We have free update for one year, that is to say, you can get free update version for 365 days after purchasing. In addition, we will pass guarantee and money back guarantee.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q25-Q30):

NEW QUESTION # 25

You want to apply a preset filter to a custom field so that it only shows valid values based on the value of another field. What do you use to apply predefined filter criteria for a field?

- A. Enable field property "Use relationship chooser" in the Advanced tab
- B. Enable field property "Enable for Template Field Setter" in the Advanced tab

- C. Load Relation types and Relation entries
- D. Define a Visibility Condition in the Conditions tab
- E. Populate the "Relation Name" and "NameTableConstraintFieldPath" in the Advanced tab

Answer: E

Explanation:

To filter a custom field's available values based on another field's value in SAP Ariba, you populate the "Relation Name" and "NameTableConstraintFieldPath" properties in the field's Advanced tab. This configuration links the field to a predefined relation type and specifies the constraint field used for filtering.

Simply loading relation types (B) is a prerequisite but does not configure filtering on the field itself. Visibility conditions (C) control whether a field is shown, not the filtering of its values. Enabling "Use relationship chooser" (D) is necessary but insufficient alone without defining the relation and constraint field. The "Enable for Template Field Setter" (E) option is unrelated to filtering. This filtering enables dynamic picklists where options depend on another field's selection, improving data accuracy and user experience.

NEW QUESTION # 26

Which of the following applies to Suite Integration?

- A. Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated.
- B. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.
- C. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution.
- D. Suite Integration represents the out-of-the-box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud.

Answer: A

Explanation:

Suite Integration in SAP Ariba refers to the native, out-of-the-box integration among SAP Ariba Strategic Sourcing Suite components such as sourcing, contracts, and supplier lifecycle. This integration ensures seamless workflows, shared master data (suppliers, users, commodity codes), and a unified user experience without manual intervention. It is a key benefit differentiating SAP Ariba from fragmented solutions. Manual third-party integrations or ERP integrations like S/4HANA are separate and not referred to as Suite Integration.

NEW QUESTION # 27

Which of the following classes are NOT frequently customized in SAP Ariba Strategic Sourcing solutions?

- A. ContractWorkspace
- B. AbstractDocument
- C. SourcingProject
- D. ExtendedAddressRep

Answer: D

NEW QUESTION # 28
