## DEP-2025 Reliable Exam Online, DEP-2025 Free Vce Dumps

No matter how good the product is users will encounter some difficult problems in the process of use, and how to deal with these problems quickly becomes a standard to test the level of product service. Our DEP-2025 study materials are not exceptional also, in order to enjoy the best product experience, as long as the user is in use process found any problem, can timely feedback to us, for the first time you check our DEP-2025 Study Materials performance, professional maintenance staff to help users solve problems.

### Apple Deployment and Management Exam Sample Questions (Q66-Q71):

#### NEW QUESTION # 66

What's required to set up Shared iPad?

- A. User Enrollment
- B. Apple Configurator
- **C. An MDM solution**
- D. A VPN configuration

**Answer: C**

Explanation:

Setting up Shared iPad requires an MDM solution to configure the feature, assign Managed Apple IDs, and manage user sessions. The MDM applies a configuration profile specifying Shared iPad settings (e.g., temporary session mode or user-specific logins) and integrates with Apple School Manager or Apple Business Manager. Apple Configurator (option B) can supervise devices but isn't required for Shared iPad setup. User Enrollment (option C) is for BYOD, not shared devices. A VPN configuration (option D) is unrelated. The Apple Platform Deployment Guide mandates MDM for Shared iPad deployment.

#### NEW QUESTION # 67

A Mac user deferred a managed software update after the deadline for the update passed. What happens next?

- **A. The update automatically installs without the user's intervention if the deadline is missed**
- B. The user receives a reminder that they can still defer the update for up to 30 days
- C. All update notifications are disabled to reduce user distraction
- D. The user receives notifications that the update is overdue and needs immediate attention

**Answer: A**

Explanation:

Post-deadline, updates install automatically. The Mobile Device Management Protocol Reference states, "If a user defers a managed software update past the MDM-enforced deadline, macOS will automatically install it to ensure compliance." References: Mobile Device Management Protocol Reference, "Software Updates" section. macOS Deployment Reference, "Update Enforcement" section.

#### NEW QUESTION # 68

What's the benefit of using Apple Business Manager?

- **A. Enables device and content management**
- B. Improves network performance
- C. Allows personalization
- D. Separates personal and managed data

**Answer: A**

Explanation:

Apple Business Manager (ABM) enables device and content management by providing a portal to enroll devices via ADE, purchase and distribute apps/books through Managed Distribution, and manage user accounts. This centralizes organizational control over Apple deployments. Personalization (option A) is user-driven, not an ABM benefit. Network performance (option C) is enhanced by content caching, not ABM. Data separation (option D) is a User Enrollment feature. The Apple Business Manager User Guide highlights device and content management as ABM's core benefit. Reference: Apple Business Manager User Guide (Section: Overview).

#### NEW QUESTION # 69

What's the benefit of using configuration profiles?

- **A. Enables device customization**
- B. Improves network performance
- C. Allows personalization
- D. Separates personal and managed data

**Answer: A**

Explanation:

Configuration profiles enable device customization by allowing IT administrators to define settings (e.g., Wi-Fi, VPN, security policies) tailored to organizational needs, deployed via MDM or manually. Personalization (option A) is user-driven, often restricted by profiles. Network performance (option C) is unrelated, and data separation (option D) is a User Enrollment feature. The Apple Platform Deployment Guide emphasizes customization as a key benefit of profiles.

#### NEW QUESTION # 70

You're resetting several iPad devices for new users. The iPad devices don't progress past the Apple logo after restart. Which of these should you do?

- A. Use Apple Configurator for iPhone to restore the iPad devices
- B. Send the Return to Service command from the MDM solution
- C. Get a bypass code from the MDM administrator to clear Activation Lock
- **D. Use Apple Configurator for Mac to restore the iPad devices**

**Answer: D**

Explanation:

Apple Configurator for Mac resolves boot issues. The Apple Configurator User Guide states, "If an iPad is stuck on the Apple logo, connect it to a Mac running Apple Configurator to perform a full restore." Option A doesn't exist, and B and C don't address this issue directly.

Reference:

Apple Configurator User Guide, "Restoring Devices" section.  
Apple Platform Deployment Guide, "Troubleshooting Devices" section.

## NEW QUESTION # 71

.....

This kind of polished approach is beneficial for a commendable grade in the Apple Deployment and Management Exam (DEP-2025) exam. While attempting the exam, take heed of the clock ticking, so that you manage the Apple DEP-2025 questions in a time-efficient way. Even if you are completely sure of the correct answer to a question, first eliminate the incorrect ones, so that you may prevent blunders due to human error.
