At QuestionsTube, you can read UIPATH-ADPV1 free demo questions in pdf file, so you can check the questions and answers before deciding to download the UiPath UIPATH-ADPV1 practice questions. These free demo questions are parts of the UIPATH-ADPV1 exam questions. Download and read them carefully, you will find that the UIPATH-ADPV1 test questions of QuestionsTube will be your great learning materials online. Share some UIPATH-ADPV1 exam online questions below.

What's more, part of that FreeDumps UiPath-ADPv1 dumps now are free: <https://drive.google.com/open?id=1QiaLtBKpvV2ubiVGLodM44ed6YP0TAaJ>

You can increase your competitive force in the job market if you have the certificate. UiPath-ADPv1 exam torrent of us will offer an opportunity like this. If you choose us, we will help you pass the exam just one time. UiPath-ADPv1 exam torrent of us is high quality and accuracy, and you can use them at ease. Besides, we offer you free demo to have a try before buying, and we have free update for 365 days after purchasing. The update version for UiPath-ADPv1 Exam Dumps will be sent to your email automatically.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Topic 2	<ul style="list-style-type: none">• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.

Topic 3	<ul style="list-style-type: none"> • UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.
Topic 4	<ul style="list-style-type: none"> • Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.

Free PDF Quiz 2026 UiPath-ADPv1: Professional Examcollection UiPath (ADPv1) Automation Developer Professional Questions Answers

Normally, you will come across almost all of the real test questions on your usual practice. Maybe you are doubtful about our UiPath-ADPv1 training questions. We have statistics to tell you the truth. The passing rate of our products is the highest according to the investigation. Many candidates can also certify for our UiPath-ADPv1 Study Materials. As long as you are willing to trust our UiPath-ADPv1 preparation materials, you are bound to get the certificate.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q183-Q188):

NEW QUESTION # 183

What do the percentages from the Test Explorer panel represent?

- A. Correctness of the code percent.
- **B. Passing percent.**
- C. Percent of test data run.
- D. Coverage percent.

Answer: B

Explanation:

The percentages from the Test Explorer panel represent the passing percent of the test cases that are executed.

The Test Explorer panel shows the status of each test case, the total number of test cases, the number of passed test cases, the number of failed test cases, and the passing percent. The passing percent is calculated by dividing the number of passed test cases by the total number of test cases and multiplying by 100. For example, if there are 10 test cases and 8 of them pass, the passing percent is 80%. References: Test Explorer

NEW QUESTION # 184

A developer aims to employ the REFramework for automating a business process that Involves a TransactionData collection (DataTable) comprising vendor names and addresses.

Instructions: Choose the appropriate variable type for the TransactionItem from the provided drop-down list in the following exhibit.

Answer Area

Name	Variable type	Scope	Default
TransactionItem	DataRow	General Business ...	Enter a VB expression
SystemException	Exception	General Business ...	Enter a VB expression
BusinessException	BusinessRuleException	General Business ...	Enter a VB expression
TransactionNumber	Int32	General Business ...	1
Config	Dictionary<String,Obj>	General Business ...	Enter a VB expression

Answer Area

Name	Variable type	Scope	Default
TransactionItem	DataRow	General Business ...	Enter a VB expression
SystemException	DataRow[]	General Business ...	Enter a VB expression
BusinessException	DataRow	General Business ...	Enter a VB expression
TransactionNumber	List<DataRow>	General Business ...	1
Config	QueueItem	General Business ...	Enter a VB expression
	DataTable	General Business ...	1
	Dictionary<String,Obj>	General Business ...	Enter a VB expression

Answer:

Explanation:

Name	Variable type	Scope	Default
TransactionItem	DataRow	General Business ...	Enter a VB expression
SystemException	DataRow[]	General Business ...	Enter a VB expression
BusinessException	DataRow	General Business ...	Enter a VB expression
TransactionNumber	List<DataRow>	General Business ...	1
Config	QueueItem	General Business ...	Enter a VB expression
	DataTable	General Business ...	1
	Dictionary<String,Obj>	General Business ...	Enter a VB expression

Explanation:

The REFramework (Robotic Enterprise Framework) in UiPath is designed to work with transactional data.

For a process that involves iterating over a DataTable where each row represents a transaction item, the appropriate variable type for the TransactionItem would be a DataRow.

In the context of REFramework, a DataRow is typically used to represent a single transaction item when the transaction data is contained within a DataTable. This allows the framework to process each row (or transaction) one by one.

Therefore, the correct variable type for the TransactionItem from the drop-down list should be DataRow.

NEW QUESTION # 185

How are mock files organized in an automation project structure?

- A. They are stored in a dedicated folder for mock testing configuration.
- B. They are stored in a nested structure based on the source workflow's file tree.
- **C. They are stored in a separate folder called "Mocks".**
- D. They are stored in the same folder as the source workflow.

Answer: C

Explanation:

Mock files in an automation project structure are usually stored in a separate folder named "Mocks". This organization helps in managing and accessing mock data efficiently during testing.

NEW QUESTION # 186

Which of the following demonstrates the correct syntax for using the Vb.Net "If" Operator?

- A. `If(condition1, valueIfTrue, valueIfFalse)`
- B. `If condition1 Then valueIfTrue ElseIf valueIfFalse`
- C. `If(condition1, valueIfTrue) ElseIf(valueIfFalse)`
- D. `valueIfTrue If condition1 Else valueIfFalse`

Answer: A

Explanation:

The correct syntax for using the Vb.Net If operator is `If(condition1, valueIfTrue, valueIfFalse)`. The If operator is a ternary operator that returns one of two values, depending on whether the condition is true or false. The condition must be a Boolean expression or a data type that can be implicitly converted to Boolean. The valueIfTrue and valueIfFalse arguments can be any data type, but they must be the same or implicitly convertible to a common type. The If operator uses short-circuit evaluation, which means that it only evaluates the argument that corresponds to the result of the condition. For example, the following expression returns "Positive" if the variable number is greater than or equal to zero, and "Negative" otherwise:

`VB Dim result As String = If(number >= 0, "Positive", "Negative")` References: [If Operator], [Ternary Operator]

NEW QUESTION # 187

The following table is stored in a variable called "dt".

	A	UiPath	C
1	No.	Item	Quantity
2		1 apple	10
3		2 orange	20
4		3 mango	5
5		4 kiwi	80
6		5 pear	1

What will the value of the qty variable be after executing the Assign activity?

The screenshot shows an Assign activity in a workflow. The variable 'qty' is assigned the value of 'dt.AsEnumerable.'. Below it, the Expression Editor is open, showing the following code:

```
1 dt.AsEnumerable.  
2 SkipWhile(Function(x) x.Item1.ToString.Equals("mango"))(0)("Quantity").ToString
```

- A. null
- B. 0
- C. 1
- D. 2

Answer: B

Explanation:

The value of the qty variable will be 80 after executing the Assign activity. This is because the expression in the Assign activity is using the LINQ methods AsEnumerable, SkipWhile, and Item to access the data in the dt variable. The dt variable is a DataTable that contains the following data:

Item	Quantity
apple	5
banana	10
mango	20
orange	80
grape	40

The AsEnumerable method converts the DataTable into an Enumerable collection of DataRow objects. The SkipWhile method skips the elements of the collection until the condition is false. The condition is a lambda expression that checks if the value of the Item column is equal to "mango". The (0) indexer returns the first element of the collection after skipping. The Item method accesses the value of the Quantity column of the DataRow. The ToString method converts the value into a string. Therefore, the expression will skip the first three rows of the DataTable and return the value of the Quantity column of the fourth row, which is 80. References: [DataTable.AsEnumerable Method], [Enumerable.SkipWhile Method], [DataRow.Item Property]

NEW QUESTION # 188

.....

We know how expensive it is to take UiPath-ADPv1 exam. It costs both time and money. However, with the most reliable exam dumps material from FreeDumps, we guarantee that you will pass the UiPath-ADPv1 exam on your first try! You've heard it right. We are so confident about our UiPath-ADPv1 Exam Dumps for UiPath UiPath-ADPv1 exam that we are offering a money back guarantee, if you fail. Yes you read it right, if our UiPath-ADPv1 exam braindumps didn't help you pass, we will issue a refund - no other questions asked.
