Answer: D

Explanation:
Section: Volume B

NEW QUESTION # 662

An enterprise has been focused on establishing an IT risk management framework. Which of the following should be the PRIMARY motivation behind this objective?

- A. Engaging executives in examining IT risk when developing policies.
- B. Promoting responsibility throughout the enterprise for managing IT risk.
- C. Maintaining a complete and accurate risk registry to belief manage IT risk
- D. Increasing the enterprise's risk tolerance level and risk appetite.

Answer: B

NEW QUESTION # 663

The CIO of a global technology company is considering introducing a bring your own device (BYOD) program. What should the CIO do FIRST?

- A. Focus on securing data and access to data.
- B. Ensure the infrastructure can meet BYOD requirements.
- C. Establish a business case.
- D. Define a clear and inclusive BYOD policy.

Answer: C

Explanation:
The CIO should first establish a business case for the BYOD program, because a business case is a document that outlines the rationale, objectives, benefits, costs, risks, and feasibility of a proposed project or initiative1.
A business case can help the CIO to justify the need and value of the BYOD program to the senior management and stakeholders, and to secure the necessary funding and resources for its implementation. A business case can also help the CIO to define the scope, requirements, and success criteria of the BYOD program, and to align it with the enterprise's strategy, goals, and governance framework2. According to ISACA's CGEIT Domain 2: IT Resources3, "the enterprise should have a clear business case for each IT investment decision that includes expected benefits, costs, risks and alignment with strategic objectives." Furthermore, according to ISACA's article on BYOD, "a business case is essential for any BYOD initiative as it helps to determine whether the benefits outweigh the costs and risks." Therefore, establishing a business case is the best first step for the CIO who is considering introducing a BYOD program.

NEW QUESTION # 664

An independent consultant has been hired to conduct an ad hoc audit of an enterprise's information security office with results reported to the IT governance committee and the board Which of the following is MOST important to provide to the consultant before the audit begins?
