Quiz Cyber AB - Valid CMMC-CCA - Regualer Certified CMMC Assessor (CCA) Exam Update

Different from other similar education platforms, the CMMC-CCA quiz guide will allocate materials for multi-plate distribution, rather than random accumulation without classification. The CMMC-CCA prepare torrent is absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the CMMC-CCA test material more suitable for users of various cultural levels. And the CMMC-CCA test material provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.

Topic 2	<ul style="list-style-type: none"> • CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.
Topic 3	<ul style="list-style-type: none"> • Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Topic 4	<ul style="list-style-type: none"> • Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

During a CMMC assessment, a CCA took home some documents from the OSC's facility without their knowledge. The documents contained confidential, proprietary information (jet engine designs). After a few days, the OSC realized the documents were missing. Upon realizing the mistake, the CCA returned the document and informed the Lead Assessor. One year later, the information appeared online. The OSC believes the CCA duplicated the information and kept a copy for themselves. Angered by the situation, the OSC sues the CCA for IP theft. Under the CoPC, what action should the CCA take?

- A. Ask their C3PAO for legal assistance.
- B. Plead guilty to receive a reduced fine.
- **C. Inform the Cyber AB within 30 days.**
- D. None; they should only defend themselves in court.

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

The CoPC requires CCAs to report legal actions like lawsuits related to their CMMC role to the Cyber AB within 30 days, ensuring transparency and accountability. Option A (pleading guilty) is a legal strategy, not a CoPC requirement. Option B (doing nothing) ignores reporting obligations. Option D (asking C3PAO) is not mandated by CoPC. Option C is the required action.

Extract from Official Document (CoPC):

* Paragraph 3.6(4) - Lawful and Ethical Practices (pg. 8): "Report to the Cyber AB within 30 days any legal actions, such as being sued for larceny, related to your role in the CMMC ecosystem." References:

CMMC Code of Professional Conduct, Paragraph 3.6(4).

NEW QUESTION # 33

An OSC has contacted your C3PAO organization for a prospective CMMC Level 2 assessment. You have been selected to lead the Assessment Team. When ascertaining the assessment conditions and requirements, you discuss the prospective CMMC assessment scope with the OSC. Before proceeding to Phase 2 of the CMMC assessment process, the OSC must complete the following steps of its high-level scoping process, EXCEPT?

- **A. Evaluate Model Non-Duplication.**
- B. Propose the scope of the CMMC assessment that will be evaluated by the Lead Assessor and validated by the C3PAO.
- C. Identify and take inventory of the various categories of CMMC assets contained in the networked environment.
- D. Establish the CMMC Assessment Scope of their networked environment.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

The CMMC Assessment Process (CAP) outlines the OSC's scoping steps in Phase 1: identifying assets (Option A), establishing the scope (Option C), and proposing it for validation (Option B). "Evaluate Model Non-Duplication" (Option D) is not a defined step in the CAP or scoping guide, making it the exception. D is correct.

Reference:

CMMC Assessment Process (CAP) v1.0, Section 2.1 (Phase 1: Scoping), p. 8: "OSC steps include asset identification and scope proposal."

NEW QUESTION # 34

During scoping discussions with a Lead Assessor, the OSC mentions that there are several connected systems within the organization's network. How should the Lead Assessor consider connected systems in the scoping of the CMMC assessment?

- A. Only internally connected systems directly handling FCI and/or CUI are in scope.
- B. Connected systems are never in scope unless specifically requested by the OSC.
- C. Connected systems are only in scope if they directly transmit FCI and/or CUI.
- D. Connected systems would be considered in scope for the assessment if the systems could impact the security of the CUI (or FCI) environment or if they store, process, or transmit CUI (or FCI) within the organization's network.

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

The CMMC Assessment Scope - Level 2 requires that connected systems be included in the scope if they process, store, or transmit CUI/FCI or could impact the security of the CUI/FCI environment (e.g., as Security Protection Assets). This broader criterion ensures a comprehensive security evaluation, unlike the narrower focuses of Options B and C. Option A contradicts the guidance by deferring to the OSC alone. D aligns with the scoping requirements, capturing both direct handling and potential security influence.

Reference:

CMMC Assessment Scope - Level 2, Section 2.2 (Scoping Considerations), p. 4: "Connected systems impacting CUI/FCI security or handling CUI/FCI are in scope."

NEW QUESTION # 35

Your C3PAO has selected you as the Lead Assessor for the Assessment Team assessing an OSC's implementation of CMMC practices. Part of this assessment includes validating the OSC's CMMC assessment scope. Which of the following is NOT a factor to consider when determining which assets are in scope?

- A. Government assets transmitting CUI into the OSC's systems.
- B. Organizational assets that process CUI or FCI.
- C. Assets that secure the CUI or FCI storage location.
- D. Third-party assets that store CUI or FCI.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

The CMMC Assessment Scope - Level 2 includes assets under the OSC's control that process, store, or transmit CUI/FCI (Option B), secure these assets (Option C), or are managed by third parties (e.g., ESPs) handling CUI/FCI (Option D). Government assets transmitting CUI into the OSC's systems (Option A) are out of scope, as they fall under a separate government authorization boundary and are not managed by the OSC. The scoping guide explicitly excludes such assets, making A the correct answer.

Reference:

CMMC Assessment Scope - Level 2, Section 2.3.5 (Out-of-Scope Assets), p. 7: "Government assets transmitting CUI into OSC systems are out of scope."

NEW QUESTION # 36

A company employs an encrypted VPN to enhance confidentiality over remote connections. The CCA reads a document describing the VPN. It states the VPN allows automated monitoring and control of remote access sessions, helps detect cyberattacks, and supports auditing of remote access to ensure compliance with CMMC requirements.

What document is the CCA MOST LIKELY reviewing to see how these VPNs are controlled and monitored?

- A. Media Protection Policy
- B. Configuration Management Policy
- C. Audit and Accountability Policy
- **D. Access Control Policy**

Answer: D

Explanation:

The Access Control (AC) domain governs remote access, privileged access, and VPN controls. Documents describing how VPNs are controlled, monitored, and restricted fall under the Access Control Policy.

Extract:

"Access Control practices include the management of remote connections, monitoring of sessions, and enforcement of VPN controls." Thus, the correct document is the Access Control Policy.

Reference: CMMC Assessment Guide - Level 2, AC.L2-3.1.x.

NEW QUESTION # 37

.....

All time and energy you devoted to the CMMC-CCA preparation quiz is worthwhile. With passing rate up to 98 percent and above, our CMMC-CCA practice materials are highly recommended among exam candidates. So their validity and authority are unquestionable. Our CMMC-CCA Learning Materials are just starting points for exam candidates, and you may meet several challenging tasks or exams in the future about computer knowledge, we can still offer help. Need any help, please contact with us again!
