NEW QUESTION # 1121

An input to the Collect Requirements process is the:

- A. stakeholder register.
- B. project scope statement.
- C. requirements management plan.
- D. project management plan.

Answer: A

Explanation:

Section: Volume E

Explanation:

5.2.1.5 Stakeholder Register

Described in Section 13.1.3.1. The stakeholder register is used to identify stakeholders who can provide information on the requirements. The stakeholder register also captures major requirements and main expectations stakeholders may have for the project.

13.1.3.1 Stakeholder Register

The main output of the Identify Stakeholders process is the stakeholder register. This contains all details related to the identified stakeholders including, but not limited to:

■ Identification information. Name, organizational position, location, role in the project, contact information;

■ Assessment information. Major requirements, main expectations, potential influence in the project, phase

■ in the life cycle with the most interest; and

■ Stakeholder classification. Internal/external, supporter/neutral/resistor, etc.

The stakeholder register should be consulted and updated on a regular basis, as stakeholders may change- or new ones identified- throughout the life cycle of the project.

Process: 5.2 Collect Requirements

Definition: The process of determining, documenting, and managing stakeholder needs and requirements to meet project objectives.

Key Benefit: The key benefit of this process is that it provides the basis for defining and managing the project scope including product scope.

NEW QUESTION # 1124

Which of the following is an estimating technique that uses the values of parameters from previous similar projects for estimating the same parameter or measure for a current project?

- A. Reserve analysis
- B. Three-point estimating
- C. Parametric estimating
- D. Analogous estimating

Answer: D

Explanation:

Section: Volume E

Explanation:

7.2.2.2 Analogous Estimating

Analogous cost estimating uses the values such as scope, cost, budget, and duration or measures of scale such as size, weight, and complexity from a previous, similar project as the basis for estimating the same parameter or measurement for a current project.

When estimating costs, this technique relies on the actual cost of previous, similar projects as the basis for estimating the cost of the current project. It is a gross value estimating approach, sometimes adjusted for known differences in project complexity.

Analogous cost estimating is frequently used to estimate a value when there is a limited amount of detailed information about the project, for example, in the early phases of a project. Analogous cost estimating uses historical information and expert judgment
