## Fast Download Microsoft Training AZ-305 For Exam With Interactive Test Engine & Top Reliable AZ-305 Test Labs

Do you need to find a high paying job for yourself? Well, by passing the AZ-305, you will be able to get your dream job. Make sure that you are buying our AZ-305 brain dumps pack so you can check out all the products that will help you come up with a better solution. Our AZ-305 Exam Material includes all Microsoft certification exams detailed questions & answers files, We offer latest AZ-305 certifications preparation material which comes with guarantee that you will pass AZ-305 exams in the first attempt.

Microsoft AZ-305 certification exam is a part of the Microsoft Certified: Azure Solutions Architect Expert certification path. The Solutions Architect Expert certification path is designed for professionals who want to demonstrate their expertise in designing and implementing solutions that run on Azure. Designing Microsoft Azure Infrastructure Solutions certification path includes two exams: AZ-303: Microsoft Azure Architect Technologies and AZ-304: Microsoft Azure Architect Design.

To be eligible for the AZ-305 Exam, you should have a strong understanding of core Azure services and experience in designing solutions that use them. You should also be familiar with Azure governance, security, and compliance features, as well as Azure Resource Manager templates and Azure DevOps. Additionally, you should have experience in designing solutions that integrate with on-premises infrastructure and hybrid scenarios.

## Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q243-Q248):

### NEW QUESTION # 243

You have an Azure subscription that contains the resources shown in the following table.

Log files from App1 are ingested to App 1 Logs. An average of 120 GB of log data is ingested per day.

You configure an Azure Monitor alert that will be triggered if the App1 logs contain error messages.

You need to minimize the Log Analytics costs associated with App1. The solution must meet the following requirements:

- \* Ensure that all the log files from App1 are ingested to App 1 Logs.

- \* Minimize the impact on the Azure Monitor alert.

Which resource should you modify, and which modification should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

### NEW QUESTION # 244

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy various Azure App Service instances that will use Azure SQL databases. The App Service instances will be deployed at the same time as the Azure SQL databases.

The company has a regulatory requirement to deploy the App Service instances only to specific Azure regions.

The resources for the App Service instances must reside in the same region.

You need to recommend a solution to meet the regulatory requirement.

Solution: You recommend using an Azure policy initiative to enforce the location.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

Explanation:

Azure Resource Policy Definitions can be used which can be applied to a specific Resource Group with the App Service instances.

<https://docs.microsoft.com/en-us/azure/governance/policy/overview>

### NEW QUESTION # 245

You plan to deploy a network-intensive application to several Azure virtual machines.

You need to recommend a solution that meets the following requirements:

Minimizes the use of the virtual machine processors to transfer data

Minimizes network latency

Which virtual machine size and feature should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/sizes-hpc#h-series>

### NEW QUESTION # 246

You have an Azure subscription that contains a virtual network named VNET1 and 10 virtual machines. The virtual machines are connected to VNET1.

You need to design a solution to manage the virtual machines from the internet. The solution must meet the following requirements:

\* Incoming connections to the virtual machines must be authenticated by using Azure Multi-Factor Authentication (MFA) before network connectivity is allowed.

\* Incoming connections must use TLS and connect to TCP port 443.

\* The solution must support RDP and SSH.

What should you Include In the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 247

Your on-premises network contains a file server named Server1 that stores 500 GB of data.

You need to use Azure Data Factory to copy the data from Server1 to Azure Storage.

You add a new data factory.

What should you do next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:
