

Data-Driven-Decision-Making Latest Test Answers - New Data-Driven-Decision-Making Dumps Ppt

The WGU Data-Driven-Decision-Making exam questions are being updated on a regular basis. As you know the WGU Data-Driven-Decision-Making exam syllabus is being updated on a regular basis. To add all these changes in the WGU Data-Driven-Decision-Making exam dumps we have hired a team of exam experts. They regularly update the Data-Driven-Decision-Making Practice Questions as per the latest Data-Driven-Decision-Making exam syllabus. So you have the option to get free VPC2Data-Driven Decision MakingC207 exam questions update for up to 1 year from the date of Data-Driven-Decision-Making PDF dumps purchase.

Many candidates find the WGU Data-Driven-Decision-Making exam preparation difficult. They often buy expensive study courses to start their WGU Data-Driven-Decision-Making certification exam preparation. However, spending a huge amount on such resources is difficult for many WGU Data-Driven-Decision-Making Exam applicants.

New Data-Driven-Decision-Making Dumps Ppt & Data-Driven-Decision-Making Well Prep

GetValidTest senior experts have developed exercises and answers about WGU certification Data-Driven-Decision-Making exam with their knowledge and experience, which have 95% similarity with the real exam. I believe that you will be very confident of our products. If you choose to use GetValidTest's products, GetValidTest can help you 100% pass your first time to attend WGU Certification Data-Driven-Decision-Making Exam. If you fail the exam, we will give a full refund to you.

WGU VPC2Data-Driven Decision MakingC207 Sample Questions (Q29-Q34):

NEW QUESTION # 29

A county government is creating a budget for the next fiscal year. They wish to use analytics to guide their decisions about costs. Which analytic method can the county apply to this issue?

- A. Average number of projects completed
- B. Median cost for all county projects
- C. Average cost per project spent by other similar counties
- D. Median number of projects completed last year

Answer: C

Explanation:

To guide budgeting decisions, data-driven decision making emphasizes benchmarking against comparable organizations. Using

the average cost per project spent by other similar counties allows the county to assess whether its planned expenditures are reasonable and competitive.

Benchmarking provides external context that internal historical metrics cannot. While median costs or project counts describe internal performance, they do not indicate whether spending levels are appropriate relative to peers. Comparing average costs across similar counties helps identify inefficiencies, cost-saving opportunities, and realistic budget targets. Therefore, option A is the most effective analytic method for cost-based decision-making in this scenario.

NEW QUESTION # 30

Which type of study is also known as a quasi-experimental study?

- A. Content validity
- B. Hypothesis testing
- C. Blind study
- D. **Observational study**

Answer: D

Explanation:

A **quasi-experimental study** is commonly referred to as an **observational study** in data-driven decision making. Unlike true experiments, quasi-experimental studies do not involve random assignment of subjects to treatment and control groups. Instead, researchers observe outcomes in naturally occurring groups and attempt to draw conclusions about relationships between variables. In observational studies, the researcher does not control the assignment of treatments. As a result, these studies are more susceptible to bias and confounding variables than randomized experiments. However, they are often necessary when controlled experimentation is impractical, unethical, or too costly. For example, studying the impact of policy changes or economic conditions typically relies on observational data.

Blind studies are a form of experimental design used to reduce bias, hypothesis testing is a statistical process rather than a study type, and content validity refers to measurement quality. None of these represent quasi-experimental designs.

In data-driven decision making, observational (quasi-experimental) studies are valuable for identifying associations and generating insights, but analysts must be cautious not to infer causality without proper controls. Therefore, the correct answer is **A**.

NEW QUESTION # 31

What is the formula for calculating a simple index number?

- A. The base year's price divided by the current price
- B. The current price divided by the base year's price
- C. The base year's price divided by the current price times 100
- D. **The current price divided by the base year's price times 100**

Answer: D

Explanation:

A simple index number is used in data-driven decision making to measure relative change in a variable over time, commonly prices, quantities, or values. The standard formula for a simple price index compares the value in the current period to a base period and expresses the change as a percentage.

The correct formula is the current price divided by the base year's price, multiplied by 100. This standardization allows analysts and managers to easily interpret changes relative to a reference point. An index value of 100 indicates no change from the base year, values above 100 indicate an increase, and values below 100 indicate a decrease.

This approach is widely used in economic analysis, inflation tracking, and business trend evaluation because it simplifies comparisons across time. Dividing the base year by the current price would reverse interpretation, and omitting multiplication by 100 would fail to express the index in percentage terms.

Therefore, option A correctly represents the formula for calculating a simple index number.

NEW QUESTION # 32

What are two benefits of good data quality management in improving business decision-making?

Choose 2 answers.

- A. It ensures there are no missing data points.
- B. It guarantees that a sample will be statistically significant.
- C. It begins the statistical process faster.
- D. It mitigates undetected errors from the data-entry process.

Answer: A,D

Explanation:

Good data quality management plays a critical role in improving business decision-making by ensuring that data is accurate, complete, and reliable. One key benefit is that it ensures there are no missing data points, which helps maintain data completeness. Missing data can distort results, reduce analytical power, and lead to incorrect conclusions, especially in descriptive and inferential statistics.

Another important benefit is that data quality management mitigates undetected errors from the data-entry process. Errors such as duplicate entries, incorrect values, or inconsistent formats can significantly bias analysis if left unnoticed. Through validation checks, cleaning procedures, and governance standards, organizations reduce the risk of flawed insights.

While good data quality supports better analysis, it does not guarantee statistical significance, as significance depends on sample size, variability, and study design. Similarly, it does not necessarily make the statistical process faster; in fact, data cleaning can be time-consuming. However, it improves the accuracy and trustworthiness of outcomes.

In data-driven decision making, high-quality data is essential because decisions are only as good as the data used to support them. Therefore, the correct answers are A and D.

NEW QUESTION # 33

A company runs a regression analysis to determine sales based on advertising expenditures, which can be shown in a linear equation as $y = 2x + 25,000$. The company plans to spend \$20,000 on advertising.

Which sales figure should the company expect to generate based on the given equation?

- A. \$65,000
- B. \$50,000
- C. \$40,000
- D. \$75,000

Answer: A

Explanation:

In linear regression, the equation $y = mx + b$ is used to predict the value of the dependent variable based on the independent variable. In data-driven decision making, this equation represents the estimated relationship between advertising expenditure and sales revenue.

Here, x represents advertising spending, m is the slope (2), and b is the intercept (\$25,000). Substituting the planned advertising expenditure of \$20,000 into the equation gives:

$$y = 2(20,000) + 25,000$$

$$y = 40,000 + 25,000$$

$$y = 65,000$$

This result represents the expected sales revenue based on the regression model. The intercept indicates baseline sales when advertising spend is zero, while the slope shows the increase in sales for each additional dollar spent on advertising.

Therefore, the company should expect to generate \$65,000 in sales, making option C the correct answer.

NEW QUESTION # 34

.....

We have chosen a large number of professionals to make Data-Driven-Decision-Making learning question more professional, while allowing our study materials to keep up with the times. Of course, we do it all for you to get the information you want, and you can make faster progress. You can also get help from Data-Driven-Decision-Making Exam Training professionals at any time. We can be sure that with the professional help of our Data-Driven-Decision-Making test guide you will surely get a very good experience. Good materials and methods can help you to do more with less. Choose Data-Driven-Decision-Making test guide to get you closer to success!

New Data-Driven-Decision-Making Dumps Ppt: <https://www.getvalidtest.com/Data-Driven-Decision-Making-exam.html>

We respect the private information of you, if you choose us for your Data-Driven-Decision-Making exam materials, your personal

information will be protected well, Our design and research on our Data-Driven-Decision-Making exam dumps are totally based on offering you the best help, We have an complete online support system which is available for every candidate who is interested in WGU Data-Driven-Decision-Making dumps VCE file 7*24, and we will answer your query in time, you can ask us about the professionals and can also ask for WGU VPC2Data-Driven Decision MakingC207 exam, we will offer you the best of solutions free of charge, Such a valuable acquisition priced reasonably of our Data-Driven-Decision-Making study guide is offered before your eyes, you can feel assured to take good advantage of.

You can even book the actual room you'll be staying in from Data-Driven-Decision-Making your phone, Right now, there are no obstacles for Kodu to hide behind no trees, rocks, or buildings, for example.

We respect the private information of you, if you choose us for your Data-Driven-Decision-Making Exam Materials, your personal information will be protected well, Our design and research on our Data-Driven-Decision-Making exam dumps are totally based on offering you the best help.

Free PDF Quiz WGU Data-Driven-Decision-Making VPC2Data-Driven Decision MakingC207 First-grade Latest Test Answers

We have an complete online support system which is available for every candidate who is interested in WGU Data-Driven-Decision-Making dumps VCE file 7*24, and we will answer your query in time, you can ask us about the professionals Data-Driven-Decision-Making Reliable Braindumps Files and can also ask for WGU VPC2Data-Driven Decision MakingC207 exam, we will offer you the best of solutions free of charge.

Such a valuable acquisition priced reasonably of our Data-Driven-Decision-Making study guide is offered before your eyes, you can feel assured to take good advantage of, 30 Days Free Updates, Instant Download!
