NEW QUESTION # 33

Which of the following are the correct types of usage of an installed base? Note: There are 2 correct answers to this question.

- A. Assigning to a case
- B. Assigning warranties
- C. Tracking installed assets
- D. Tracking measuring points

Answer: A,C

Explanation:
In SAP Service Cloud Version 2, an installed base is used to manage customer equipment and assets. Tracking installed assets is a primary function, as it allows organizations to maintain a record of customer-owned products or equipment, including details like serial numbers and locations. Assigning to a case is another key usage, enabling service agents to link a case to a specific installed base for accurate service delivery and tracking. According to SAP documentation, "An installed base represents a grouping of products installed at a customer location and can be associated with cases for service requests." Tracking measuring points (A) is

related to equipment monitoring in SAP S/4HANA, not a direct function of installed bases in Service Cloud V2. Assigning warranties (C) is managed through registered products, not installed bases.
