When looking for a job, of course, a lot of companies what the personnel managers will ask applicants that have you get the Chrome-Enterprise-Administrator certification to prove their abilities, therefore, we need to use other ways to testify our knowledge we get when we study at college, such as get the Chrome-Enterprise-Administrator Test Prep to obtained the qualification certificate to show their own all aspects of the comprehensive abilities, and the Chrome-Enterprise-Administrator exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q41-Q46):

### NEW QUESTION # 41

An organization using Chrome browser on Windows has policies from group policy and Chrome Enterprise Core. In what order are the policies applied?

- **A. By the precedence hierarchy**
- B. Group policy takes precedence
- C. Cloud policy takes precedence
- D. From least restrictive to most restrictive

**Answer: A**

Explanation:

When both Group Policy (local machine policy) and Chrome Enterprise Core (cloud policy) are configured on a Windows device, the effective policy is determined by a defined order of precedence. Generally, cloud policies for managed browsers will override conflicting local policies. The specific precedence order is configurable, but it follows a hierarchical structure where certain policy sources take priority over others.

Options C and D present a simplified view that might not always be the case depending on the configuration.

Option B is a general principle of conflict resolution but doesn't describe the specific order in Chrome policy application.

#### NEW QUESTION # 42

Which option is a security event that Google Chrome captures?

- **A. Malware detection**
- B. User inactivity
- C. Password complexity
- D. Unauthorized file downloads

**Answer: A**

Explanation:

Chrome's Safe Browsing feature actively scans web pages, downloads, and extensions for known malware.

When malware is detected, it is reported as a security event. While unauthorized file downloads could be a consequence of a security issue, Chrome's direct detection focuses on the malware itself. Password complexity is a setting for password management, and user inactivity is a system or application-level event, not a direct security event captured by Chrome in the same way as malware detection.

#### NEW QUESTION # 43

A company is managing browsers in the Google Admin console Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy This violates company policy How would an administrator block these extensions'?

- A. Set policy in the Google Admin console to block all extensions from being installed on the browser
- B. Remotely connect to each device and delete the extension from the browser
- **C. Set permission policy in the Google Admin console to block such extensions**
- D. Send an email to the users notifying them that they must uninstall the detected extensions

**Answer: C**

Explanation:

The Google Admin console allows administrators to control extension permissions. By configuring the "Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

#### NEW QUESTION # 44

Which data point is available in the Chrome Versions report\\*?

- **A. Active Browsers**
- B. Inactive Browsers
- C. Last update
- D. Total Browsers

**Answer: A**

Explanation:

The Chrome Versions report specifically focuses on the distribution of different Chrome browser versions across the managed fleet. A key data point in this report is the number of "Active Browsers" on each version, allowing administrators to understand their update status and identify any significant fragmentation. While "Total Browsers" might be a related metric, the core focus of the "Versions" report is on the active instances and their respective versions. Information on "Inactive Browsers" or the "Last update" time for individual browsers might be found in other reports.

#### NEW QUESTION # 45

An organization uses Chrome Enterprise Core and needs to enforce specific security policies (e.g., disabling extensions, restricting website access) only for employee work-related browsing Personal browsing should remain unrestricted Which approach is most appropriate?

- A. Use a single managed profile for all users, configuring separate work and personal bookmarks to manage access

- Answer: B**
