Authoritative Fortinet FCP_FML_AD-7.4 Reliable Dump and Useful FCP_FML_AD-7.4 Latest Test Simulator

We have free demos of our FCP_FML_AD-7.4 exam questions for your information and the demos offer details of real exam contents. All contents of FCP_FML_AD-7.4 practice quiz contain what need to be mastered. And not only the content is contained that you can free download from the website, also you can find that the displays of the FCP_FML_AD-7.4 Study Materials can be tried as well for we have three versions, according we also have three kinds of free demos.

Fortinet FCP_FML_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	Email Security: This section of the exam measures skills of a Network Security Administrator and deals with implementing security controls to filter and manage email threats. Candidates must configure session-based filtering, spam detection methods, malware protection, APT mitigation, and content filtering. The section also includes email archiving configurations for compliance and storage.
Topic 2	Email Flow and Authentication: This section of the exam measures skills of a Messaging Security Engineer and focuses on configuring FortiMail to handle email flow securely. It includes enabling and matching authentication protocols, setting up secure MTA features, and implementing access control, IP policies, and recipient-based policies to control mail delivery and security.
Topic 3	Encryption: This section of the exam measures skills of a Messaging Security Engineer and addresses the implementation of encryption methods in FortiMail. It covers traditional SMTP encryption and identity-based encryption (IBE). Candidates are expected to configure these technologies and manage IBE users for secure email communication.
Topic 4	Server Mode and Transparent Mode: This section of the exam measures skills of a Network Security Administrator and explains how to deploy and manage FortiMail in different operation modes. It includes configuring server mode to handle mail directly and deploying FortiMail in transparent mode where it acts as a gateway to filter email traffic without altering the existing mail infrastructure.
Topic 5	Initial Deployment and Basic Configuration: This section of the exam measures skills of a Network Security Administrator and covers the foundational setup of FortiMail. It includes understanding SMTP and email flow, performing initial configurations such as selecting operation mode, system settings, and defining protected domains. It also involves deploying FortiMail in high-availability clusters to ensure service continuity.

Fortinet FCP - FortiMail 7.4 Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which are FortiMail operating modes? (Choose three.)

- A. Transparent mode
- B. NAT/Route mode
- C. Server mode
- D. Proxy mode
- E. Gateway mode

Answer: A,C,E

Explanation:

FortiMail supports Transparent, Server, and Gateway modes. Proxy and NAT/Route are not valid FortiMail operating modes.

NEW QUESTION # 42

What are Two reasons for having reliable DNS servers configured on FortiMail? (Choose two.)

- A. HA synchronization
- B. Firmware updates
- C. FortiGuard Connectivity
- D. Email transmission

Answer: C,D

NEW QUESTION # 43

Which two factors are required for an active-active HA configuration of FortiMail in server mode? (Choose two.)

- A. Devices must be deployed behind a load balancer.
- B. Mail data must be stored on a NAS server.
- C. A primary must be designated to initially process email.
- D. Service monitoring must be configured for remote SMTP.

Answer: A,B

Explanation:

FortiMail in server-mode active-active requires a shared mail store (e.g. NAS) so both units see the same data, and an external load-balancer (or DNS round-robin) to distribute SMTP sessions across the pair.

NEW QUESTION # 44

While testing outbound MTA functionality, an administrator discovers that all outbound email is being processed using policy ID 1:2:0:SYSTEM.

What are two possible reasons why the third policy ID value is 0? (Choose two.)

- A. Outbound email is being rejected.
- B. There are no access delivery rules configured for outbound email.
- C. There are no outgoing recipient policies configured.
- D. IP policy ID 2 has the exclusive flag set.

Answer: C,D

Explanation:

There are no outgoing recipient policies configured.

A "0" in the recipient-policy slot means FortiMail didn't find any matching recipient policy for outbound mail, which happens if none are defined.

IP policy ID 2 has the exclusive flag set.

With "Take precedence over recipient based policy match" enabled on IP policy 2, FortiMail skips recipient-policy lookup and leaves that slot at 0.

NEW QUESTION # 45

Which statement about how impersonation analysis identifies spoofed email addresses is correct?

- A. It maps the display name to the correct recipient email address
- **B. It uses DMARC validation to detect spoofed addresses.**
- C. It uses SPF validation to detect spoofed addresses.
- D. It uses behavior analysis to detect spoofed addresses.

Answer: B

NEW QUESTION # 46
