## How Can You Avoid Wasting Your Money by Purchasing the SAP C\_CPI\_2506 Exam Questions?

To attain this you just need to enroll in the SAP C\_CPI\_2506 certification exam and put all your efforts to pass this challenging SAP C\_CPI\_2506 exam with good scores. However, to get success in C\_CPI\_2506 dumps PDF is not an easy task, it is quite difficult to pass it. But with proper planning, firm commitment, and C\_CPI\_2506 Exam Questions, you can pass this milestone easily. The Exam4PDF is a leading platform that offers real, valid, and updated C\_CPI\_2506 Dumps.

## SAP Certified Associate - Integration Developer Sample Questions (Q28-Q33):

### NEW QUESTION # 28

Besides in SAP API Management, where can you find policy templates?

- A. In SAP API Business Accelerator Hub- Explore Products
- **B. In SAP API Business Accelerator Hub- Explore Categories ?? APIs**
- C. In SAP API Business Accelerator Hub ? Explore Business Processes
- D. In SAP API Business Accelerator Hub - Explore Discover Integrations

**Answer: B**

Explanation:

Besides in SAP API Management, you can find policy templates in SAP API Business Accelerator Hub- Explore Categories ?? APIs. Policy templates are reusable sets of policies that can be applied to APIs to define their behavior and security. In SAP API Business Accelerator Hub, you can explore various categories of APIs that are pre-packaged with policy templates. For example, you can find APIs for sales order processing, customer master data management, product catalog management, and so on. Each API category has a set of policy templates that are suitable for its use case. Reference: SAP API Business Accelerator Hub | SAP Help Portal, Explore Categories | SAP Help Portal

### NEW QUESTION # 29

In a Data Store write operation, you want to set an Entry ID by reading a header value from an incoming message. Which notation do you use to implement this?

- A. S {receiverheader}
- **B. \${header.receiver}**
- C. S {receiverheader}
- D. S\${headerreceiver}

**Answer: B**

Explanation:

In SAP Cloud Integration, dynamic configuration values (headers, properties, body elements) are accessed using Expression Language (EL) notation:

`${header.<headerName>}` # Accesses a message header value.

`${property.<propertyName>}` # Accesses a message property.

`${body}` # Accesses the payload.

Therefore, when you want to set an Entry ID in a Data Store Write operation using a header value, the correct syntax is `${header.receiver}`.

### NEW QUESTION # 30

You use an APIKey for authentication in an HTTPS API call. In which part of the Content Modifier is the APIKey included?

- A. Exchange property
- B. Message body
- C. Message header
- D. Attachment

**Answer: C**

Explanation:

When using API Key authentication for HTTP(S) calls in SAP Integration Suite:

The API Key is typically included in the HTTP header (e.g., `APIKey: <value>` or `x-api-key: <value>`).

Message headers are configured in the Content Modifier for outbound requests.

Other options:

Attachment # Used for file handling, not authentication.

Message body # Contains payload, not credentials.

Exchange property # Used internally within the flow, not sent externally.

Thus, the API Key must be placed in the Message header.

### NEW QUESTION # 31

You are using a Data store Operation of the type Write. Which parameter must you select to avoid duplicate entries?

- A. Retention Threshold for Alerting
- B. Overwrite Existing Message
- C. Encrypted stored Message
- D. Include Message Headers

**Answer: B**

Explanation:

To avoid duplicate entries when using a Data Store Operation of the type Write, you must select the Overwrite Existing Message parameter. The Overwrite Existing Message parameter allows you to overwrite an existing data store entry with the same key if it already exists. If you do not select this parameter, the Write operation will fail if there is a duplicate key in the data store. Reference: [Modernize Integration with SAP Integration Suite | openSAP](#)

### NEW QUESTION # 32

What are API Management components? Note: There are 2 correct answers to this question.

- A. API Designer
- B. Authorization server
- C. API Entity
- D. Product

**Answer: A,D**

Explanation:

Key API Management components in SAP Integration Suite:

API Designer # Used to design APIs, import specifications (OpenAPI, RAML), and define metadata.

Product # Groups one or more APIs into a package that can be published to API Business Hub Enterprise.

Other options:

Authorization Server # Part of security infrastructure, not a direct API Management component.

API Entity # Not a defined component; the actual entities are API Proxies, Providers, and Products.

Thus, correct components are API Designer and Product.

### NEW QUESTION # 33

• • • • •

In today's society, our pressure grows as the industry recovers and competition for the best talents increases. By this way the C\_CPI\_2506 exam is playing an increasingly important role to assess candidates. Considered many of our customers are too busy to study, the C\_CPI\_2506 real study dumps designed by our company were according to the real exam content, which would help you cope with the C\_CPI\_2506 Exam with great ease. The masses have sharp eyes, with so many rave reviews and hot sale our customers can clearly see that how excellent our C\_CPI\_2506 exam questions are. After carefully calculating about the costs and benefits, our C\_CPI\_2506 prep guide would be the reliable choice for you, for an ascending life.
