XK0-006 Exam Engine, Reliable XK0-006 Test Braindumps

If you want to choose passing CompTIA certification XK0-006 exam to make yourself have a more stable position in today's competitive IT area and the professional ability become more powerful, you must have a strong expertise. And passing CompTIA certification XK0-006 exam is not very simple. Perhaps passing CompTIA Certification XK0-006 Exam is a stepping stone to promote yourself in the IT area, but it doesn't need to spend a lot of time and effort to review the relevant knowledge, you can choose to use our BraindumpsVCE product, a training tool prepared for the IT certification exams.

CompTIA Linux+ Certification Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24
An average of one out of three users in a company cannot reach the company website. A Linux administrator determines that one of the three website servers is down. The administrator inspects the DNS configuration for the website and notices the following entry:

Which of the following accurately explains the issue?

- A. The DNS configuration is missing corresponding AAAA records and PTR records, and this is causing clients to fail the hostname translation.
- B. DNS returns all three records in a different order each time, and the browser typically uses the first address in the DNS response.
- C. One of the DNS records has not been signed with a DNSSEC-supported key, and this is causing some web browsers to reject the DNS response.

- D. The administrator has incorrectly configured the DNS server to be an iterative resolver instead of an authoritative resolver.

Answer: B

Explanation:
With multiple A records, DNS performs simple round-robin ordering and returns the records in a different sequence on each query. Most clients try the first address returned-so when the downed server's IP appears first (about one in three times), those users cannot connect.

NEW QUESTION # 25
While hardening a system, an administrator runs a port scan with Nmap, which returned the following output:

```
# nmap 104.21.75.76
Starting Nmap 7.80 ( https://nmap.org ) at 2024-07-09 18:09 UTC
Nmap scan report for 104.21.75.76
Host is up (0.00087s latency).
Not shown: 996 closed ports
PORT STATE SERVICE
23/tcp open telnet
80/tcp open http
443/tcp open https
8080/tcp open http-proxy

Nmap done: 1 IP address (1 host up) scanned in 4.93 seconds
```

Which of the following is the best way to address this security issue?

- A. Closing port 80 on the network switch to block traffic
- B. Disabling and removing the Telnet service on the server
- C. Configuring a firewall to block traffic on port 23 on the server
- D. Changing the systems administrator's password to prevent unauthorized access

Answer: B

Explanation:
Port 23/tcp indicates Telnet, which is insecure because it transmits data in plaintext. The best hardening approach is to disable and remove the Telnet service entirely, eliminating the vulnerability rather than just blocking it at the firewall. Secure alternatives like SSH should be used instead.

NEW QUESTION # 26
Which of the following Ansible components contains a list of hosts and host groups?

- A. Playbook
- B. Fact
- C. Collection
- D. Inventory

Answer: D

Explanation:
In Ansible, the inventory defines the list of managed nodes (hosts) and groups of hosts. It is the source from which Ansible knows what systems to configure or manage.

NEW QUESTION # 27
Which of the following most accurately describes a webhook?

- A. A means to transmit sensitive information between systems
- B. An HTTP-based callback function
- C. An SNMP-based API for network device monitoring
- D. An authentication method for web-server communication

Answer: B

Explanation:
A webhook is an HTTP-based callback that allows one system to send real-time data or notifications to another system when an event occurs.

NEW QUESTION # 28
Which of the following passwords is the most complex?

- A. H3sa1dt01d
- B. HeSaidShetold
- C. H3s@1dSh3t0|d
- D. he$@ID$heTold

Answer: C

Explanation:
This password is the most complex because it uses uppercase and lowercase letters, numbers, and multiple special characters, making it significantly harder to guess or brute-force compared to the others.

NEW QUESTION # 29
......

Our valid XK0-006 exam dumps will provide you with free dumps demo with accurate answers that based on the real exam. These XK0-006 real questions and answers contain the latest knowledge points and the requirement of the certification exam. High quality and accurate of XK0-006 Pass Guide will be 100% guarantee to clear your test and get the certification with less time and effort.
