We are confident in the quality of the Workday Workday-Pro-HCM-Reporting preparational material we provide and back it up with a money-back guarantee. DumpsFree provides Workday Workday-Pro-HCM-Reporting desktop-based practice software for you to test your knowledge and abilities. The Workday-Pro-HCM-Reporting desktop-based practice software has an easy-to-use interface.

Workday Workday-Pro-HCM-Reporting Exam Syllabus Topics:

Topic	Details
Topic 1	• Reporting: Business Reporting is used to inform management and investors of information such as financial performance, the market outlook, or the performance of a specific department. Candidates are tested for their business reporting skills.
Topic 2	• Human Capital Management: Human capital is a concept used by economists and social scientists to designate personal attributes considered useful in the production process. Candidates are assessed for their HCM skills.

Topic 3	• Calculated Fields: This domain assesses the skills of candidates regarding calculations. A calculation is a deliberate process that transforms one or more inputs into one or more results.
Topic 4	• Composite Reporting: This domain of the Workday Pro HCM Reporting Certification exam measures the skills of HRIS Analysts and covers building and managing Composite Reports to deliver advanced insights across Workday HCM data.

In addition, under the help of our Workday-Pro-HCM-Reporting exam questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future.

Workday Pro HCM Reporting Certification Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22
A compensation analyst wants to provide C-level executives with a readable and easily accessible display of annual average base pay for workers by region.
What would be an effective option for this case?

- A. A dashboard, because we only need information from a single report.
- B. A worklet, because we need information from a collection of reports, organized by region.
- C. A dashboard, because we need information from a collection of reports, organized by region.
- D. A worklet, we only need information from a single report.

Answer: C

Explanation:
Workday dashboards allow organizations to present multiple reports together in a consolidated, highly visual, and interactive format. For C-level executives, who require a comprehensive and regional view of annual average base pay, dashboards are preferred over individual reports or worklets because they enable grouping and comparison across multiple data sets.
From the Workday binder: "Dashboards provide an interface to view charts and sheets all in one place. This enables managers and executives to analyze key metrics and trends so they can make better decisions." . By organizing reports by region within a dashboard, executives can quickly compare averages, identify trends, and take strategic action without needing to navigate multiple reports.
Worklets are lightweight tiles often used for single reports or quick tasks on the Home page. However, this scenario requires an organized collection of reports, making D. A dashboard, because we need information from a collection of reports, organized by region the correct answer.

NEW QUESTION # 23
The benefits manager position has recently been filled by a different worker. The previous benefits manager has transferred ownership of the report schedules to the new manager. Month end is coming up and the new manager is wondering which reports are scheduled to be run automatically.
Where can the manager view this information?

- A. The Process Monitor report
- B. The Scheduled Future Processes report
- C. My Tasks
- D. My Reports Library

Answer: B

Explanation:
Workday provides the Scheduled Future Processes report to review which reports are scheduled to run automatically. This report displays the recurrence details and execution times of all scheduled reports, allowing managers to confirm upcoming automated report runs.
From the Workday Reporting documentation:
"Workday provides scheduling options to run reports at set frequencies. You can confirm upcoming scheduled report runs in the Scheduled Future Processes report." Therefore, the correct answer is D. The Scheduled Future Processes report.

NEW QUESTION # 24
A user needs to view additional data on the delivered Headcount By Job Profile report.
What should you recommend?

- A. Export the standard report to a data warehouse
- B. Edit the standard report
- C. Create a custom report from scratch
- D. Copy and modify the standard report

Answer: D

Explanation:
Workday delivers many standard (delivered) reports that are available to all customers. These reports are a great starting point but are not editable directly. If the delivered report does not meet your requirements, you should copy it and then modify the copy to create a custom report. This ensures that you retain the delivered report as-is, while still tailoring the report output to your business needs.
From the Workday Module 1 and 2 Reporting sections:
"Workday delivers standard reports that are available for all customers. If necessary, you can copy many of the Workday-delivered reports to create a custom report and modify it as needed."
"There still may not be a report that meets my specific needs though. In that case, I can either create a report from scratch or copy a delivered report and make changes."
"Standard reports are already available in all customer tenants and span across the functional areas in Workday. Workday creates standard reports using either the report writer tool or XpressO. However, you can copy and modify reports created with report writer as needed." Therefore, the correct recommendation is to copy and modify the delivered Headcount By Job Profile report (Option D) instead of editing the original.

NEW QUESTION # 25
The HR administrator is complaining about a report that is running slowly. The report uses the Trended Workers data source and includes a field on the related Worker business object.
How can you improve report performance without altering the report requirements?

- A. Add the field to the Trended Workers data source.
- B. Create a calculated field on the Trended Worker business object.
- C. Run the Create Worker Trending Data task.
- D. Run the Purge Worker Trending Data task.

Answer: A

Explanation:
Performance issues often occur when trending reports pull fields from related business objects instead of directly from the Trended Workers data source. This requires Workday to join across objects at runtime, slowing down report execution. To improve performance, you should add the required field to the Trended Workers data source, ensuring the data is pre-joined and optimized for trending.
From the Workday binder: "To improve performance, add commonly reported fields directly to the Trended Workers object. Using related business object fields requires additional joins and increases report runtime." Creating calculated fields adds complexity rather than improving speed. Purging or re-creating trending data maintains system hygiene but does not address field-level performance.
Thus, the correct solution is A. Add the field to the Trended Workers data source.

NEW QUESTION # 26

A Hire event has an Effective Date of 09/02/2023.

What would be the Record Date of the Hire event on the Trended Workers object?

- A. 9/1/2023
- B. 9/30/2023
- C. 10/31/2023
- D. 9/2/2023

Answer: B

Explanation:

In Workday trending reports, the Record Date for a transaction is not always the same as the event's Effective Date. Instead, trending data is captured based on the periodicity of the trended workers configuration, most commonly set to the end of each month. For Hire events, the Effective Date is when the change takes effect in the system, but the trended data is stored using the month-end Record Date.

From the Workday binder: "Trended Workers captures snapshots of worker data at periodic intervals (e.g., monthly, quarterly). A transaction such as a hire or termination is recorded in trending as of the last day of the period in which the effective date occurs." In this scenario, the Hire Effective Date of 09/02/2023 falls in September. The Record Date is therefore the last day of September, 09/30/2023, not the effective date itself.

Thus, the correct answer is C. 9/30/2023.

NEW QUESTION # 27

......

The exam materiala of the DumpsFree Workday Workday-Pro-HCM-Reporting is specifically designed for candicates. It is a professional exam materials that the IT elite team specially tailored for you. Passed the exam certification in the IT industry will be reflected in international value.
