' + Token);	<input type="radio"/>	<input type="radio"/>
In line 10, replace WriteFrom with ReadAs	<input type="radio"/>	<input type="radio"/>

정답:

설명:

Locate code errors

Statement	Yes	No
Replace line 16 with ResponseText := ResponseMessage	<input type="radio"/>	<input checked="" type="radio"/>
In line 13, change the 'text/plain' value to 'application/json'	<input checked="" type="radio"/>	<input type="radio"/>
Replace line 14 with Client.DefaultRequestHeaders.Add('Authorization', 'Bearer ' + Token);	<input type="radio"/>	<input checked="" type="radio"/>
In line 10, replace WriteFrom with ReadAs	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Statements:

\* Replace line 16 with ResponseText := ResponseMessage

\* answer: No The correct way to handle the response is to use ReadAs or similar methods to read the content from the response, not just assign the ResponseMessage directly to ResponseText.

Hence, this statement is incorrect.

\* In line 13, change the 'text/plain' value to 'application/json'

\* answer: Yes Since the procedure is expected to send a POST request with JSON content, changing the content type to 'application/json' is correct. This ensures that the server understands the content is in JSON format.

\* Replace line 14 with Client.DefaultRequestHeaders.Add('Authorization', 'Bearer ' + Token);

\* answer: No In AL, the authorization headers are managed through HttpHeaders, and the Client.

DefaultRequestHeaders method is not available in AL. Therefore, this statement is incorrect.

\* In line 10, replace WriteFrom with ReadAs

\* answer: No WriteFrom is the correct method for sending the request content, as it writes data from the RequestText variable to the HttpContent. ReadAs is used for reading the response, not for writing the request content.

## 질문 # 51

Hotspot Question

A company uses Business Central. The company has branches in different cities.

A worker reports that each time they generate a daily summary report, they get an error message that they do not have permissions.

```

15 local procedure GetLogisticsCharge() LogisticsCharge: Decimal;
16 var
17     LogisticsSetup: Record "Logistics Setup";
18 begin
19     LogisticsSetup.Get();
20     LogisticsCharge := LogisticsSetup."Logistics Charge";
21 end;

```

You need to resolve the issue.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Method attributes	Yes	No
<b>Statement</b> Configure [InherentPermissions(PermissionObjectType::Table, Database:"Logistics Setup", 'x', InherentPermissionsScope::Both)] above line 15.	<input type="radio"/>	<input type="radio"/>
Configure [InherentPermissions(PermissionObjectType::TableData, Database:"Logistics Setup", 'R', InherentPermissionsScope::Permissions)] above line 15.	<input type="radio"/>	<input type="radio"/>
Configure [InherentPermissions(PermissionObjectType::TableData, Database:"Logistics Setup", 'r', InherentPermissionsScope::Both)] above line 15.	<input type="radio"/>	<input type="radio"/>
Configure [InherentPermissions(PermissionObjectType::Table, Database:"Logistics Setup", 'X', InherentPermissionsScope::Permissions)] above line 15.	<input type="radio"/>	<input type="radio"/>

정답:

#### 질문 # 52

You create a table with fields.

You observe errors in the code

You need to resolve the errors.

```

01 field(1; "Job No."; Code[20])
02 {
03     Caption = 'Job No.';
04 }
05 field(2; Description; text[150])
06 {
07     Caption = 'Description';
08 }
09 field(3; "Sales Amount"; Decimal)
10 {
11     AutoFormatType = 1;
12     CalcFormula = sum("Job Task"."Recognized Sales Amount" where("Job No." = field("No.")));
13     Caption = 'Calc. Recog. Sales Amount';
14     Editable = false;
15 }
16 field(5; "Over Budget"; Boolean)
17 {
18     Caption = 'Over Budget';
19 }
20 field(6; "Project Manager"; Code[50])
21 {
22     Caption = 'Project Manager';
23     TableRelation = "User Setup";
24 }

```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Error resolution

Statement	Yes	No
In line 12, declare "Job Task" as a variable.	<input type="radio"/>	<input type="radio"/>
Add the property FieldClass = FlowField; for field 3.	<input type="radio"/>	<input type="radio"/>
Add the property FieldClass = FlowFilter; for field 3.	<input type="radio"/>	<input type="radio"/>
In line 23, assign the "User Setup" table to a field.	<input type="radio"/>	<input type="radio"/>

정답:

설명:

Error resolution

Statement	Yes	No
In line 12, declare "Job Task" as a variable.	<input type="radio"/>	<input type="radio"/>
Add the property FieldClass = FlowField; for field 3.	<input type="radio"/>	<input type="radio"/>
Add the property FieldClass = FlowFilter; for field 3.	<input type="radio"/>	<input type="radio"/>
In line 23, assign the "User Setup" table to a field.	<input type="radio"/>	<input type="radio"/>

Explanation:

- \* In line 12, declare "Job Task" as a variable. = NO
- \* Add the property FieldClass = FlowField; for field 3. = YES
- \* Add the property FieldClass = FlowFilter; for field 3. = NO
- \* In line 23, assign the "User Setup" table to a field. = YES

For "In line 12, declare 'Job Task' as a variable": In the AL code provided, the "Job Task" appears to be part of a CalcFormula of a FlowField, which means it references a table and not a variable. The "Job Task" does not need to be declared as a variable because it is used to reference a table in a CalcFormula expression.

For "Add the property FieldClass = FlowField; for field 3": The line of code CalcFormula = sum("Job Task"."Recognized Sales Amount" where("Job No." = field("No."))); indicates that this field is calculated from other table data, which is the definition of a FlowField. Therefore, adding the property FieldClass = FlowField; is necessary for the field to function correctly.

For "Add the property FieldClass = FlowFilter; for field 3": FlowFilters are used to filter data based on the value in a flow field.

Since field 3 is using a CalcFormula to sum values, it is a FlowField and not a FlowFilter. Therefore, this statement is not correct.

For "In line 23, assign the 'User Setup' table to a field": The line TableRelation = "User Setup"; suggests that the "Project Manager"

field has a relation to the "User Setup" table, which is a method of assigning a table to a field to ensure that the values in "Project Manager" correspond to values in the "User Setup" table.  
Hence, this statement is true.

**질문 # 53**

A developer creates a profile for part-time shop supervisors and adds customizations.  
You plan to add new requirements to the profile.  
You need to analyze the code to understand the profile and make sure there are no errors.

```

01 profile "Part Time Shop Supervisor"
02 {
03   Description = 'This profile is for Part time Shop Supervisors';
04   Caption = 'Part Time Shop Supervisor';
05   RoleCenter = "Shop Supervisor Role Center";
06   Enabled = true;
07   Promoted = true;
08   Customizations = Customization1;
09 }
10 pagecustomization Customization1 customize "Item List"
11 {
12   layout
13   {
14     modify("Register Time")
15     {
16       Visible = false;
17     }
18     moveafter("Unit Cost"; "Costing Method")
19   }
20 }

```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statement	Yes	No
The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup.	<input type="radio"/>	<input type="radio"/>
Variables, procedures, and triggers cannot be added on page customization objects.	<input type="radio"/>	<input type="radio"/>
Line 10 should use <b>extends</b> instead of <b>customizes</b> .	<input type="radio"/>	<input type="radio"/>
In line 18, "Unit Cost" will be moved after "Costing Method".	<input type="radio"/>	<input type="radio"/>

**정답:**

**설명:**

Profile and customization

Statement	Yes	No
The Part Time Shop Supervisor profile will be applied only to users with "Register Time" = true on User Setup.	<input type="radio"/>	<input checked="" type="radio"/>
Variables, procedures, and triggers cannot be added on page customization objects.	<input checked="" type="radio"/>	<input type="radio"/>
Line 10 should use <b>extends</b> instead of <b>customizes</b> .	<input type="radio"/>	<input checked="" type="radio"/>
In line 18, "Unit Cost" will be moved after "Costing Method".	<input checked="" type="radio"/>	<input type="radio"/>
