100% Free COBIT-Design-and-Implementation – 100% Free Sure Pass | Trustable ISACA COBIT Design and Implementation Certificate Free Pdf Guide

These COBIT-Design-and-Implementation exam questions braindumps are designed in a way that makes it very simple for the candidates. Each and every COBIT-Design-and-Implementation topic is elaborated with examples clearly. Use TestPassed top rate ISACA COBIT-Design-and-Implementation Exam Testing Tool for making your success possible. COBIT-Design-and-Implementation exam preparation is a hard subject. Plenty of concepts get mixed up together due to which student feel difficult to identify them. There is no similar misconception in COBIT-Design-and-Implementation Dumps because we have made it more interactive for you. The candidates who are less skilled may feel difficult to understand the COBIT-Design-and-Implementation questions can take help from these braindumps. The tough topics of COBIT-Design-and-Implementation certification have been further made easy with examples, simulations and graphs. Candidates can avail the opportunity of demo of free COBIT-Design-and-Implementation dumps.

ISACA COBIT-Design-and-Implementation Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Impact of Design Factors: Management consultants, IT strategists, and governance specialists take center stage as they delve into understanding the far-reaching impact of design factors. They assess how these factors influence the effectiveness of governance systems, processes, and the attainment of strategic objectives. Their insight ensures the optimization of governance practices.
Topic 2	<ul style="list-style-type: none"> • Governance Implementation Lifecycle: In this section, the focus is on assessing the capabilities of IT governance professionals and senior managers in implementing and managing the complex world of enterprise technology governance. They will showcase their comprehensive understanding of the full lifecycle, encompassing planning, design, execution, monitoring, and enhancement of robust governance systems. Their expertise in aligning these systems with strategic objectives is key.
Topic 3	<ul style="list-style-type: none"> • Key Topics Decision Matrix: IT governance analysts, advisors, and consultants showcase their proficiency in employing a decision matrix as a tool. They exhibit their skill in evaluating and prioritizing key topics, making well-informed choices that ultimately enhance the implementation and ongoing improvement of robust governance systems.
Topic 4	<ul style="list-style-type: none"> • Implementing & Optimizing I&T Governance Overview: Senior IT leaders, governance directors, and consultants step into the spotlight here. The exam assesses their profound expertise in establishing and refining IT governance practices across the entire enterprise landscape. Their proficiency in ensuring strategic alignment, facilitating sound decision-making, and maximizing value is vital.
Topic 5	<ul style="list-style-type: none"> • COBIT Basic Concepts: IT professionals, managers, and those immersed in governance practices will encounter this section, which tests their grasp of COBIT fundamentals. This includes understanding the Control Objectives for Information and Related Technologies framework, along with the core principles that guide effective governance of enterprise IT.
Topic 6	<ul style="list-style-type: none"> • Design Factors for a Governance System: This domain targets IT strategists, enterprise architects, and governance advisors. It assesses their keen ability to identify and dissect critical design factors that hold significant influence over the development and deployment of a thriving governance system. Their expertise ensures the system is tailored to the organization's distinct requirements.

ISACA COBIT Design and Implementation Certificate Sample Questions (Q96-Q101):

NEW QUESTION # 96

When assessing the current state of I&T, a continual improvement task includes:

- A. identifying key enterprise and supporting alignment goals.
- B. developing metrics to monitor I&T performance.
- **C. identifying potential process improvements.**
- D. raising executive awareness of IT and the value of EGIT.

Answer: C

Explanation:

When assessing the current state of I&T, a continual improvement task includes identifying potential process improvements. This task is essential for ensuring that IT processes remain efficient, effective, and aligned with business goals.

References in COBIT 2019 Design and Implementation:

* COBIT 2019 Framework: Governance and Management Objectives, BAI10 (Managed Continuous Improvement): This objective focuses on the importance of continually assessing and improving IT processes to enhance performance and value delivery.

* COBIT 2019 Implementation Guide, Chapter 5: This chapter discusses the need for continuous improvement initiatives, including the identification of potential process improvements to optimize IT performance.

By continually identifying and implementing process improvements, enterprises can ensure that their IT functions remain competitive and capable of supporting evolving business needs.

NEW QUESTION # 97

What is a PRIMARY responsibility of the program management office during the planning phase that defines the initial program concept business case?

- A. Identifying success factors and a way to monitor progress
- B. Providing advice regarding controls and potential risks
- C. Identifying business priorities and business strategy dependent on IT
- **D. Ensuring that both needs and business objectives are stated**

Answer: D

Explanation:

The primary responsibility of the program management office (PMO) during the planning phase that defines the initial program concept business case is ensuring that both needs and business objectives are stated. This responsibility ensures that the program aligns with the enterprise's strategic goals and addresses specific business needs.

References in COBIT 2019 Design and Implementation:

* COBIT 2019 Framework: Governance and Management Objectives, BAI01 (Managed Programs): This objective emphasizes the role of the PMO in defining program requirements and business objectives during the planning phase.

* COBIT 2019 Implementation Guide, Chapter 3: This chapter outlines the responsibilities of the PMO in program planning, which includes articulating business needs and objectives to ensure alignment and clarity.

By clearly stating needs and business objectives, the PMO sets a solid foundation for the program, facilitating alignment with strategic goals and effective resource allocation.

NEW QUESTION # 98

Which function within the IT corporate structure is responsible for classifying information using an agreed-upon classification scheme for a new data collection system?

- A. Information privacy
- **B. Information security**
- C. Enterprise architecture
- D. IT governance

Answer: B

Explanation:

The function within the IT corporate structure responsible for classifying information using an agreed-upon classification scheme for a new data collection system is the Information Security function. Information security ensures that data is properly classified to protect it according to its sensitivity and criticality.

References in COBIT 2019 Design and Implementation:

COBIT 2019 Framework: Governance and Management Objectives, APO13 (Managed Security): This objective outlines the responsibilities of the information security function, which includes defining and implementing information classification schemes. COBIT 2019 Implementation Guide, Chapter 3: This chapter details how information security policies and practices should be established, including the classification of information assets.

COBIT 2019 Framework: Deliver, Service and Support (DSS05, Managed Security Services): This objective highlights the role of information security in managing security services, including data classification and protection measures.

By classifying information, the information security function ensures that data is adequately protected against unauthorized access and breaches, adhering to compliance requirements and supporting the overall security posture of the enterprise.

NEW QUESTION # 99

A COBIT consultant is performing a detailed review of current I&T risk assessments to customize design factors for a COBIT implementation project. The consultant notes that board members and executive management are reluctant to engage with IT and that IT lacks committed sponsors. Which of the following governance and management objectives would BEST address this situation?

- A. EDM03 Ensured Risk Optimization
- **B. EDM05 Ensured Stakeholder Engagement**
- C. APO08 Managed Relationships
- D. APO07 Managed Human Resources

Answer: B

Explanation:

The COBIT 2019 Governance and Management Objective EDM05, "Ensured Stakeholder Engagement," focuses on ensuring that stakeholders are engaged, their expectations are considered, and the communication between IT and the business is effective. "The purpose of EDM05 is to ensure that stakeholders are identified and engaged in alignment with enterprise objectives. It supports building commitment and accountability across stakeholders, especially at the executive and board levels." In this scenario, where there is reluctance and lack of sponsorship from senior stakeholders, EDM05 is the most appropriate to address engagement and alignment.

Reference: COBIT 2019 Framework: Governance and Management Objectives, EDM05

NEW QUESTION # 100

Which of the following is a CRITICAL element to consider when understanding the enterprise context and strategy?

- A. Enterprise's balanced scorecard
- B. Industry compliance requirements
- C. I&T risk profile
- D. Relevant risk scenarios

Answer: A

Explanation:

The COBIT 2019 Design Guide identifies enterprise strategy and goals as foundational inputs when understanding enterprise context. A balanced scorecard is a structured mechanism that translates strategy into measurable enterprise goals across financial, customer, internal process, and learning dimensions.

Risk profiles and compliance requirements are important but are addressed in later design steps. The balanced scorecard provides a holistic view of enterprise priorities, ensuring governance design aligns with what the enterprise is trying to achieve.

The Design Guide stresses that governance systems must be designed to support enterprise goals, not just manage risks or ensure compliance. Therefore, understanding the enterprise's balanced scorecard is critical to establishing context before translating goals into governance and management objectives through the COBIT goals cascade.
