

# VMware 2V0-16.25 Valid Exam Practice, Latest 2V0-16.25 Test Simulator

P.S. Free 2026 VMware 2V0-16.25 dumps are available on Google Drive shared by DumpsQuestion:  
[https://drive.google.com/open?id=1sg\\_kwKQ7TToeXrBSwh32AvmM4KAJppO](https://drive.google.com/open?id=1sg_kwKQ7TToeXrBSwh32AvmM4KAJppO)

People are very busy nowadays, so they want to make good use of their lunch time for preparing for their 2V0-16.25 exam. As is known to us, if there are many people who are plugged into the internet, it will lead to unstable state of the whole network, and you will not use your study materials in your lunch time. If you choose our 2V0-16.25 exam question as your study tool, you will not meet the problem. Because the app of our 2V0-16.25 Exam Prep supports practice offline in anytime. If you buy our products, you can also continue your study when you are in an offline state. You will not be affected by the unable state of the whole network. You can choose to use our 2V0-16.25 exam prep in anytime and anywhere.

Just like the old saying goes, motivation is what gets you started, and habit is what keeps you going. A good habit, especially a good study habit, will have an inestimable effect in help you gain the success. The 2V0-16.25 exam prep from our company will offer the help for you to develop your good study habits. If you buy and use our study materials, you will cultivate a good habit in study. More importantly, the good habits will help you find the scientific prop learning methods and promote you study efficiency, and then it will be conducive to helping you pass the 2V0-16.25 Exam in a short time. So hurry to buy the 2V0-16.25 test guide from our company, you will benefit a lot from it.

>> VMware 2V0-16.25 Valid Exam Practice <<

## Latest 2V0-16.25 Test Simulator - 2V0-16.25 Reliable Test Vce

Windows, Mac, iOS, Android, and Linux support this 2V0-16.25 practice exam. The desktop VMware vSphere Foundation 9.0 Administrator (2V0-16.25) practice test software is similar to the web-based 2V0-16.25 format as far as its features are concerned. But it works offline only on the Windows operating system. The offline 2V0-16.25 Practice Exam can be taken easily just by just installing the software on your Windows laptop or computer. All three VMware vSphere Foundation 9.0 Administrator (2V0-16.25) formats of DumpsQuestion are according to the latest content of the VMware 2V0-16.25 examination.

## VMware 2V0-16.25 Exam Syllabus Topics:

---

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.</li> </ul>

## VMware vSphere Foundation 9.0 Administrator Sample Questions (Q60-Q65):

### NEW QUESTION # 60

An administrator has been tasked with creating a custom alert for an object in VMware Cloud Foundation (VCF) Operations. When creating the alert, the administrator completes the following:

- \* A new symptom definition.
- \* A new alert definition.
- \* Select the Object type.

What additional step must the administrator take to complete the stated objective and ensure the alert is triggered?

- A. Create an instance of the Rest Notification Plugin.
- B. Create and enable a super metric for read latency in the Active Policy.
- C. Enable the alert in an Active Policy.
- D. Create a new Payload Template.

**Answer: C**

Explanation:

When creating a custom alert in VCF Operations, the final required step is:

\* Enable the alert in an Active Policy, so it applies to the target objects.

Without policy activation, the alert exists but will never trigger.

Other options:

\* A. Super metric# Only required if monitoring a custom metric, not for standard alerts.

\* B. REST Notification Plugin# Used for outbound integration, not triggering alerts.

\* C. Payload Template# Used in notifications, not in core alert configuration.

References:

VMware Cloud Foundation 9.0 -Custom Alerts and Policies

VMware Docs: Alert Definitions in vRealize Operations

### NEW QUESTION # 61

An administrator is preparing to deploy VMware vSphere Foundation using the VMware Cloud Foundation (VCF) Installer wizard.

During host onboarding, it is discovered that the VMware ESX hosts each have different root passwords.

Which deployment method must be used to continue the installation?

- A. Set the password to expire on all ESX hosts.
- B. Proceed with the wizard and override host credentials during staging.
- **C. Use a JSON specification file to define per-host credentials.**
- D. Use the deployment wizard and enter credentials per host manually.

**Answer: C**

Explanation:

When deploying VMware vSphere Foundation using the VCF Installer wizard, host onboarding requires consistent access credentials.

\* If ESX hosts have different root passwords, the wizard cannot proceed using a single credential.

\* In this case, administrators must use a JSON specification file to define per-host credentials, ensuring each host can be onboarded successfully.

\* The JSON specification allows defining host-specific parameters (IP, hostname, root password, networking, etc.).

Other options are incorrect:

\* A. Proceed with wizard and override host credentials during staging# Not supported.

\* B. Use deployment wizard and enter credentials per host manually# Wizard requires uniform credentials.

\* C. Set password to expire on all ESX hosts# Irrelevant to deployment and would cause failures.

References:

VMware Cloud Foundation Deployment Guide -Host onboarding using JSON specification(covered in installer documentation).

VMware Docs: Using JSON Specification for VCF Deployment

### NEW QUESTION # 62

The operations team is tasked with the preparation of a weekly health status overview of a VMware vSphere Foundation (VVF) environment to senior management with the following requirements:

\* It should be sent every Monday morning.

\* It must include KPIs related to cluster health, storage usage, and virtual machine (VM) growth trends.

\* Operational overhead should be minimized.

Which two actions must the administrator perform to satisfy these requirements? (Choose two.)

- **A. Create a custom View with the KPIs and add it to a new Report Template.**
- **B. Configure the scheduler to send the report via e-mail weekly.**
- C. Create a custom dashboard with the required KPIs.
- D. Export the built-in Cluster Summary report via FTP.
- E. Export the desired metrics from the Metrics Explorer to CSV.

**Answer: A,B**

Explanation:

VMware vSphere Foundation (VVF) integrates VMware Aria Operations (vRealize Operations) for intelligent operations management, enabling automated reporting to minimize operational overhead. To meet the requirements for a weekly health status overview including cluster health, storage usage, and VM growth trends, an administrator must first create a custom View in Aria Operations to define the specific KPIs (e.g., cluster availability, datastore capacity, and VM count trends over time). This View is then added to a new Report Template, which compiles the data into a structured report format like PDF or CSV. Next, the

scheduler in Aria Operations is configured to generate and email the report every Monday morning, ensuring delivery without manual intervention. This approach leverages built-in automation for recurring tasks, reducing effort compared to ad-hoc exports or manual configurations.

Other options do not fully satisfy the requirements: Option A creates a dashboard for interactive visualization but not a scheduled report; Option C uses a built-in report with limited customization and no direct FTP export or scheduling; Option E involves manual CSV exports from Metrics Explorer, increasing overhead and lacking automation.

### NEW QUESTION # 63

An administrator is tasked to install a new VMware ESX host to an existing cluster. When the installation is completed, the host is not able to be reached from the vCenter.

When testing the host's management network, the default gateway, primary DNS, and secondary DNS are all unreachable, and the host name cannot be resolved. The VLAN for the management network is set correctly and the adapters are all connected.

What is the first step in troubleshooting this connectivity issue?

- A. Verify the DVS configuration in vCenter.
- **B. Verify the correct TCP/IP information is configured.**
- C. Disconnect and reconnect the physical network cable.
- D. Reinstall ESX on the host.

**Answer: B**

Explanation:

When a newly installed ESX host cannot be reached and all basic network tests (gateway, DNS, hostname resolution) fail:

\* The first troubleshooting step is to confirm that the management network TCP/IP configuration (IP address, subnet mask, default gateway, DNS servers) is correct.

\* If this is misconfigured, the host will not communicate with vCenter or resolve names.

\* B. Verify DVS configuration in vCenter# Requires host connectivity first.

\* C. Reinstall ESX# Too drastic without confirming networking basics.

\* D. Disconnect/reconnect cable# Less likely since VLANs/adapters are reported as connected.

### NEW QUESTION # 64

What is the benefit of enabling lockdown mode on VMware ESX hosts?

- A. Improves network performance.
- **B. Restricts direct access to the ESX host, enhancing security.**
- C. Simplifies the management of virtual machines.
- D. Increases CPU and memory resources available to virtual machines (VMs).

**Answer: B**

Explanation:

Lockdown Mode on ESXi hosts is a security feature that restricts direct login to the ESXi host.

\* Once enabled, administrators must manage the host through vCenter Server instead of direct DCUI/SSH access (except for exception users).

\* This prevents unauthorized local access and improves overall security compliance.

Other options:

\* A. Improves network performance# Not related.

\* C. Increases CPU/memory for VMs# Not related.

\* D. Simplifies VM management# It actually makes direct management more restricted.

### NEW QUESTION # 65

.....

In order to meet the different needs of customers, we have created three versions of our 2V0-16.25 guide questions. Of course, the content of the three versions is exactly the same, but the displays are the totally different, so you only need to consider which version of our 2V0-16.25 study braindumps you prefer. Perhaps you can also consult our opinions if you don't know the difference of these three versions. Or you can free download the demos of the 2V0-16.25 exam braindumps to check it out.
