

C_TS422_2023최신덤프샘플문제다운완벽한시험덤프 데모문제다운

2026 Itexamdump 최신 C_TS422_2023 PDF 버전 시험 문제집과 C_TS422_2023 시험 문제 및 답변 무료 공유:
<https://drive.google.com/open?id=1NyL42ipSs2TtBopj3L2TKN4Y1iHHQCK4>

Itexamdump의SAP인증 C_TS422_2023덤프의 인지도는 아주 높습니다. 인지도 높은 원인은SAP인증 C_TS422_2023덤프의 시험적중율이 높고 가격이 친근하고 구매후 서비스가 끝내주기 때문입니다. Itexamdump의SAP인증 C_TS422_2023덤프로SAP인증 C_TS422_2023시험에 도전해보세요.

SAP C_TS422_2023 시험요강:

주제	소개
주제 1	• Process Orders in SAP S • 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.
주제 2	• Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
주제 3	• Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
주제 4	• Introduction to SAP S • 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S • 4HANA, its main components, business applications, and user experience strategy.

주제 5	- Capacity Planning in SAP S 4HANA: This section covers a discussion of SAP S 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
주제 6	- Introduction to SAP S 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.
주제 7	- Demand Management in SAP S 4HANA: This section covers a comparison of production methods in various manufacturing environments.

C_TS422_2023최신 시험 예상문제모음, C_TS422_2023최고품질 인증시험 공부자료

SAP C_TS422_2023 시험탈락시SAP C_TS422_2023덤프비용전액을 환불해드릴만큼 저희 덤프자료에 자신이 있습니다. Itexamdump에서는SAP C_TS422_2023덤프를 항상 최신버전이라도 보장해드리고 싶지만SAP C_TS422_2023 시험문제변경시점을 예측할수 없어 시험에서 불합격받을수도 간혹 있습니다. 하지만 시험에서 떨어지면 덤프비용을 전액 환불해드려 고객님의 이익을 보장해드립니다.

최신 SAP Certified Application Specialist C_TS422_2023 무료샘플문제 (Q47-Q52):

질문 # 47

What does forecasting in the dem planning cycle include? Note: There are 3 correct answers to this question.

- A. Market intelligence
- B. Past sales order quantities
- C. Oneoff events
- D. Past quotation quantities
- E. Past production planning quantities

정답: A,B,C

질문 # 48

What can you use standard heuristics in Advanced Planning (PP/DS) for?

- A. To set default values in production master data
- B. To automate material movements in material staging
- C. To optimize costs and times in production plans
- D. To solve planning problems for defined objects

정답: D

설명:

In SAP S/4HANA PP/DS, standard heuristics are predefined algorithms (e.g., SAP_PP_002 for planning standard lots) executed in the planning run (/SAPAPO/CDPSB0) or interactively (/SAPAPO/RRP3). Their purpose is:

* To solve planning problems for defined objects(C): Heuristics address specific planning tasks for objects like materials, resources, or orders. For example, SAP_PP_002 creates planned orders to cover shortages, SAP_PP_020 sequences operations, and SAP_PP_007 adjusts schedules—each solving a distinct problem (e.g., demand coverage, capacity conflicts) based on defined parameters.

Automate material movements in staging(A) is handled by WM or Kanban, not PP/DS heuristics. Set default values in production master data(B) is a master data maintenance task (e.g., MM02), not a heuristic function.

Optimize costs and times(D) is possible with optimization tools (e.g., PP/DS Optimizer), not standard heuristics, which focus on

rule-based planning. This is per SAP's PP/DS heuristic documentation.

질문 # 49

How would you define pegging in the context of Advanced Planning?

- A. An evaluation that is ordered according to the network structure of all related products represents the coverage of issue elements with receipt elements stock
- B. An evaluation to identify overstock situations in the balance between the receipt the issue elements after the production planning run
- C. An evaluation to identify material or capacity shortages in the bill of material structure after the production planning run
- **D. An evaluation that is ordered according to the bill of material structure of all related products represents the relationship between the receipt the issue elements**

정답: D

질문 # 50

What are some SAP-recommended guiding principles to achieve clean core operations? Note: There are 3 correct answers to this question.

- A. Establish regular housekeeping tasks and procedures.
- **B. Establish release management.**
- C. Integrate clean core practices in the end-to-end value process chain.
- **D. Define roles and responsibilities as part of a process transformation office.**
- **E. Establish an organizational structure, technical foundation, and transformation methodology for clean core.**

정답: B,D,E

설명:

SAP's clean core approach for S/4HANA Cloud Private Edition aims for a standardized, upgrade-friendly system. Recommended guiding principles include:

* Establish an organizational structure, technical foundation, and transformation methodology for clean core(A): SAP advises setting up a governance structure, technical standards (e.g., extensibility via SAP BTP), and a methodology (e.g., SAP Activate) to ensure clean core adoption, minimizing customizations from the start.

* Establish release management(C): Effective release management (e.g., via SAP Solution Manager or SAP Cloud ALM) ensures regular updates are applied smoothly, maintaining a clean core by avoiding conflicts with custom code and leveraging new standard features.

* Define roles and responsibilities as part of a process transformation office(E): A dedicated transformation office with clear roles (e.g., process owners, IT architects) oversees clean core adherence, ensuring accountability for standardization and extensibility across teams.

Integrate clean core practices in the end-to-end value process chain(B) is a goal, not a distinct principle-it's an outcome of other principles. Regular housekeeping tasks(D) (e.g., data archiving) supports operations but isn't a core clean core principle, which focuses on design and governance. This is per SAP's clean core strategy.

질문 # 51

Where do you maintain the data to determine the duration of an operation for production? Note: There are 2 correct answers to this question.

- **A. Work center**
- B. Production version
- **C. Routing**
- D. Material master

정답: A,C

설명:

In SAP S/4HANA, the duration of an operation in production (e.g., for scheduling production orders) is determined by data maintained in:

* Work center(A): The work center (transaction CR01/CR02, Capacity tab) contains capacity data and formulas (e.g., Setup
