Perfect 100% Free PK0-005 – 100% Free Latest Dumps Sheet | PK0-005 Latest Exam Book

Our PK0-005 exam questions are so excellent for many advantages. Firstly, the quality of our PK0-005 learning braindumps is very high. You may think that our PK0-005 training materials can only help you to start with confidence, but in fact, they cover the real exam questions and answers. And the accuracy of them will let you surprised. Secondly, the prices for the PK0-005 learning prep are really favorable for every candidate. Even the students can afford it.

CompTIA Project+ Certification Exam Sample Questions (Q329-Q334):

NEW QUESTION # 329

A project was closed according to the planned project schedule. Security teams later identified that one of the contractors stole data after the project's closure. Which of the following would have most likely prevented the data from being stolen?

- A. Project evaluation
- B. Project sign-off
- C. Closing contracts
- **D. Removing access**

Answer: D

Explanation:

Removing access means revoking the contractor's permissions to access the project data, systems, and devices after the project is closed. This is a crucial security measure to prevent unauthorized access, misuse, or theft of sensitive data by external parties. Closing contracts, project sign-off, and project evaluation are important steps in the project closure process, but they do not necessarily prevent data theft by themselves. They may involve formal agreements, documentation, and feedback, but they do not address the technical aspects of data security. References = CompTIA Project+ Study Guide: Exam PK0-005, Third Edition, Chapter 14: Closing the Project, page 3771; 9 Ways to Prevent Third-Party Data Breaches in 2023; 3 Ways to Prevent Data Theft by Contractors

NEW QUESTION # 330

A development team, which is working on a software project demonstrates software functionality 10 project stakeholder a week before the implementation date. Several stakeholders comment that the software does not meet the communicated expectations. Which of the following tools should the project manager use to validate the functionality?

- **A. Project status report**
- B. Requirements Traceability Matrix
- C. Signed project charter
- D. Work breakdown structure
- E. Detect log

Answer: A

NEW QUESTION # 331

A highly scored negative risk causes a risk trigger, but the issue has not started yet. Which of the following is the next step the project team should take?

- A. Assign a risk owner
- B. Perform a work-around
- **C. Execute the contingency plan**
- D. Escalate to senior management

Answer: C

Explanation:

When a risk trigger is detected, the risk hasn't yet turned into an issue, but the conditions indicate it may happen. At this stage, the project team should execute the contingency plan that was pre-developed during risk planning. Assigning a risk owner happens earlier in the planning stage, and work-arounds are used only for unplanned risks. Escalation is only needed if the contingency cannot address the risk.

NEW QUESTION # 332

Due to multiple changes, the sign-off for the project scope baseline is delayed. The project sponsor has restricted the budget for this project. Which of the following should the project manager MOST likely do to move forward?

- **A. Communicate with the affected stakeholders.**
- B. Initiate a formal change request to modify the cost
- C. Set a new cost using a lightweight estimation method.

- D. Adjust the scope to stay within the cost.

Answer: A

Explanation:

The project manager should communicate with the affected stakeholders first after realizing that the sign-off for the project scope baseline is delayed due to multiple changes and that the budget for this project is restricted by the project sponsor. The affected stakeholders are those who have an interest or influence on the project and may be impacted by any changes or delays. Communicating with them can help to explain the situation, assess the impact, seek feedback, and manage expectations.

NEW QUESTION # 333

A contractor attended a project meeting that was exclusively for company employees. Which of the following actions should the PM take?

- A. Consult the request for proposal.
- B. Review the meeting cadence.
- **C. Reinforce the rules of engagement.**
- D. Escalate to vendor management.

Answer: C

Explanation:

The rules of engagement are the guidelines and expectations that define the relationship between the contractor and the company. They may include topics such as communication, confidentiality, access, security, performance, and compliance. The project manager should reinforce the rules of engagement with the contractor to ensure that they understand and respect the boundaries and protocols of the company. This will help to avoid any potential conflicts, misunderstandings, or breaches of contract. Reference = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 7: Project Stakeholder Management, p. 239; Contractor Rules of Engagement - Cox Enterprises, p. 1; Legal Considerations for Engaging Contractors | LegalVision
