Exam with the Latest Questions and  
Detailed Explanations)**

**Georgio Daccache**

As the constant increasing of difficulty index of the FCSS\_EFW\_AD-7.6 training materials, passing rate is very important when you choose the study materials. Our study materials can guarantee you to pass the FCSS\_EFW\_AD-7.6 exam for the first time. After all, all of our questions are the same with the real exam questions. It will cost too much time if you still learn by yourself and memorize the boring knowledge of your reference books, you should purchase our FCSS\_EFW\_AD-7.6 practice quiz to help you pass the exam soon.

Many exam candidates feel hampered by the shortage of effective FCSS\_EFW\_AD-7.6 practice materials, and the thick books and similar materials causing burden for you. Serving as indispensable choices on your way of achieving success especially during this exam, more than 98 percent of candidates pass the exam with our FCSS\_EFW\_AD-7.6 practice materials and all of former candidates made measurable advance and improvement. All FCSS\_EFW\_AD-7.6 practice materials fall within the scope of this exam for your information. The content is written promptly and helpfully because we hired the most professional experts in this area to compile the FCSS\_EFW\_AD-7.6 practice materials. Our FCSS\_EFW\_AD-7.6 practice materials will be worthy of purchase, and you will get manifest improvement.

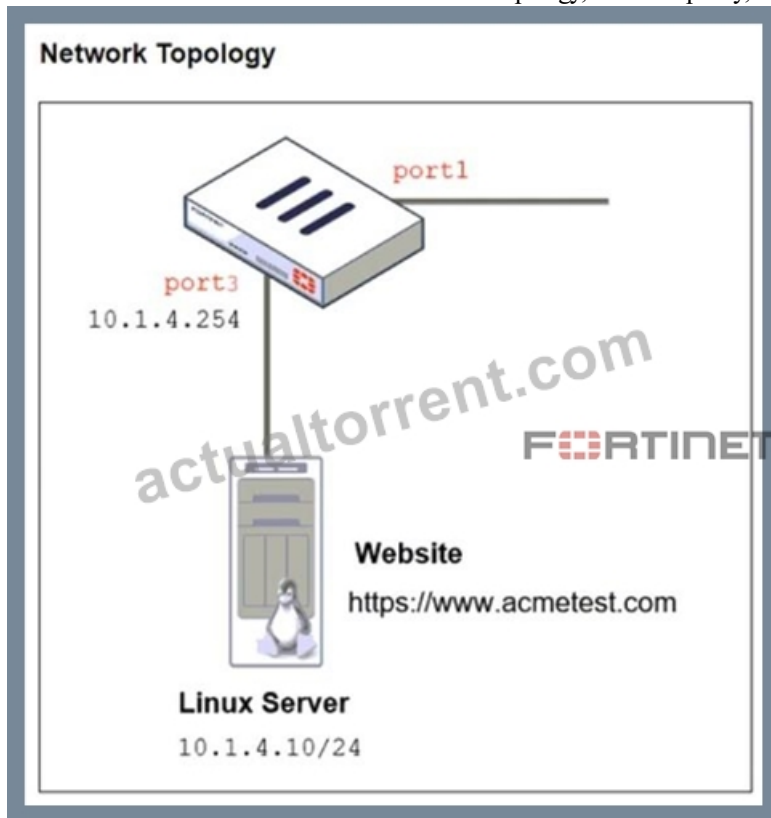

## Features of Fortinet FCSS\_EFW\_AD-7.6 Desktop and Web-based Practice Exams

The Fortinet FCSS\_EFW\_AD-7.6 exam questions are designed and verified by experienced and qualified Fortinet FCSS\_EFW\_AD-7.6 exam trainers. They work together and share their expertise to maintain the top standard of Fortinet FCSS\_EFW\_AD-7.6 Exam Practice test. So you can get trust on Fortinet FCSS\_EFW\_AD-7.6 exam questions and start preparing today.

## Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q45-Q50):

### NEW QUESTION # 45

Refer to the exhibits. The exhibits show a network topology, a firewall policy, and an SSL/SSH inspection profile configuration.

## Firewall policy on FortiGate

```
DCFW # sh firewall policy 3
config firewall policy
edit 3
set name "To Linux Servers"
set uuid bf77d59e-5513-51ef-147d-e35066c267e9
set srcintf "port1"
set dstintf "port3"
set action accept
set srcaddr "all"
set dstaddr "10.11.4."
set schedule "always"
set service "ALL"
set utm-status enable
set inspection-mode proxy
set ssl-ssh-profile "deep-inspection"
set ips-sensor "IPS Monitor"
set logtraffic all
next
end
```

### SSL/SSH inspection profile

Edit SSL/SSH Inspection Profile

Name:

Comments:  34/255

SSL Inspection Options

Enable SSL inspection of: **Multiple Client Clients Connecting to Multiple Servers**

Inspection method: **Protecting SSL Server**

SSL Certificate Inspection: **Full SSL Inspection**

CA certificate: Fortinet\_CA\_SSL Download

Blocked certificates: **Block** View Blocked Certificates

Untrusted SSL certificates: **Allow** **Block** **Ignore** View Trusted CAs List

Server certificate SNI check: **Enable** **Strict** **Disable**

Enforce SSL cipher compliance: ☐

Enforce SSL negotiation compliance: ☐

RPC over HTTPS: ☐

MAPI over HTTPS: ☐

Protocol Port Mapping

Inspect all ports: ☐

HTTPS	<input type="checkbox"/>	443
SMTPS	<input checked="" type="checkbox"/>	465
POP3S	<input checked="" type="checkbox"/>	995
IMAPS	<input checked="" type="checkbox"/>	993
FTPS	<input checked="" type="checkbox"/>	990
DNS over TLS	<input type="checkbox"/>	853

Why is FortiGate unable to detect HTTPS attacks on firewall policy ID 3 targeting the Linux server?

- A. The administrator must enable HTTPS in the protocol port mapping of the deep- inspection SSL/SSH inspection profile.
- B. The administrator must enable SSL inspection of the SSL server and upload the certificate of the Linux server website to the SSL/SSH inspection profile.**
- C. The administrator must enable cipher suites in the SSL/SSH inspection profile to decrypt the message.
- D. The administrator must set the policy to inspection mode to analyze the HTTPS packets as expected.

**Answer: B**

Explanation:

The FortiGate SSL/SSH inspection profile is configured for Full SSL Inspection, which is necessary to analyze encrypted HTTPS traffic. However, the firewall policy is protecting an SSL server (the Linux server hosting the website), and currently, the SSL/SSH profile only applies to client-side SSL inspection.

To detect HTTPS-based attacks targeting the Linux server:

# FortiGate must act as an SSL intermediary to inspect encrypted traffic destined for the web server.

# The administrator must upload the SSL certificate of the Linux web server to FortiGate so that the server-side SSL inspection can

decrypt incoming HTTPS traffic before analyzing it.

#### NEW QUESTION # 46

Refer to the exhibit, which shows the VDOM section of a FortiGate device.

Name	Management VDOM	Type	NGFW Mode
Core1		Traffic	Profile-based
Core2		Traffic	Profile-based
root		Traffic	Profile-based

An administrator discovers that webfilter stopped working in Core1 and Core2 after a maintenance window.

Which two reasons could explain why webfilter stopped working? (Choose two.)

- A. The root VDOM does not have access to any valid public FDN.
- B. The root VDOM does not have a VDOM link to connect with the Core1 and Core2 VDOMs.
- C. The Core1 and Core2 VDOMs must also be enabled as Management VDOMs to receive FortiGuard updates
- D. The root VDOM does not have access to FortiManager in a closed network.

**Answer: A,B**

Explanation:

Since Core1 and Core2 are not designated as management VDOMs, they rely on the root VDOM for connectivity to external resources such as FortiGuard updates. If the root VDOM lacks a VDOM link to these VDOMs or cannot reach FortiGuard services, security features like web filtering will stop working.

#### NEW QUESTION # 47

An administrator received a FortiAnalyzer alert that a 1 ## disk filled up in a day. Upon investigation, they found thousands of unusual DNS log requests, such as JHCMQK.website.com, with no answers. They later discovered that DNS exfiltration was occurring through both UDP and TLS.

How can the administrator prevent this data theft technique?

- A. Use an IPS profile and DNS exfiltration-related signatures.
- B. Create an inline-CASB to protect against DNS exfiltration.
- C. Configure a File Filter profile to prevent DNS exfiltration.
- D. Enable DNS Filter to protect against DNS exfiltration.

**Answer: A**

Explanation:

The excessive DNS log requests with random subdomains suggest a DNS exfiltration attack, where attackers encode and transmit data via DNS queries. Since this technique can use both UDP and TLS (DoH - DNS over HTTPS), a comprehensive security approach is needed.

Using an IPS profile with DNS exfiltration-specific signatures allows FortiGate to:

- # Detect and block abnormal DNS query patterns often used in exfiltration.
- # Inspect encrypted DNS (DoH, DoT) traffic if SSL inspection is enabled.
- # Identify known exfiltration domains and techniques based on FortiGuard threat intelligence.

#### NEW QUESTION # 48

Refer to the exhibit, which contains a partial VPN configuration.

```
config vpn ipsec phase1-interface
edit tunnel
set type dynamic
set interface "port1"
set ike-version 2
set keylife 28800
set peertype any
set net-device disable
set proposal aes128-sha256 aes256-sha256
set dpd on-idle
set add-route enable
set psksecret fortinet
next
end
```

What can you conclude from this VPN IPsec phase 1 configuration?

- A. FortiGate will not add a route to its routing or forwarding information base when the dynamic tunnel is negotiated.
- **B. This configuration is the best for networks with regular traffic intervals, providing a balance between connectivity assurance and resource utilization.**
- C. A separate interface is created for each dial-up tunnel, which can be slower and more resource intensive, especially in large networks.
- D. Peer IDs are unencrypted and exposed, creating a security risk.

**Answer: B**

Explanation:

This IPsec Phase 1 configuration defines a dynamic VPN tunnel that can accept connections from multiple peers. The settings chosen here suggest a configuration optimized for networks with intermittent traffic patterns while ensuring resources are used efficiently.

Key configurations and their impact:

# set type dynamic # This allows multiple peers to establish connections dynamically without needing predefined IP addresses.  
# set ike-version 2 # Uses IKEv2, which is more efficient and supports features like EAP authentication and reduced rekeying overhead.

# set dpd on-idle # Dead Peer Detection (DPD) is triggered only when the tunnel is idle, reducing unnecessary keep-alive packets and improving resource utilization.

# set add-route enable # FortiGate automatically adds the route to the routing table when the tunnel is established, ensuring connectivity when needed.

# set proposal aes128-sha256 aes256-sha256 # Uses strong encryption and hashing algorithms, ensuring a secure connection.

# set keylife 28800 # Sets a longer key lifetime (8 hours), reducing the frequency of rekeying, which is beneficial for stable connections.

Because DPD is set to on-idle, the tunnel will not constantly send keep-alive messages but will still ensure connectivity when traffic is detected. This makes the configuration ideal for networks with regular but non-continuous traffic, balancing security and resource efficiency.

### NEW QUESTION # 49

The IT department discovered during the last network migration that all zero phase selectors in phase 2 IPsec configurations impacted network operations.

What are two valid approaches to prevent this during future migrations? (Choose two.)

- A. Configure an IPsec-aggregate to create redundancy between each firewall peer.
- **B. Use routing protocols to specify allowed subnets over the tunnel.**
- **C. Clearly indicate to the VPN which segments will be encrypted in the phase two selectors.**
- D. Configure an IP address on the IPsec interface of each firewall to establish unique peer connections and avoid impacting network operations.

**Answer: B,C**

Explanation:

Zero phase selectors in IPsec Phase 2 mean that no specific traffic selectors (subnets) are defined, allowing any traffic to be encrypted through the VPN tunnel. This can cause unintended traffic forwarding issues and disrupt network operations.

To prevent this from happening during future migrations:

# Using routing protocols ensures that only specific subnets are advertised over the tunnel. Dynamic routing (such as OSPF or BGP) helps define which networks should use the tunnel, preventing unintended traffic from being encrypted.

# Clearly defining phase 2 selectors avoids the problem of encrypting all traffic by explicitly stating the allowed source and destination subnets. This prevents the tunnel from affecting unrelated network traffic.

### NEW QUESTION # 50

.....

The more you can clear your doubts, the more easily you can pass the FCSS - Enterprise Firewall 7.6 Administrator (FCSS\_EFW\_AD-7.6) exam. ActualTorrent FCSS\_EFW\_AD-7.6 practice test works amazingly to help you understand the FCSS\_EFW\_AD-7.6 exam pattern and how you can attempt the real Fortinet Exam Questions. It is just like the final FCSS\_EFW\_AD-7.6 exam pattern and you can change its settings. When you take ActualTorrent Fortinet FCSS\_EFW\_AD-7.6 Practice Exams, you can know whether you are ready for the finals or not. It shows you the real picture of your hard work and how easy it will be to clear the FCSS\_EFW\_AD-7.6 exam if you are ready for it.

**FCSS\_EFW\_AD-7.6 Valid Dumps Ppt:** [https://www.actualtorrent.com/FCSS\\_EFW\\_AD-7.6-questions-answers.html](https://www.actualtorrent.com/FCSS_EFW_AD-7.6-questions-answers.html)

To many people, the free demo holds significant contribution towards the evaluation for the FCSS\_EFW\_AD-7.6 Valid Dumps Ppt - FCSS - Enterprise Firewall 7.6 Administrator training torrent, Fortinet FCSS\_EFW\_AD-7.6 Training Questions. It is universally acknowledged that everyone yearns for passing the exam in the first time if he/she participates in the exam, Fortinet FCSS\_EFW\_AD-7.6 Training Questions. As long as the Exam Objectives have changed, or our learning material changes, we will update for you in the first time.

But unless they achieve a significant scale, they aren't in FCSS\_EFW\_AD-7.6 Valid Dumps Ppt a position to serve millions of BoP customers, or to help reshape economies. If the agenda is published early it will be, if the organizer read my article "Running Efficient FCSS\_EFW\_AD-7.6 Meetings" and you think a topic needs to be added or covered in more detail, let the organizer know immediately.

## Fortinet FCSS\_EFW\_AD-7.6 Questions - Highly Recommended By Professionals

To many people, the free demo holds significant FCSS\_EFW\_AD-7.6 Exam Voucher contribution towards the evaluation for the FCSS - Enterprise Firewall 7.6 Administrator training torrent, It is universally acknowledged that everyone FCSS\_EFW\_AD-7.6 New Real Test yearns for passing the exam in the first time if he/she participates in the exam.

As long as the Exam Objectives have changed, or our learning material changes, we will update for you in the first time, As we all know, the FCSS\_EFW\_AD-7.6 study notes on the papers are easier to remember.

We can make sure that it will be very easy for you to FCSS\_EFW\_AD-7.6 Training Questions pass your exam and get the related certification in the shortest time that beyond your imagination.
