New EAEP2201 Study Materials - EAEP2201 Valid Test Vce

Different from the common question bank on the market, EAEP2201 actual exam are scientific and efficient learning system for a variety of professional knowledge that is recognized by many industry experts. We have carried out the reforms according to the development of the digital devices not only on the content of our EAEP2201 Exam Torrent, but also on the layouts since we provide the latest and precise information to our customers, so there is no doubt you will pass the EAEP2201 exam with our latest EAEP2201 exam questions.

Esri Enterprise Administration Professional 2201 Sample Questions (Q24-Q29):

NEW QUESTION # 24

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Use ArcGIS Monitor to capture desired information over a period of time in a report.
- B. Open ArcGIS Server statistics to create a report for commonly used items.
- **C. Run usage reports in Portal for ArcGIS to determine the effect on the organization.**

Answer: C

Explanation:

Portal for ArcGIS provides built-in usage reports that allow administrators to monitor how members are using, sharing, and contributing resources. These reports offer insights into content creation, usage patterns, and group activities. Administrators can

generate and export these reports in tabular formats for further analysis.

ArcGIS Server statistics focus on service-level metrics and do not provide detailed user or group content statistics. ArcGIS Monitor captures system performance metrics but is not designed for detailed content usage analysis by users or groups.

Reference Source: ArcGIS Enterprise documentation on usage reports in Portal for ArcGIS.

NEW QUESTION # 25

An organization's portal license file provides for 30 Editor user type and 15 GIS Professional user type licenses. After performing a needs assessment, the GIS administrator discovers that the organization requires 10 Viewer, 40 Editor, and 20 GIS Professional user type licenses.

When downloading a new license file, how many of each user type license should the administrator specify?

- A. 10 Viewer, 40 Editor, and 20 GIS Professional user type licenses
- B. 40 Editor and 20 GIS Professional user type licenses
- C. 10 Viewer, 10 Editor, and 5 GIS Professional user type licenses
- D. 30 Viewer, 30 Editor, and 15 GIS Professional user type licenses

Answer: A

Explanation:

When downloading a new license file from My Esri to accommodate the organization's user needs, administrators should request the exact quantities identified in the internal needs assessment:

* 10 Viewer

* 40 Editor

* 20 GIS Professional

These quantities will be used to generate the new license file, which reflects the actual number of entitlements needed. Esri licensing is flexible in this regard, and the administrator can request different counts per type within their entitlements.

From the ArcGIS Enterprise Licensing documentation:

"When generating a new license file for your deployment, you can specify the number of each user type and role needed. The license file will reflect these values, and must match the needs of your organization."

* Option A provides insufficient licenses.

* Option B omits the necessary Viewer licenses.

* Option D reflects original entitlements, not the updated requirement.

Reference: ArcGIS Enterprise Administration - User Types and Licensing Model

NEW QUESTION # 26

A GIS administrator is publishing a feature service. All 2,400 features in the dataset must be able to be returned from a single request to the service.

Which action should the administrator perform?

- A. Enable cached drawing mode
- B. Adjust pooling to handle the request
- C. Increase the max record count
- D. Use service defaults for publishing

Answer: C

Explanation:

By default, feature services limit the number of records returned in a single request (usually set to 1,000). To allow all 2,400 features to be returned in one call, the administrator needs to increase the

"Maximum number of records returned by the server" (maxRecordCount) setting during or after publishing.

From the ArcGIS Server documentation:

"The maxRecordCount property defines the number of records returned by the server in a single request. To return all features, this value must be increased accordingly."

* Option A (adjust pooling) relates to concurrency and scalability, not data retrieval limits.

* Option C would keep the default setting of 1,000, which would not meet the requirement.

* Option D relates to visual performance, not record retrieval.

Reference: ArcGIS Server - Feature Service Settings and Tuning for Performance

NEW QUESTION # 27

A client requires an ArcGIS Server site with the ability to:

- * Serve cached image services updated annually
- * Serve dynamic feature services from a PostgreSQL enterprise geodatabase Which ArcGIS Server license role is required?

- A. GIS Server
- B. GeoAnalytics Server
- **C. Image Server**
- D. Mission Server

Answer: C

Explanation:

To publish and serve cached image services, the ArcGIS Server must be licensed as an Image Server. This licensing role is designed specifically for serving raster datasets, image services, and cache-based imagery workflows.

From ArcGIS Server documentation:

"The Image Server role is required to publish and manage image services, including those that serve pre-generated tile caches and support raster analytics."

* Option A (GIS Server) supports feature and map services, but not cached imagery.

* Option C (Mission Server) is for real-time operations, unrelated to imagery or features.

Reference: ArcGIS Enterprise - Server Roles and Functionality (Image Server)

NEW QUESTION # 28

A GIS administrator receives reports of slow-performing services and notices that disk space is filling up after recent troubleshooting sessions.

In those sessions, the following tasks were performed:

- * Services added to the shared instance pool
- * Log retention settings reduced
- * Log level set to Debug
- * ArcGIS Server machine restarted
- * An additional ArcGIS Server site federated

What is causing this slow performance?

- A. Restarting ArcGIS Server
- B. Adjusting the log level to Debug
- C. Federating the additional ArcGIS Server site
- **D. Additional services in the shared instance pool**

Answer: D

NEW QUESTION # 29

.....

Here, we want to describe the EAEP2201 PC test engine for all of you. EAEP2201 PC test engine is suitable for all the windows system, which is very convenient to be installed. Besides, it does not need to install any assistant software. What's more, our EAEP2201 PC test engine is virus-free and safe which can be installed on your device. With the Esri EAEP2201 simulate test, you can have a test just like you are in the real test environment. Dear, everyone, practice more frequently, you will success finally.
