DOWNLOAD the newest Test4Cram FCSS_NST_SE-7.6 PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=1wss3Femga1cW5vzoA474VprPHwOToX9h>

Once you have selected the FCSS_NST_SE-7.6 study materials, please add them to your cart. Then when you finish browsing our web pages, you can directly come to the shopping cart page and submit your orders of the FCSS_NST_SE-7.6 study materials. Our payment system will soon start to work. Then certain money will soon be deducted from your credit card to pay for the FCSS_NST_SE-7.6 study materials. The whole payment process only lasts a few seconds as long as there has money in your credit card. Then our system will soon deal with your orders according to the sequence of payment. Usually, you will receive the FCSS_NST_SE-7.6 Study Materials no more than five minutes. Then you can begin your new learning journey of our study materials. All in all, our payment system and delivery system are highly efficient.

Our PDF version of our FCSS_NST_SE-7.6 exam practice guide is convenient for the clients to read and supports the printing. If the clients use our PDF version they can read the PDF form conveniently and take notes. The FCSS_NST_SE-7.6 quiz prep can be printed onto the papers. If the clients need to take note of the important information they need they can write them on the papers to be convenient for reading or print them on the papers. The clients can read our FCSS_NST_SE-7.6 Study Materials in the form of PDF or on the printed papers. Thus the clients learn at any time and in any place and practice the FCSS_NST_SE-7.6 exam practice guide repeatedly.

New FCSS_NST_SE-7.6 Test Tutorial | FCSS_NST_SE-7.6 New Question

You can take our Fortinet FCSS_NST_SE-7.6 practice exams (desktop and web-based) multiple times to gauge how well you've prepared for the real Fortinet FCSS_NST_SE-7.6 test. These FCSS_NST_SE-7.6 practice exams are designed specifically to help you identify your mistakes and attempt the real FCSS_NST_SE-7.6 examination successfully. You can continually enhance your FCSS - Network Security 7.6 Support Engineer (FCSS_NST_SE-7.6) test preparation by overcoming your mistakes. Customers can check their prior FCSS_NST_SE-7.6 tests and give FCSS_NST_SE-7.6 practice exams multiple times to improve themselves for the final Fortinet FCSS_NST_SE-7.6 test.

Fortinet FCSS_NST_SE-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Routing: This section focuses on Network Engineers and involves tackling issues related to packet routing using static routes, as well as OSPF and BGP protocols to support enterprise network traffic flow.
Topic 2	<ul style="list-style-type: none">• VPN: This section is aimed at IT Professionals and includes diagnosing and addressing issues with IPsec VPNs, specifically IKE version 1 and 2, to secure remote and site-to-site connections within the network infrastructure.

Topic 3	<ul style="list-style-type: none"> • Authentication: This section evaluates the abilities of System Administrators and requires troubleshooting both local and remote authentication methods, including resolving Fortinet Single Sign-On (FSSO) problems for secure network access.
Topic 4	<ul style="list-style-type: none"> • System troubleshooting: This section of the exam measures the skills of Network Security Support Engineers and addresses diagnosing and correcting issues within Security Fabric setups, automation stitches, resource utilization, general connectivity, and different operation modes in FortiGate HA clusters. Candidates work with built-in tools to effectively find and resolve faults.
Topic 5	<ul style="list-style-type: none"> • Security profiles: This part measures skills of Security Operations Specialists and covers identifying and resolving problems linked to FortiGuard services, web filtering configurations, and intrusion prevention systems to maintain protection across network environments.

Fortinet FCSS - Network Security 7.6 Support Engineer Sample Questions (Q16-Q21):

NEW QUESTION # 16

Exhibit.

```
# diagnose automation test failover
automation test failover stitch:HAFailOver
```

Refer to the exhibit, which shows the output of diagnose automation test.

What can you observe from the output? (Choose two.)

- A. The automation stitch test is not being logged.
- B. The automation stitch test failed but the HA failover was successful.
- C. The test was unsuccessful.
- D. An HA failover occurred.

Answer: A,C

NEW QUESTION # 17

Exhibit.

```

config system fortiguard
  set protocol udp
  set port 8888
  set load-balance-servers1
  set auto-join-forticloud enable
  set update-server-location any
  set sandbox-region ''
  set fortiguard-anycast disable
  set antispam-force-off disable
  set antispam-cache enable
  set antispam-cache-ttl 1800
  set antispam-cache-mpercent2
  set antispam-timeout 7
  set webfilter-force-off enable
  set webfilter-cache enable
  set webfilter-cache-ttl 3600
  set webfilter-timeout 15
  set sdns-server-ip "208.91.112.220"
  set sdns-server-port 53
  unset sdns-options
  set source-ip 0.0.0.0
  set source-id6 ::
  set proxv-server-ip 0.0.0.0
  set proxy-server-port 0
  set proxy-username
  set ddns-server-ip 0.0.0.0
  set dns-server-port 443
end

```

Refer to the exhibit, which shows a FortiGate configuration.

An administrator is troubleshooting a web filter issue on FortiGate. The administrator has configured a web filter profile and applied it to a policy; however the web filter is not inspecting any traffic that is passing through the policy.

What must the administrator do to fix the issue?

- A. Enable fortiguard-anycast.
- B. Change protocol to TCP.
- C. Increase webfilter-timeout.
- D. Disable webfilter-force-off.

Answer: D

NEW QUESTION # 18

Which authentication option can you not configure under config user radius on FortiOS?

- A. mschap2
- B. pap
- C. mschap
- D. eap

Answer: D

Explanation:

According to the official Fortinet administration guide for FortiOS 7.6.4 under the section "Configuring a RADIUS server," the supported RADIUS authentication methods you can configure via the CLI with config user radius are:

- * pap
- * chap
- * mschap

* mschapv2
* auto

The relevant CLI syntax is set auth-type {auto | ms_chap_v2 | ms_chap | chap | pap}. You can confirm this directly in the configuration table and from real CLI sessions.

EAP (Extensible Authentication Protocol) is NOT an authentication option you can directly set under config user radius. EAP methods (such as EAP-TLS, EAP-PEAP, EAP-TTLS) are negotiated between the RADIUS client and server but are not configurable as an explicit auth-type option in FortiOS. EAP authentication is typically used automatically by features like 802.1X, not through the user radius object authentication-type setting, and always requires proper backend workings between supplicant and RADIUS server

NEW QUESTION # 19

Exhibit 1.

```
config system global
  set snat-route-change disable
end

config router static
  edit 1
    set gateway 10.200.1.254
    set priority 5
    set device "port1"
  next
  edit 2
    set gateway 10.200.2.254
    set priority 10
    set device "port2"
  next
end
```

Exhibit 2.

```

Refer to the exhibits, which show the configuration on FortiGate and partial internet session information from a user on the internal network.

An administrator would like to test session failover between the two service provider connections.

Which two changes must the administrator make to force this existing session to immediately start using the other interface? (Choose two.)

- A. Change the priority of the port1 static route to 11.
- B. Configure set snat-route-change enable.
- C. Change the priority of the port2 static route to 5.
- D. Configure unset snat-route-change to return it to the default setting.

Answer: A,B

NEW QUESTION # 20

Exhibit.

```

config system fortiguard
  set protocol udp
  set port 8888
  set load-balance-servers1
  set auto-join-forticloud enable
  set update-server-location any
  set sandbox-region ""
  set fortiguard-anycast disable
  set antispam-force-off disable
  set antispam-cache enable
  set antispam-cache-ttl 1800
  set antispam-cache-mpe-percent2
  set antispam-timeout 7
  set webfilter-force-off enable
  set webfilter-cache enable
  set webfilter-cache-ttl 3600
  set webfilter-timeout 15
  set sdns-server-ip "208.91.112.220"
  set sdns-server-port 53
  unset sdns-options
  set source-ip 0.0.0.0
  set source-id6 ::
  set proxy-server-ip 0.0.0.0
  set proxy-server-port 0
  set proxy-username
  set ddns-server-ip 0.0.0.0
  set dns-server-port 443
end

```

Refer to the exhibit, which shows a FortiGate configuration.

An administrator is troubleshooting a web filter issue on FortiGate. The administrator has configured a web filter profile and applied it to a policy; however the web filter is not inspecting any traffic that is passing through the policy.

What must the administrator do to fix the issue?

- A. Enable fortiguard-anycast.
- B. Change protocol to TCP.
- C. Increase webfilter-timeout.
- D. Disable webfilter-force-off.

Answer: D

Explanation:

The exhibit shows a FortiGate configuration under config system fortiguard related to web filtering and FortiGuard options. There is a line:

```
set webfilter-force-off enable
```

According to official Fortinet documentation, the "webfilter-force-off" option, when enabled, causes the FortiGate to bypass web filtering for all traffic—even if a web filter profile is applied to a policy. This override is typically used for troubleshooting or performance reasons and is documented as an explicit bypass feature.

If an administrator wants to enforce web filtering inspection, this setting must be disabled. The correct way to restore web filtering functionality is to run:

```
set webfilter-force-off disable
```

Once done, traffic passing through policies with web filter profiles will be inspected and filtered as per configuration. Other settings such as timeout or cache TTL do not bypass web filtering; they only affect operational nuances.
