

Avail High-quality VMCE_v12 Exam Simulator Free to Pass VMCE_v12 on the First Attempt

What's more, part of that ValidVCE VMCE_v12 dumps now are free: <https://drive.google.com/open?id=1EveCQaXiKMFCa-JFWqG6HVSLIuu56Zei>

Veeam VMCE_v12 questions are available in PDF format. Our Veeam VMCE_v12 PDF is embedded with questions relevant to the actual exam content only. Veeam VMCE_v12 PDF is printable and portable, so you can learn with ease and share it on multiple devices. You can use this Veeam VMCE_v12 PDF on your mobile and tablet anywhere, anytime, without the internet and installation process.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	• Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 2	• Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 3	• Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Topic 4	• Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 5	• Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Topic 6	• Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 7	• Data protection strategies: This section of the exam covers an overview of data protection strategies.
Topic 8	• Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 9	• Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.
Topic 10	• Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 11	• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.

Topic 12	Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 13	Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Topic 14	Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 15	Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Topic 16	Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.

Pass Guaranteed Veeam - High Hit-Rate VMCE_v12 - Veeam Certified Engineer v12 Exam Simulator Free

The customizable mock tests make an image of a real-based Veeam Certified Engineer v12 (VMCE_v12) exam which is helpful for you to overcome the pressure of taking the final examination. Customers of ValidVCE can take multiple Veeam VMCE_v12 practice tests and improve their preparation to achieve the VMCE_v12 Certification. You can even access your previously given tests from the history, which allows you to be careful while giving the mock test next time and prepare for Veeam VMCE_v12 certification in a better way.

Veeam Certified Engineer v12 Sample Questions (Q19-Q24):

NEW QUESTION # 19

A backup administrator must enable guest file system indexing for a backup job of a Microsoft Windows file server VM. All required credentials are added to the Veeam Backup & Replication server. VMware Tools (VIX) cannot be used due to security regulations. What should be done to make it possible in the following environment?

- A. Connect the ESXi host to the VM network
- B. Use the Veeam Backup & Replication server as a guest interaction proxy
- C. Install a file system indexing plugin on the Microsoft Windows file server
- D. Use the proxy server as a guest interaction proxy

Answer: D

Explanation:

If VMware Tools (VIX) cannot be used due to security regulations, the backup administrator can use the proxy server as a guest interaction proxy to enable guest file system indexing for a backup job. The guest interaction proxy is responsible for the deployment and coordination of guest processing tasks, such as guest file system indexing, which does not require VIX.

NEW QUESTION # 20

An administrator needs to configure a backup job that dynamically adds new VMware hosted SQL servers. How can this be accomplished?

- A. Create a dynamic backup job in Enterprise Manager.
- B. Create a job based on vSphere tags.
- C. Enable application aware processing.
- D. Create a CSV file that is scanned before the backup job starts.

Answer: B

Explanation:

Creating a backup job based on vSphere tags allows for dynamic addition of new VMware hosted SQL servers. When new VMs are tagged appropriately in vSphere, they are automatically included in the backup job, ensuring all relevant SQL servers are backed up without manual intervention.

NEW QUESTION # 21

Which storage optimization option uses a block size of 512 KB?

- A. Local target (large blocks)
- B. Local target
- C. LAN target
- D. WAN target

Answer: C

Explanation:

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/compression_deduplication.html?ver=100

NEW QUESTION # 22

On Monday, a backup administrator found out that some backup jobs were missing from a configuration. They want to roll back the configuration database to Friday's state. Which configuration restore mode should be used?

- A. Veeam Explorer for Microsoft SQL
- B. Migrate
- C. Instant SQL Recovery
- D. Restore

Answer: D

Explanation:

To roll back the configuration database to Friday's state, the backup administrator should use the 'Restore' mode available in Veeam Backup & Replication. This mode allows for the entire configuration backup to be restored, which includes the job settings and history, and brings the configuration database back to the state it was in at the time of the backup. * Veeam Help Center: Configuration Restore

NEW QUESTION # 23

A backup administrator is asked to perform a file-level restore on a Windows VM for the first time since Veeam Backup & Replication has been installed and left unconfigured. Which of the following items would be used during this process?

- A. The mount server configured for the repository
- B. The gateway server configured for the repository
- C. The guest interaction proxy configured for the backup job
- D. The FLR helper appliance configured for the Restore wizard

Answer: A

Explanation:
